Subject: Phase I Environmental Site Assessment
4301 West Chicago Avenue
Chicago, Illinois
Project No. 3205171606

Dear Ms. Mazza:

Amec Foster Wheeler Environment & Infrastructure, Inc. is pleased to present this Phase I Environmental Site Assessment (ESA) report for the above-referenced site in Chicago, Illinois. Amec Foster Wheeler issued the Draft Phase I ESA on June 26, 2017. Acquisition is expected to occur in January 2018. Components of the Phase I ESA which are required to be completed within 180 days of the expected date of purchase have been updated in this, the final Phase I ESA report.

We have appreciated the opportunity to serve you on this project. If you have any questions or desire further information, please feel free to contact us at 773-693-6030.

Sincerely,

Amec Foster Wheeler Environment & Infrastructure, Inc.

Mary E. Jank, PG

EXECUTIVE SUMMARY

Amec Foster Wheeler Environment & Infrastructure, Inc. (Amec Foster Wheeler), was retained by the City of Chicago Department of Fleet and Facility Management (2FM) to conduct a Phase I Environmental Site Assessment (ESA) for the site located at 4301 West Chicago Avenue in Chicago, Cook County, Illinois (the site) in general accordance with the scope and limitations of ASTM International (ASTM) E 1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process." Amec Foster Wheeler issued the Draft Phase I ESA on June 26, 2017. Acquisition is expected to occur in January 2018. Components of the Phase I ESA which are required to be completed within 180 days of the expected date of purchase have been updated by our subcontractor, Yung Environmental, Inc. in this final Phase I ESA report.

The site is a 30.4-acre parcel that is currently vacant. This Phase I ESA was performed in conformance with the scope and limitations of ASTM International (ASTM) Standard E 1527-13.

The purpose of this Phase I ESA was to identify known environmental conditions or concerns associated with the site, which include any recognized environmental conditions (RECs) associated with the site. RECs do not include *de minimis* conditions that generally do not present a material risk of harm to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. The results of our Phase I ESA are summarized below.

Site History

Based on a review of reasonably ascertainable records, the site was vacant prior to its first developed usage. The site was developed as a rail yard by 1900 according to historic topographic maps. Previous environmental reports for the site indicate that the rail yard was constructed in 1896 by the Chicago and Northwestern Transportation Company on previously undeveloped land. By 1978-1980, most of the rail yard tracks were gone, and by at most 2002, the parcel was totally vacant.

Site Reconnaissance

At the time of Yung Environmental, Inc.'s site reconnaissance on November 15, 2017, the site was observed to be vacant. Yung Environmental, Inc. did not observe evidence of aboveground storage tanks (ASTs), underground storage tanks (USTs), odors, pools of liquid, drums, containers storing potentially hazardous substances or petroleum products, stains or corrosion, pits, ponds, or lagoons. Significant amounts of debris and mounded soil were present and a small demolished building structure was noted in the northwest.

Environmental Records

Review of the federal, state, and tribal (if appropriate) records, including a proprietary records summary provided by Environmental Data Resources, Inc. (EDR), a third-party provider of environmental and land use records, indicates that properties of environmental concern are located within the respective ASTM standard search distances for each category. The property itself has environmental concerns with regard to an UST which may have been present on the property and has no closure documentation (No Further Remediation or NFR letter) and contaminants consisting of metals and polynuclear aromatic hydrocarbons discovered in previous site investigations.

Amec Foster Wheeler has screened the identified properties for significance with respect to their potential impact on the site based on reasonably ascertainable information obtained from the records review, site reconnaissance, and interviews. Based on distances from the site boundary, the types of listings, and the assumed direction of groundwater flow, none of the properties listed is likely to have a negative impact on the site except:

- CTA at 4401 West Chicago Avenue, due to USTs installed in 1992, and because it is a former rail yard and may have fill similar to the site.
- Rail IT Property, 733 North Kilbourn Avenue, due to an UST that was not closed. It is unclear if this is the site or adjacent, as Rail IT at one time owned the site and the street number identified in the EDR report could potentially put it near the southeast corner of Chicago and Kilbourn Avenues, which would be the site.
- Department of Streets and Sanitation, 750 North Kilbourn Avenue, adjacent across North Kilbourn Avenue, due to USTs removed but not closed and since it is a transfer station and incinerator which may have resulted in airborne particulates reaching the site.
- City of Chicago, 715 North Kilbourn Avenue, due to an UST that was not closed. The initial incident report for #940242 lists 715 N. Kilbourn Avenue and then subsequent documentation on the Illinois EPA website for this incident changed to 750 N. Kilbourn Avenue. Amec Foster Wheeler believes the address was mis-identified in the original report and subsequently corrected. Although an incident was reported, a subsequent Illinois EPA letter indicates the site is a non-LUST site, which could indicate there was no confirmed release, or that the incident was from a non-regulated tank.

Phase II Assessment 2017

A Draft Phase I ESA report was prepared in June 2017, and based on that report, a Phase II investigation was completed which included the installation of twenty-four (24) soil borings and two (2) temporary wells. Twenty-six soil samples were obtained and four (4) groundwater samples (2 groundwater samples were from wells already present on the site). Samples were compared to TACO Tier 1 objectives for industrial/commercial sites with Class II groundwater. Based on the

Phase II and previous site investigations, concentrations of PNAs, arsenic, and antimony were detected in soils at concentrations above the objectives. No detected concentrations in groundwater exceeded the objectives. A TACO Tier 2 assessment concluded that the groundwater pathway could be excluded for antimony and benzo(a)anthracene above the soil component of groundwater ingestion objective and that averaging of PNAs and arsenic above the soil ingestion objective would result in three (3) locations which would require remediation or the use of engineered barriers for site closure.

Conclusions

No significant data gaps were identified that affected Amec Foster Wheeler's ability to identify RECs for the site, except overgrown vegetation which prevented viewing all of the ground surface.

Amec Foster Wheeler has performed this Phase I ESA in conformance with the scope and limitations of ASTM Standard E 1527-13. This assessment has revealed no evidence of RECs in connection with the site, except for the following:

Table 9: On-Site RECs

PIN#	Address	Acreage	Current/ Historic Land	RECs	COCs	Pathways
16-10-200-061-0000	4301 W Chicago Ave	30.4	Vacant/ Former Railyard	USTs	BTEX, Lead, PNAs	Groundwater, Soil Ingestion, Soil Inhalation, Vapor Intrusion
				Fill, Debris	PNAs, Metals	
				Rail Ties	Arsenic, Cresols	
				Previous Contaminants	PNAs, Metals	

Off-site sources of contamination that have the potential to migrate onto the site have been identified as a REC(s), as follows:

Table10: Off-Site RECs

Address	Distance	Current/ Historic Land	RECs	COCs	Pathways
CTA 4401 West Chicago Ave	Adjacent North EDR: 477 ft North	Bus Garage/ Rail yard	USTs	BTEX, Lead, PNAs	Groundwater Ingestion Inhalation, Vapor Intrusion
			Rail yard	Arsenic, Cresols	
			Fill	PNAs, Metals	
RAIL IT Property 733 N Kilbourn Ave	AdjacentWest or Property EDR: 910 ft West	Vacant/ Rail yard	UST	BTEX, PNAs	Groundwater Ingestion Inhalation Vapor Intrusion
Department of Streets and Sanitation 750 N. Kilbourn Ave	Adjacent West EDR: 1044 ft West	Transfer Station and Incinerator/ Rail yard	USTs	BTEX, Lead	Groundwater Ingestion Inhalation Vapor Intrusion
			Air Particulate from Former Incinerator	Metals, PNAs	
City of Chicago 715 N. Kilbourn Ave (750 N. Kilbourn Ave.)	Adjacent West EDR: 800 ft West	Vacant/ Rail yard	UST with Release	BTEX, PNAs	Groundwater Ingestion Inhalation Vapor Intrusion

ft = feet

Based on the results and conclusions of the Phase I ESA, Amec Foster Wheeler recommended further evaluation of soil and/or groundwater quality beneath the site.

Limitations

This Executive Summary is provided as a summary only, and should be used only in conjunction with a full review of the complete Phase I ESA report. Amec Foster Wheeler completed this work under the contract terms and conditions presented in Amec Foster Wheeler's proposal dated May 18, 2017 as updated on September 26, 2017.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

4301 West Chicago Avenue
Chicago, Illinois

1.0 INTRODUCTION

Amec Foster Wheeler Environment & Infrastructure, Inc. (Amec Foster Wheeler), was retained by the City of Chicago Department of Fleet and Facility Management (2FM) to perform a Phase I Environmental Site Assessment (ESA) for the site located at 4301 West Chicago Avenue in Chicago, Cook County, Illinois (the site) in general accordance with the scope and limitations of ASTM International (ASTM) E 1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process." Amec Foster Wheeler issued the Draft Phase I ESA on June 26, 2017. Acquisition is expected to occur in January 2018. Components of the Phase I ESA which are required to be completed within 180 days of the expected date of purchase have been updated by our subcontractor, Yung Environmental, Inc. in this final Phase I ESA report.

Amec Foster Wheeler prepared this Phase I ESA in accordance with a proposal dated May 18, 2017 as updated on September 26, 2017.

1.1 PROJECT OVERVIEW

This Phase I ESA is intended to satisfy one of the requirements to permit 2FM to qualify for the innocent landowner, adjoining property owner, or bona fide prospective purchaser limitations on liability under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (landowner liability protections). This Phase I ESA conforms to standards for "*all appropriate inquiries*"¹ into the previous ownership and uses of the site as specified by the US Environmental Protection Agency (EPA) in 40 CFR Part 312, and in accordance with good commercial or customary practice.

The goal of the Phase I ESA process is to identify recognized environmental conditions (RECs). The term *REC* means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a site:(1) due to any release to the environment, (2) under conditions

¹As defined at 42 U.S.C. Section 9601(35)(B) and 40 CFR Part 312.

indicative of a release to the environment, or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not RECs. A *de minimis* condition generally does not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Separate and distinct from a REC are two other types of conditions that may be noted in a Phase I ESA: a controlled REC (CREC) or an historical REC (HREC).

A CREC is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the current satisfaction of the applicable regulatory authority (for example, as evidenced by a no further action [NFA] letter or the equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls, such as site use restrictions, activity and use limitations (AULs), institutional controls, or engineering controls.

An HREC is a REC from a past release of any hazardous substances or petroleum products that has occurred in connection with the site and has been addressed to the satisfaction of the applicable regulatory authority (using current criteria) or meets the unrestricted residential use criteria established by the regulatory authority and applicable at the time of this Phase I ESA without subjecting the site to any required controls.

1.2 PROPERTY DESCRIPTION

The site consists of 30.4 acres located on the southeast corner of the intersection of Kilbourn and West Chicago Avenue. The Parcel ID (Tax ID) number for the site is 16-10-200-061-0000. The site is located in a mixed land use area. The site is partially fenced and no buildings or other improvements are present on the site.

1.3 SCOPE OF WORK

The scope of services for conducting a Phase I ESA is outlined in ASTM E 1527-13. This Phase I ESA report should not be used for any purposes outside the scope.

Significant additions, deletions, or deviations to ASTM E 1527-13 are noted below or in corresponding sections of this report. To complete the scope of services, the following tasks were performed:

A physical site reconnaissance to identify likely RECs in connection with the site;

Visual observation of adjoining properties or facilities to assess conditions that may indicate RECs on the site or on an adjoining property;

Review of historical land use of the site back to the first developed use or 1940, whichever is earlier;

Review of existing published information related to geology, hydrology, and topographical information for the site;

Review of reasonably ascertainable records and regulatory agency file database searches to identify federal and state-listed properties of known potential environmental concern located within the minimum search distances from the site, as specified in ASTM E 1527-13;

Lien/AUL search

Interviews with present and past site owners or occupants;

Interviews with representatives of the state, county, or local regulatory agencies with knowledge of the site;

Evaluation of compiled information and documentation; and

Preparation of this report.

This Phase I ESA does not address non-scope considerations as defined in Section 13 of ASTM E 1527-13. The scope of work does not include items considered to be beyond the scope of an ASTM Standard Phase I ESA, such as the collection and testing of groundwater samples, surface and drinking water samples, air samples (including radon), or building material samples for hazardous materials (including polychlorinated biphenyls [PCBs], asbestos, and lead-based paint). It also does not include the identification of wetlands, endangered or protected plant and animal species, or historical or archeological sites; geotechnical studies; geologic hazards; potential noise or air quality impacts; or concerns related to the Americans with Disabilities Act.

1.4 LIMITATIONS, EXCEPTIONS, SPECIAL TERMS AND CONDITIONS

This report summarizes work performed to fulfill the process specified under ASTM Standard E 1527-13. The ASTM standard is intended to permit a user to satisfy one of the requirements to qualify for the federal CERCLA liability exemptions. Reasonable efforts were limited to observation of accessible areas, review of referenced public records, and interviews. Amec Foster Wheeler was allowed full access to the site; however, overgrown vegetation limited our visual review of the site, as noted in this Phase I ESA.

This report was prepared by Amec Foster Wheeler exclusively for the City of Chicago Department of Fleet and Facility Management. The quality of information, conclusions, and estimates contained herein is consistent with the level of effort involved in Amec Foster Wheeler services and based on: (1) information available at the time of preparation, (2) data supplied by outside sources, and (3) the assumptions, conditions, and qualifications set forth in this report. This Phase I Environmental Site Assessment is intended to be used by the City of Chicago Department of Fleet and Facility Management for the 4301 West Chicago Avenue, Chicago, Illinois site only, subject to the terms and conditions of its contract with Amec Foster Wheeler. Any other use of, or reliance on, this report by any third party is at that party's sole risk.

Environmental impairment of a property may result from many activities, such as illegal or unreported dumping, or the spilling of hazardous wastes or materials. The presence of contaminants at a particular property may not always be apparent, and the completion of a Phase I ESA in accordance with ASTM E 1527-13 cannot provide a guarantee that hazardous wastes or materials do not exist. The scope of services executed for this project does not include an audit for regulatory compliance, ecological resources, endangered species, cultural and historic resources, indoor air quality, industrial hygiene, health and safety, or high-voltage power lines. It also does not include a detailed condition survey for asbestos, lead, radon, lead in drinking water, or other potential hazards or for wetlands, naturally occurring materials, or other items not outlined in Amec Foster Wheeler's scope of services.

The findings contained herein are relevant to the dates of Amec Foster Wheeler's site reconnaissance and should not be relied upon to represent conditions at later dates. In the event that changes in the nature, usage, or layout of the property or nearby properties are made, the conclusions and recommendations contained in this report may not be valid. If additional information becomes available, it should be provided to Amec Foster Wheeler so the original conclusions and recommendations can be modified as necessary.

Regardless of findings stated in this Phase I ESA, Amec Foster Wheeler is not responsible for consequences of conditions arising from facts that were withheld or not fully disclosed to Amec Foster Wheeler during this Phase I ESA.

This report does not address permit compliance or safety concerns, if any, associated with the site. It is the responsibility of the user of this Phase I ESA to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

Amec Foster Wheeler has completed this work under the contract terms and conditions presented in Amec Foster Wheeler's proposal dated May 18, 2017 as updated on September 26, 2017.

1.4.1 Significant Assumptions

Amec Foster Wheeler has prepared this Phase I ESA using reasonable efforts to identify RECs associated with hazardous substances or petroleum products at the site. Findings in this Phase I ESA are presented as professional judgments expressed herein and are based on the facts currently available to Amec Foster Wheeler within the limits of the existing data, scope of work, budget, and schedule.

An independent data research company, Environmental Data Resources, Inc. (EDR), of Milford, Connecticut, provided Amec Foster Wheeler with the government agency database search report referenced in this Phase I ESA. The information provided to Amec Foster Wheeler from the government agency database search was assumed to be correct unless obviously contradicted by Amec Foster Wheeler's observations or contradicted by another credible referenced source reviewed by Amec Foster Wheeler.

Similarly, Amec Foster Wheeler has assumed that responses to questions during interviews have been truthful, and that information contained in previous reports for the site or adjoining properties (for example, earlier Phase I ESAs or consultants' reports on tank removals or spill response) is accurate (pursuant to Section 4.7 of ASTM E 1527-13), unless contradicted by Amec Foster Wheeler's observations or contradicted by other credible referenced sources reviewed by Amec Foster Wheeler.

1.4.2 User Reliance

This Phase I ESA is intended to be used by the City of Chicago Department of Fleet and Facility Management subject to the terms and conditions of its contract with Amec Foster Wheeler. This Phase I ESA may not be relied upon by other parties without the express written consent of Client and upon written acceptance of our Terms and Conditions through Amec Foster Wheeler's Third Party Reliance Agreement.

In accordance with ASTM E 1527-13, this report is valid for one year from the date of the intended transaction, assuming interviews, a search for environmental liens, a review of government records, the visual reconnaissance of the site and surrounding properties, and the Environmental Professional declarations are updated within 180 days prior to the intended transaction.

Provided that the report is still valid and reliable, as per the limitations and exceptions listed above, Amec Foster Wheeler will issue a third-party reliance letter to parties that the City of Chicago Department of Fleet and Facility Management identifies in writing, upon payment of the then-current fee for such letters. All third parties relying on Amec Foster Wheeler's report, by such reliance agree to be bound by our proposal and Amec Foster Wheeler's reliance agreement. Amec

Foster Wheeler's standard reliance letter indicates that in no event shall Amec Foster Wheeler be liable for any damages, howsoever arising, relating to third-party reliance on Amec Foster Wheeler's report.

1.5 DATA GAPS

No significant data gaps or data failures were identified that affected Amec Foster Wheeler's ability to identify RECs for the site, except that heavy vegetation was present over much of the site. Amec Foster Wheeler has performed this Phase I ESA in conformance with the scope and limitations of ASTM Standard E 1527-13.

2.0 PROPERTY OVERVIEW

The following is a description of the location, general setting, and usage of the site and adjoining properties, based on information provided by the City of Chicago Department of Fleet and Facility Management and observations during the site reconnaissance.

2.1 PROPERTY LOCATION AND LAND USE

The current site address is 4301 West Chicago Avenue, Chicago, Illinois. The site location is shown on Figure 1, and the general site layout is shown on Figure 2.

2.1.1 Property Location

The site is located in Chicago, Cook County, Illinois.

According to the City of Chicago, the site is zoned PMD9 (special purpose district 9). The Parcel ID (Tax ID) number for the site is 16-10-200-061-0000. A copy of the legal site description is located in **Appendix E**.

At the time of the site reconnaissance, the site was vacant. The site is situated at an elevation of approximately 610 feet above mean sea level (msl). Based on our review of the local topography, it appears that groundwater would generally flow toward the east to Lake Michigan.

2.1.2 Current Uses of the Adjoining Properties

Table 1 summarizes the adjoining properties and their uses that Amec Foster Wheeler identified on the day of the site reconnaissance.

Table 1: Adjoining Properties

Direction	Property Description
North	West Chicago Avenue, commercial buildings
Northeast	N. Kostner Avenue, concrete construction materials yard then Falcon Transportation
East	N. Kostner Avenue, Chicago Transit Authority
Southeast	Railroad tracks, then Grand Warehouse and Distribution, Tec Foods, Inc
South	Railroad tracks, then Grand Worldwide Logistics and 4444 W Ohio-bldg for lease
Southwest	Railroad tracks, then City of Chicago Transfer Station
West	Kilbourn Avenue, industrial properties

2.1.3 Utilities

Table 2 details the utilities provided to the site.

Table 2: Site Utilities

Service	Provider
Electricity	Not applicable, property is vacant
Potable Water	Not applicable, property is vacant
Sanitary Sewer	Not applicable, property is vacant
Storm Sewer	Not applicable, property is vacant
Natural Gas	Not applicable, property is vacant

2.2 PHYSICAL SETTING

Amec Foster Wheeler reviewed reasonably ascertainable sources to assess the physical setting of the site, including the topographic, geologic, hydrogeologic, and hydrologic characteristics of the site. The results of Amec Foster Wheeler's review are presented below.

2.2.1 Topography

The 7.5-minute Chicago Loop, Illinois, United States Geological Survey (USGS) quadrangle, published in 2012, was examined. Review of the topographic map indicates that the site is located between 600 and 605 feet above msl. The topography of the area is generally flat with a slight slope to the east.

2.2.2 Geology/Hydrogeology

The EDR Radius report provides soil composition information in the general area of the site, provided by the United States Department of Agriculture (USDA) Soil Conservation Service (SCS). EDR indicates the site soils consist primarily of the Urbanland soil type, and consists of fine sand, sandy loam or clay loam.

The region is located in the central portion of the Central Lowlands Physiographic Province, a broad, relatively low area that roughly outlines the glaciated area and extends from the Appalachian Plateaus on the east to the Great Plains on the west, and from the Superior Upland on the north to the Interior Low Plateaus and the Ozark Plateaus on the south. The local relief in the Central Lowlands seldom exceeds a few hundred feet. The Central Lowland Province is divided into two sections, the Till Plains Section and the Great Lakes Section. The Great Lakes Section, which includes the Site, contains surficial features of the youngest part of the Wisconsin Stage glacial drift, and is characterized by its many lakes, and rough surfaced moraines.

Near surface geology in the southeastern Chicago area consists primarily of glacially derived fluvial, lacustrine, and ice-contact sediments. The property is underlain by these glacial deposits which overlie Silurian Dolomite bedrock. The underlying glacial deposits in the area are predominantly the Pleistocene-aged Wadsworth Till Member of the Wedron Formation. Overlying the till in parts of the area is the Carmi Member of the Equality Formation, which is composed primarily of quiet-water, well-bedded silts. In northeastern Illinois, the Wadsworth Till ranges from clay to clayey silt to sandy, clayey silt. All tills of the Wadsworth are characterized by their high clay content and abundance of black shale fragments. The high clay content produces medium to high plasticity and low hydraulic conductivity in the till unit.

The geologic rock stratigraphic unit underlying the site is a Paleozoic Middle Silurian (Niagoaran) dolomite.

Four regional aquifers are present within the Chicago area. The first two are shallow aquifer systems that provide groundwater for domestic and municipal use. The first of these is the sand and gravel located within glacial deposits. These deposits of sand and gravel may occur as shallow, unconfined surficial aquifers or as confined aquifers buried beneath clay till. Groundwater flow within the clay till is expected to be downward toward underlying aquifers.

The upper 50 feet of bedrock forms the second shallow aquifer system in northeastern Illinois. Prior to glaciation, the bedrock was at or near the ground surface and was subject to chemical and physical weathering processes. As a result, the shallow weathered bedrock is generally more permeable and water-bearing than deeper sections of bedrock. The Silurian Dolomite, which is the upper bedrock in much of northeastern Illinois, has historically been used as a water source for municipalities. However, most municipalities in northeastern Illinois, including Chicago, now obtain water from Lake Michigan.

The Silurian Dolomite is underlain by the Maquoketa Shale which is approximately 170 feet thick and is a regional aquitard. An aquitard may be defined as any saturated geologic formation not capable

of yielding useable quantities of groundwater to a well. Sandstone and dolomite formations beneath the Maquoketa Shale form two deep regional aquifer systems capable of yielding large groundwater supplies.

Based on Amec Foster Wheeler's review of topographic maps and observations of the site vicinity, the groundwater flow direction was inferred to be generally to the east toward Lake Michigan. It should be noted that actual groundwater hydraulic gradient and flow direction(s) do not always follow topography, especially in areas influenced by heavy pumping from municipal or agricultural wells, irrigation and/or recharge projects. Additional regional research and/or site-specific groundwater studies would be required to reliably establish groundwater flow direction in the vicinity of the site.

2.2.3 Surface Water Bodies

The closest apparent surface water bodies are small ponds in Garfield Park about 1 mile southeast of the site. Lake Michigan is about 6 miles to the east, the Chicago River is about 4.4 miles to the east and the Des Plaines River is about 5 miles west of the site.

2.2.4 Wetlands

A detailed wetland evaluation is beyond the scope of this investigation. Areas that may be wetlands or nearby surface water bodies were not observed on the site. The closest wetlands appear to be small areas near the ponds in Garfield Park, about 1 mile southeast of the site. National Wetland Inventory data was obtained by EDR from the US Fish and Wildlife Service and Illinois Wetland Inventory Data was obtained by EDR from the Illinois State Geological Survey.

2.2.5 Flood Maps

The property and surrounding properties are not within 100-year and 500-year flood zones as defined by the Federal Emergency Management Agency (FEMA) and obtained by EDR. The information includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

3.0 PROPERTY BACKGROUND/OPERATING HISTORY

3.1 INTERVIEWS

During the course of the June 2017 Phase I ESA activities, Amec Foster Wheeler interviewed two knowledgeable people to obtain information about the site, particularly regarding possible RECs in connection with the site. The information obtained from the interviews is presumed to have been provided in good faith, and to the full extent of the knowledge of the individual responding. Table 3

lists those people who were interviewed and those for whom an unsuccessful attempt to interview was made. An interview questionnaire was completed and is included in **Appendix G**.

As an update, Amec Foster Wheeler contacted both persons listed below by e-mail in November 2017 to inquire if they knew of any changes to the property or their historical knowledge of the property. Both indicated that no new information was available.

Table 3: Summary of Interviews

Name	Title	Affiliation	Interview Conducted
Matthew J. Grusecki	Senior Vice President Northern Builders, Inc.	Property Owner	Via conference call and e-mail
Ed Garske	Vice President Carlson Environmental, Inc.	Property owner's environmental consultant	Via conference call and e-mail

3.1.1 Interview with Property Owner

Interviews with Mr. Matt Grusecki of Northern Builders, Inc and his environmental consultant, Mr. Ed Garske of Carlson Environmental regarding site information and history were conducted in June 2017. As an update, Amec Foster Wheeler contacted both persons listed below by e-mail in November 2017 to inquire if they knew of any changes to the property or their historical knowledge of the property. Both indicated that no new information was available. Mr. Grusecki and Mr. Garske provided the following information about the site.

Mr. Grusecki has been involved with the site for about 19 years. Northern Builders is part of an entity called Chia LLC which owns the property. Mr. Garske has been their environmental consultant for the property for a number of years. They indicated that the property is vacant and was formerly a railyard. They indicated that two small structures may have formerly stood near the middle of the property when it was a railyard.

They spoke of previous investigations have occurred at the site. Amec Foster Wheeler indicated that we were aware of and had a report of a Phase II completed by Warzyn and a Phase I and Phase II completed by Carlson, as well as a geotechnical investigation report from Testing Service Corporation. They indicated that at least two Phase IIs were performed (one by Warzyn and another by Carlson Environmental) and there may have been another investigation by Carlson Environmental. Polynuclear aromatic hydrocarbons and metals were detected and some concentrations exceeded Illinois remediation objectives from the Tiered Approach to Corrective Action Objectives (35 IAC 742, referred to as TACO). The Phase I indicated that fifteen monitoring wells are present on the site. They were placed at the site when the site was going to be developed as a solid waste transfer station and are still there. The Phase I by Carlson identified

nearby properties with releases. They were going to check on additional reports (another Phase I and another Phase II) that they thought might exist, but that Amec Foster Wheeler did not have. A later e-mail indicated that they found no other reports. They also indicated that there was a site survey which may show utility lines and a storm sewer easement. They indicated that they were not aware of any fill material being brought to the site. They were aware of a potential transformer offsite to the west.

3.1.2 Attempted Interviews

No other interviews were attempted for this assessment.

3.2 AERIAL PHOTOGRAPHS

Aerial photographs are photographs taken from an aerial platform with sufficient resolution to allow identification of development and activities of areas encompassing the site. Amec Foster Wheeler reviewed available aerial photographs of the site and surrounding area dated 1938, 1951, 1962, 1972, 1978, 1980, 1988, 1994, 1999, 2005, 2007, 2009, 2010, 2011, and 2012. Table 4 summarizes the information obtained from review of the topographic maps. It should be noted that site features may not be discernable on the aerial photographs due to the scale or degree of clarity of a given photograph. Copies of the aerial photographs are included in **Appendix A**.

Table 4: Aerial Photograph Search Results

Date	Scale	Property	Adjoining Properties
1938, 1951	1"=500'	Site is western and northern portion of large rail yard. Trains and tracks visible over much of the site	East is more rail yard, south is apparently part of the yard with what appear to be many associated structures and tracks, west appears to be residential/commercial, northeast is residential and northwest is large industrial building on northeast corner of intersection
1962	1"=500'	Site is western and northern portion of large rail yard. Trains and tracks visible over much of the site	Northeast, northwest and south appear similar to previous. Kostner Ave is present to east, where the rail yard is no longer present and across Kostner, commercial buildings
1972	1"=500'	Site is large rail yard. Trains and tracks visible over much of the site	East, northeast and northwest appear similar to previous. To the west, Kilbourn Ave is present and a large facility is present on the southwest corner of Kilbourn and W Chicago. Other buildings which do not appear to be part of the rail yard are now present to the south
1978	1"=500'	Site is large rail yard. Some tracks appear to have been removed	Similar to previous, more non-rail yard development south and east. Ohio Street and other east-west streets off of Kilbourn south of site are visible

Date	Scale	Property	Adjoining Properties
1980, 1988	1"=500'	Site is mainly vacant – rail tracks run through middle of site	Similar to previous, tracks are present only through middle of portion of rail yard southeast of site
1994	1"=500'	Site is vacant	Similar to previous, southeast portion of rail yard now separated from site by extension of Kostner Ave to the south and a new facility (CTA) is east of the extension of Kostner
1999	1"=500'	Site is vacant	Similar to previous
2005, 2007, 2009, 2010, 2011	1"=500'	Site is vacant; bare patch with no vegetation visible on south side, appears to be due to runoff from adjacent parking lot	Similar to previous
2012	1"=500'	Site is vacant; bare patch no longer visible	Similar to previous

Amec Foster Wheeler's review of the aerial photographs has identified historical usage as a rail yard as a REC in connection with the site and the east adjacent CTA property.

3.3 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps of the site and surrounding area were reviewed from the years 1889, 1891, 1900, 1901, 1928/1929, 1953, 1963, 1972, 1978/1980, 1993, 1997/1998 and 2012. Table 5 summarizes the information obtained from review of the topographic maps. Copies of the topographic maps are included in **Appendix B**.

Table 5: Historical Topographic Map Search Results

Date	Scale	Property	Adjoining Properties
1889, 1891	1:62500	Vacant	Surrounding area is generally gridded with streets, except in site vicinity
1900, 1901	1:62500	Site covered with rail tracks	Immediate site vicinity covered in rail tracks and associated buildings, surrounding area gridded with streets, another rail yard is to the north
1928/1929, 1953, 1963	1:24000	Site covered with rail tracks	Immediate site vicinity covered in rail tracks and associated buildings, surrounding area gridded with streets, rail yard is to the north
1972, 1978/1980	1:24000	Site covered with rail tracks	Property west, south and north east of the site has little to no rail tracks, has buildings, area southeast still has tracks

Date	Scale	Property	Adjoining Properties
1993, 1997/1998	1:24000	Site vacant, 1-2 sets of tracks cross center of site northwest to southeast	Most railroad tracks in site and vicinity are gone Property west, south and north east of the site has buildings; southeast appears like site – vacant with 1-2 sets of tracks
2013	1:24000	Vacant	Surrounding property shown as vacant, gridded city streets away from site area

Amec Foster Wheeler's review of the historical topographic maps identified historical usage as a rail yard as a REC in connection with the site and the east adjacent CTA property.

3.4 FIRE INSURANCE MAPS

EDR provided Sanborn fire insurance maps for the years 1908, 1950, 1975, 1988, 1991, 1993, 2002 and 2004. Table 6 summarizes the information obtained from review of the Sanborn fire insurance maps. Copies of the Sanborn fire insurance maps are included in **Appendix C**.

Table 6: Sanborn Fire Insurance Map Search Results

Date	Scale	Property	Adjoining Properties
1908	1"=300'	Railroad tracks	North, beyond W Chicago Ave, is subdivided into lots with no structures visible; south is railyard with railcar repair shops, erecting shed, etc. West (separate map, also year 1896) railroad tracks, N 46 th Ave, subdivided, residential. East (separate map) is part of yard and full of rail tracks except northeast by W Chicago Ave has separate building
1950	1"=300'	Railroad tracks	North, beyond W Chicago Ave, is industrial: tool and die, metal stamping, scrap steel, pattern shop, steel spring factory and metal finishing; south is railyard with railcar repair shops, erecting shed, etc.; West (separate map) railroad tracks, N Kenton Ave, subdivided, residential/commercial. East (separate map) is part of yard and full of rail tracks except northeast, on same side of W Chicago Ave, is storage, a dairy and a garage

Date	Scale	Property	Adjoining Properties
1975 1988 1991 1993	1"=300'	Railroad tracks; small structure present in northwest corner	North, beyond W Chicago Ave, is industrial as before and some commercial; south developed with industrial buildings; West (separate map) is N Kilbourn Ave, railroad tracks and residential; Southwest is N Kilbourn Ave, then Chicago Northwest Incinerator East (separate map), on the west side of which is a filling station, is part of yard and full of rail tracks except northeast, on same side of W Chicago Ave, storage, a dairy and a garage have expanded south
2002 2004	1"=300'	Vacant	North more commercial, some parking lots, still some industrial; south developed with industrial buildings; West (separate map) is N Kilbourn Ave, railroad tracks and residential; Southwest is N Kilbourn Ave, then Chicago Northwest Incinerator; East (separate map) is part of yard and full of rail tracks except northeast, on same side of W Chicago Ave, storage, a dairy and a garage; south of the dairy is now CTA

Amec Foster Wheeler's review of the Sanborn fire insurance maps identified historical usage of the site and the east adjacent CTA property as a rail yard as a REC in connection with the site, and use of west adjacent property (across N Kilbourn Ave) as an incinerator as a REC for the site.

3.5 LOCAL STREET DIRECTORY

Amec Foster Wheeler obtained a City Directory Abstract from EDR dated June 15, 2017 for the site and surrounding properties. A complete list of the results is included in EDR's City Directory Abstract included in **Appendix D**. The site is listed in the EDR local street directory search for 2005 and 1999. The 2005 listing identifies the site as CTA, which is actually on the adjacent southeast property. No other information is provided.

3.6 USER PROVIDED INFORMATION

For the purposes of this assessment, the City of Chicago Department of Fleet and Facility Management is the user of this Phase I ESA report. In accordance with Section 6 of ASTM E 1527-13, the user of this Phase I ESA was informed that they were responsible for providing the following information to Amec Foster Wheeler's environmental professional for consideration during the assessment:

Reasonably ascertainable title or judicial records related to environmental liens and AULs for the site;

Actual knowledge of the user of any environmental liens or AULs;

Specialized knowledge or experience of the user with regard to the site and activities thereon that may be material to any potential RECs;

Commonly known (within the local community) or reasonably ascertainable information regarding past releases, conditions indicative of releases, or threatened releases of hazardous substances or petroleum;

Information as to whether the purchase price of the site is lower than the fair market value due to contamination; and

The reason why the user wants to have the Phase I ESA performed.

Amec Foster Wheeler provided the user with a questionnaire, and the type of information obtained from the questionnaires summarized in Table 7. The user questionnaire was completed and is included in **Appendix G**.

Table 7: Information Obtained from User Questionnaire

User-Provided Information¹	Was Information Provided to Amec Foster Wheeler? (Yes/No)	Was Amec Foster Wheeler Contracted to Procure the Information? (Yes/No)
Title Records (3.6.1)	Yes	Yes
Environmental Liens and Activity and Use Limitations (3.6.1)	Yes	Yes
Specialized Knowledge (3.6.2)	No	No
Commonly Known or Reasonable Ascertainable Information (3.6.2)	Yes	Yes
Valuation Reduction for Environmental Issues (3.6.3)	Yes	No
Reason for Performing Phase I ESA (1.1)	Yes	No
Other (3.6.2)	Previous Reports	No

1. Numbers in parentheses reflect the report section in which the information is discussed.

3.6.1 Environmental Liens or Activity and Use Limitations

The user is not aware of any environmental liens or AULs, such as engineering controls, land-use restrictions, or institutional controls, that are in place at the site and/or have been filed or recorded in a registry under federal, state, or local law. There is a restrictive covenant on the property which requires It requires financial payment if the site is used as a transfer station (see Appendix E).

The LienSearch™ Report provided by EDR (attached in Appendix E) included a search for title documents for the Site. Review of the EDR LienSearch™ Report (included in Appendix E) for the

site indicates that environmental cleanup liens are not present on the Site. The Lien Search™ Report also indicated no AULs were found for the site. The lien search indicated that the property was most recently (October 2000) transferred from Chicago Avenue Development LLC to BK Chicago Avenue, LLC & Chia LLC by special warranty deed. The lien search document and a copy of the deed are included as **Appendix E** of this report.

3.6.2 Specialized Knowledge

The user does not have specialized knowledge or experience related to the chemicals and processes used at the site or nearby properties.

The user had copies of prior environmental site assessment reports, documents, or correspondence concerning the site and its environmental conditions, that may be deemed pertinent to the assessment by the environmental professional. The following reports were provided for Amec Foster Wheeler review:

- Phase II ESA, Prepared by Warzyn Inc., dated August 1991 – this was a separate report, but was also in Appendix A of the Carlson Phase I ESA
- Preliminary Report of Soils Exploration, Prepared by Testing Service Corporation, April 29, 1998 - this was in Appendix A to the Carlson Phase I
- Phase I ESA, prepared by Carlson Environmental, dated May 11, 1998
- Limited Phase II, prepared by Carlson Environmental, dated October 17, 2007
- Property Screen Summary Report, prepared by 2FM, dated April 10, 2017

The Phase II ESA by Warzyn was performed for RAIL-IT Limited partnership and included what is described as the western half of the 40th Street Yard of the Chicago Northwestern Railroad (CNWR). It references throughout a prior report titled “Environmental Assessment Report”, by Huff and Huff, Inc. dated 1990. The Warzyn report indicates that the Huff and Huff report has information indicating that the rail yard was constructed in about 1896 on previously undeveloped and unfarmed land. There were structures and rail tracks on the land by 1935, but many of these structures were removed by 1936 and additional train tracks were added. From 1936 to 1985, the parcel was used for the storage and movement of trains and there was one small office building in the southeastern corner. Repairs, fuel storage and maintenance activities took place on another parcel south of the site. Most of the tracks were removed by 1985 and at the time of the Warzyn Phase I, two tracks crossed the site. Surrounding land was part of the rail yard until 1950 when it was sold for commercial development. According to the Warzyn report, there were two abandoned buildings in the northeast portion of the site and numerous piles of debris throughout the site,

composed mainly of construction and demolition debris, although industrial materials may also have been present.

The Warzyn investigation consisted of the installation of ten (10) soil borings and three (3) temporary wells in three (3) of the borings. Twenty (20) soil samples were collected and analyzed for volatile organic compounds (VOCs), polynuclear aromatic hydrocarbons (PNAs), Resource Conservation and Recovery Act (RCRA) metals (arsenic, barium, cadmium, chromium, lead, mercury, selenium and silver) and total cyanides. Total xylene was detected in two (2) samples from one (1) boring and trichlorofluoromethane was detected in samples from two (2) other borings. PNAs were widespread, but generally below 1 mg/kg concentration, although some locations were higher. Metals were detected but at concentrations considered to be background or naturally occurring. Cyanides were not detected. Groundwater flow in the shallow soils was thought to be to the north, but could not be determined based on the temporary wells. No VOCs were detected and low concentrations of PNAs, metals and cyanide (one sample) were detected in the water samples. The Warzyn report concluded that no significant concentrations of VOCs, PNAs, metals or cyanide were present in soil or groundwater at the site; although localized hot spots may exist.

The Carlson Phase I ESA, performed for Northern Builders, Inc., determined that natural drainage was in an easterly direction to the North Branch of the Chicago River, 4.4 miles east of the site. Two sets of train tracks were still present on the site. No structures were present on the site. Numerous piles of construction debris and railroad ties were noted on the site. No wetlands were observed on the site. Fifteen (15) monitoring wells were noted on the site. The Carlson report indicates that at one time, plans were to use the site as a solid waste transfer station and the wells were installed for required monitoring. The report recommended the proper disposal of the railroad ties on the property. The Carlson report notes that all of the analytical results for the Warzyn report are below TACO Tier 1 Remediation Objectives for Industrial/Commercial sites with Class I groundwater (applicable Illinois objectives). Based on their review, they indicate that the site has not been significantly impacted by its previous use as rail yard. No RECs are identified and the risk for impact from surrounding properties is identified as low.

The Testing Service Corporation report provides information on geotechnical testing performed at the site. Nineteen (19) soil borings were drilled to 20 to 24 feet below ground surface. According to the boring logs in the report, the soils consisted mainly of fill material at the surface to up to 20 feet below the surface, underlain by stiff grey and brown silty clay. The fill materials consisted mainly of sands, silty sands and/or clayey sands with cinders and cobbles. No odors or staining were noted. Groundwater was found at depths ranging from 3 to 23 feet below the ground surface.

The 2007 Phase II by Carlson was performed for Northern Builders. Nineteen (19) soil borings were completed and fill was encountered in borings at depths of 0 to 16 feet, below which was silty

clay. Moist soils were noted at 2 to 4 feet below surface, but groundwater was not encountered in any of the borings. Staining was noted in some soil borings. Twenty-four soil samples were analyzed. Analyses included VOCs, semivolatile organic compounds (SVOCs), priority pollutant metals (antimony, arsenic, beryllium, cadmium, chromium, copper, lead, mercury, nickel, selenium, silver, thallium, and zinc), pH, pesticides, polychlorinated biphenyls (PBCs) and chlorinated herbicides. Results were compared to TACO Tier 1 soil screening objectives (35 IAC 742).

No VOCs were detected at concentrations exceeding the TACO objectives; although VOCs were detected at some locations. PNAs and carbazole were detected at concentrations that exceeded the TACO Tier 1 screening objectives. Antimony, arsenic, chromium, lead and mercury were detected at concentrations above their TACO Tier 1 objectives. PCBs, pesticides and herbicides were not detected in the two (2) samples analyzed for these parameters. The report concluded that concentrations of five (5) PNAs, one (1) SVOC and five (5) metals were present at concentrations exceeding the most stringent TACO Tier 1 residential screening levels. However, these soils could be managed during construction and no active remediation would be required to address soils on the site.

2FM also provided a Property Screen Report and associated documentation for the site and nearby properties. This was a 436-page document which consisted of a review of records from various databases including City of Chicago Department of Public Health (inspection, complaint investigation and UST records), OSFM, Illinois EPA, and USEPA. The Property Screen concluded that seven USTs of unknown contents were associated with the site; however, a subsequent review of the Property Screen documentation determined that the seven USTs are associated with 4401 W. Chicago and not the site. In addition, the 550-gallon fuel oil UST associated with the site was described as installed in 1959 and containing fuel oil. While the record does list this UST as being at 4301 W. Chicago, it should be noted that the facility name is listed as the Chicago Transit Authority and the contents are actually listed as gasoline. As discussed above, an adjacent site at 4401 W Chicago Avenue had seven flammable product USTs installed in 1992. The document indicated that a 550-gallon heating oil UST was removed in 2004 from a nearby site at 4155 W Chicago Avenue. It also indicated the following for another nearby site (4201 W Chicago Avenue): one 20,000 heating oil UST and one 20,000 diesel UST removed in 1993; two 4,000-gallon gasoline USTs installed in 1947; one 8,000-gallon fuel oil UST installed in 1949; one 10,000-gallon gasoline UST inspected in 1965, fuel oil USTs were sandfilled in 1967; two 12,000 gallon USTs installed in 1979; one 6,000 gallon UST sandfilled in 1979; one 10,000 gallon UST and one 4,000 gallon UST gravel filled in 1979; and two 12,000-gallon gasoline USTs and one 5,000-gallon fuel oil UST removed in 1992. At 4457 W Chicago Avenue, a 1,000-gallon fuel oil UST was installed in 1958. Contaminated fill material was removed from 733 N Kilbourn Avenue in 1995. The document also includes a search of both the OSFM and Illinois EPA databases for the site and nearby properties. Installation and removal of USTs for nearby properties is documented.

3.6.3 Valuation Reduction for Environmental Issues

The user has indicated that the purchase price being paid for the site reasonably reflects the fair market value of the site, and has not been reduced due to contamination.

3.7 VAPOR MIGRATION/INTRUSION EVALUATION

Potential vapor contamination sources on the site or on nearby properties can represent vapor encroachment concerns through the indoor air exposure pathway. The exposure pathway is complete if soil gas has the potential to migrate from a nearby subsurface source into an occupied building foundation. As the site has no structures, the indoor air inhalation exposure pathway is currently incomplete. Also, no identified contaminants on the site would be a vapor intrusion threat. An UST was reported to previously be present at the site and low levels of chlorinated solvents were detected in soils during a previous investigation and a recently completed Phase II ESA. Buildings may in the future be constructed on the site, so further evaluation is recommended.

Nearby properties have also had releases which may affect the site. There are 15 properties within 1/3 mile of the site which have had past releases and one property (CTA, adjacent) within 1/10 mile of the site. CTA had a LUST release of gasoline, and a NFR letter was received on April 27, 2000. However, Chicago building department records indicate that 7 USTs containing flammable material were installed on the CTA property in 1992 and there is no indication that they were removed.

4.0 REGULATORY REVIEW

This section presents the results from the environmental records review. Section 5.1 discusses results from the search of standard environmental databases. These records were reviewed to assess potential environmental concerns for the site, and, when applicable, surrounding properties. Section 5.2 discusses results from additional environmental record sources that were reviewed for this Phase I ESA.

4.1 REGULATORY DATABASE SEARCH AND SIGNIFICANT FINDINGS

Amec Foster Wheeler reviewed the results of a search of standard environmental records sources as required by ASTM Standard E 1527-13. EDR provided results of a regulatory agency database search in their report dated November 15, 2017. Amec Foster Wheeler reviewed that report for information pertaining to storage and/or reported releases of hazardous substances and petroleum products on the site and on surrounding properties that may affect the site. The EDR search report is included in **Appendix F**.

4.1.1 EDR Identified Sites

Amec Foster Wheeler reviewed the EDR report for databases that indicate potential releases or environmental impacts to soil, groundwater or soil vapor. Review of the federal, state and proprietary records summary provided by EDR of sites of potential environmental concern located within the respective ASTM standard search radii are summarized in the table below. Based on distances from the site, the types of listings and the assumed direction of groundwater flow, none of the properties listed is likely to have a negative impact on the site except for the properties described below the table.

Table 8. Environmental Database Search Results

EDR MAP ID	SITE NAME	SITE ADDRESS	DATABASES	RELATIVE ELEVATION	MAPPED DISTANCE FROM SITE (FT, MILES, DIRECTION)*	ID'ED AS REC	ELIMINATED DUE TO			COMMENT

- * Distances and direction from EDR search. Additional information provided below regarding actual proximity to site

The 4301 West Chicago entry is for City of Chicago permit and UST records. According to information from the City of Chicago Fire Department in response to Amec Foster Wheeler's request under FOIA during the June 2017 Phase I ESA, one UST was identified onsite: a 550-gallon heating oil tank installed in 1959. However, the installation permit on file with the City of Chicago Department of Public Health indicates that the Chicago Transit Authority was the owner having the tank installed. The Illinois Office of the State Fire Marshal does not identify USTs as present on the site. Since no further information is available, this would be an REC for the site.

Chicago Transit Authority, 4401 West Chicago, adjacent to the southeast, is listed in City of Chicago environmental records as having seven flammable USTs installed in 1992, as a generator of ignitable RCRA waste in 1993, and on the FINDs, SPILLS and ECHO databases, probably as a result of its generator and LUST status. A LUST incident 923534 is recorded in 1992 for a gasoline release. The incident was closed with an NFR letter on April 27, 2000. Since no information is available indicating the 1992 installed tanks were removed, this would be an REC for the site.

Florence Macaroni, 4346 West Chicago, located to the north and northeast of the site, across Chicago Avenue, is listed as a UST and LUST site. One 1,000-gallon heating oil tank is listed as exempt. A LUST incident was reported in 1998 (LUST incident 982757). Based on its distance and cross to downgradient location, this would not be an REC.

City of Chicago, 700 N Kilbourn Ave, upgradient and west of the site, is listed as a LUST site. One tank was removed in 1993 and a NFR letter was received on 5/15/1995. Based on its current regulatory status, this would not be an REC.

City of Chicago, 715 N Kilbourn Ave, upgradient and adjacent west of the site, is listed as a LUST site. The initial incident report for #940242 lists 715 N. Kilbourn Avenue and then subsequent documentation on the Illinois EPA website for this incident changed to 750 N. Kilbourn Avenue. Amec Foster Wheeler believes the address was mis-identified in the original report and subsequently corrected. Although an incident was reported, a subsequent Illinois EPA letter indicates the site is a non-LUST site, which could indicate there was no confirmed release, or that the incident was from a non-regulated tank. Since it is adjacent, upgradient and no sampling was performed, this would be an REC for the site.

US Art, 4400 West Ohio Street, adjacent to the south, is listed as a former large quantity generator of F-code solvents, ignitable and listed wastes. It appears to be at the same location as American Envelope discussed below and the generator listing is for American Envelope. It has violations

which were resolved. Based on its current regulatory status (see below) and cross gradient position with regard to the site, this would not be an REC.

American Envelope, 4440 West Ohio Street, adjacent to the south, is listed as a Site Remediation Program (SRP) site, that is closed with a Comprehensive NFR dated 12/21/2010. There are restrictions indicating that the site is restricted to industrial/commercial use, a construction worker caution and engineered barriers of asphalt and concrete. However, there is no groundwater use restriction on the property. Based on its regulatory status and cross gradient position with regard to the site, this would not be an REC.

PPG Industries Inc, 4350 W Ohio St, is listed as a former large quantity generator of ignitable and U-Listed waste, and on the FINDs and ECHO databases, and is adjacent to the south. No violations were noted. Based on its regulatory status and cross gradient position with regard to the site, this would not be an REC.

RAIL IT Property, 733 N Kilbourn Avenue, west and upgradient of the site, is listed as having a 2000-gallon heating oil UST, which according to the OSFM database was removed in May 1995. It is unclear if this is the site or adjacent, as Rail IT formerly owned the 4301 W Chicago property and the street number identified in the EDR report could potentially put it near the southeast corner of Chicago and Kilbourn Avenues, which would be the site. Since it is adjacent, upgradient and no sampling was performed, this would be an REC for the site.

Colovos Co, 4444 W Ohio St, is listed as a SEMS-ARCHIVE, CORRACTS RCRA-SQG and LQG, LUST site and SRP site. It was evaluated under the National Priority List (NPL), archived and deferred to RCRA. As a CORRACT site, it was assigned a low corrective action priority. The LUST listing is for a fuel oil tank removed in 1992 and a NFR letter was received in June 1993. It was entered into the SRP in 1994 and a focused NFR letter was received on 7/3/1996. There are restrictions indicating that the site is restricted to industrial/commercial use, a construction worker caution and an engineered barrier of concrete. There is no groundwater use restriction on the property. Based on its regulatory status and cross gradient position with regard to the site, this would not be an REC.

Department of Streets & Sanitation, Northwest Sorting Center, 750 N Kilbourn Ave, west of the site, is listed as a UST site, a RCRASQG and on the ICIS (air), FINDS, ECHO, NY MANIFEST (PCB disposal) databases. It operates as a City of Chicago waste sorting and transfer facility, and is a SQG of ignitable waste. Six petroleum product tanks were removed in 1994. Since it is adjacent, upgradient and no sampling was performed, this would be an REC for the site.

4.1.2 Orphan sites List

EDR also provides a second category of sites, referred to as the “orphan site list,” which includes sites without adequate location information to be mapped precisely in the EDR system. No unmappable sites were identified in the EDR report.

4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

Additional environmental record sources were reviewed to enhance and supplement the standard environmental record sources. This section provides information obtained based on review of information obtained from local departments to assist in ascertaining potential environmental risks associated with the site.

4.2.1 City of Chicago

Fire Department

The site is located in the jurisdiction of the City of Chicago. On June 19, 2017, a Freedom of Information Act (FOIA) request was submitted to the department's FOIA coordinator requesting any files available for the site. A response was received on June 26, 2017. Documentation was provided for installation of a 550-gallon gasoline UST by 'Chicago NW Rlway' in January 1959 and the removal of a 550-gallon gasoline UST on June 1, 1965.

On November 19, 2017, a Freedom of Information Act (FOIA) request was submitted to the department's FOIA coordinator requesting any files available for the site. At the time of this report, no response has been received. If environmental concerns are identified based on our request by the City of Chicago Fire Department, an addendum to this report will be prepared.

Department of Public Health

On June 19, 2017, a FOIA request was submitted to the Chicago Department of Public Health (CDPH) FOIA coordinator requesting any available information that may be on file. On 6/21/2017, an email was received referring Amec Foster Wheeler to an online database. The database was queried and provided the same information as the EDR report

On November 19, 2017, a FOIA request was submitted to the Chicago Department of Public Health (CDPH) FOIA coordinator requesting any available information that may be on file. On November 21, 2017, an email was received referring Amec Foster Wheeler to an online database. The database was queried and provided the same information as the EDR report.

Department of Buildings

On June 19, 2017, a FOIA request was submitted to the Chicago Department of Buildings FOIA coordinator requesting any available information that may be on file. At the time of the original Phase I report, no response had been received.

On November 19, 2017, a FOIA request was submitted to the Chicago Department of Buildings FOIA coordinator requesting any available information that may be on file. At the time of this report, no response has been received. If environmental concerns are identified based on our request by the City of Chicago Department of Buildings, an addendum to this report will be prepared.

4.2.2 Illinois Environmental Protection Agency

On June 19, 2017, a FOIA request was submitted to the Illinois Environmental Protection Agency (Illinois EPA) FOIA coordinator requesting any available information that may be on file. On June 21, 2017, the Illinois EPA indicated that no information was located for the site.

On November 19, 2017, a FOIA request was submitted to the Illinois Environmental Protection Agency (Illinois EPA) FOIA coordinator requesting any available information that may be on file. On November 20, 2017, an email was received from the Illinois EPA indicating that the Illinois EPA had no information on file for the site.

4.2.3 United State Environmental Protection Agency

On June 25, 2017, a FOIA request was submitted to the United States Environmental Protection Agency (USEPA) requesting any available information that may be on file. At the time of the original Phase I report, no response had been received.

On November 19, 2017, a FOIA request was submitted to the United States Environmental Protection Agency (USEPA) requesting any available information that may be on file. On November 22, 2017, an email was received from the USEPA indicating that the USEPA had no information on file for the site.

4.2.4 Illinois Office of the State Fire Marshal

On June 19, 2017, a FOIA request (request no. 21399) was submitted to the Illinois Office of the State Fire Marshal FOIA coordinator requesting any available information that may be on file. At the time of the original Phase I report, no response had been received.

On November 19, 2017, a FOIA request was submitted to the Illinois Office of the State Fire Marshal FOIA coordinator requesting any available information that may be on file. On November 21, 2017, an email was received from the Office of the State Fire Marshal indicating that the Illinois Office of the State Fire Marshal had no information on file for the site.

5.0 PROPERTY INSPECTION

Mr. Salvatore Consalvi of Yung Environmental, Inc. completed the site reconnaissance on November 15, 2017, observing the general site conditions on the site. Mr. Consalvi was unaccompanied during the site reconnaissance. This section presents the findings of the site reconnaissance. These observations pertain to the general conditions of the physical land, including location and presence of ponded water, wetlands, stained and stressed vegetation, monitoring wells, wastewater, and solid or liquid waste. Due to the presence of vegetation, visibility of ground features was restricted.

5.1 SITE RECONNAISSANCE

On the day of the site reconnaissance, the weather conditions were cloudy and very cold. It was possible to walk the entire site. Photographs were taken of notable site features and are included in **Appendix I**.

The exterior of the site was visually and/or physically observed from the periphery, including adjacent public thoroughfares, and then systematically traversed to view the site. Observations of the site were in places obstructed by vegetation.

At the time of the site reconnaissance, the site was used as a vacant lot. The site is located on the southeast corner of the intersection of North Kilbourn Avenue and West Chicago Avenue. No structures are currently present on the site. No hazardous substance or petroleum products were observed.

Unpaved pathways with no apparent outlet randomly throughout the site that may have been used as an avenue for dumping of hazardous materials or petroleum products were observed during site reconnaissance.

5.1.1 Hazardous Substances and Petroleum Products Storage Containers

No containers identified as containing hazardous substances or petroleum products were observed on the site during the site reconnaissance.

5.1.2 Aboveground Storage Tanks/Underground Storage Tanks

No ASTs and associated dispenser and piping were observed on the site. No USTs or associated dispensers and piping were observed on the site.

5.1.3 Buildings and Structures

No buildings or structures were present on the site. Building debris indicating the possible past presence of a structure was noted in the northwest corner of the site.

5.1.4 Odors/Staining

No unusual odors or staining were noted at the site on the day of the site reconnaissance.

5.1.5 Drums/Unidentified Substance Containers

No drums were observed on the site during the site reconnaissance. No unidentified containers containing unidentified substances suspected of being hazardous substances or petroleum products were observed on the site during the site reconnaissance.

5.1.6 Debris

Several areas with debris were noted during the site reconnaissance. The building debris in the northwest corner noted above, a pile of stone in the northwest corner near Chicago Avenue, mounded soil near the north central, north west and north-east corner of the site, a clay pipe pile near the northeast corner, piled railroad ties in two locations on the southern portion of the site, and an abandoned rail spur near the southern boundary of the site.

5.1.7 Asbestos Containing Materials

No potential asbestos containing materials were noted on the site during the site reconnaissance.

5.1.8 Transformers

No transformers were noted on the site during the site reconnaissance. No electrical or hydraulic equipment known to contain PCBs or likely to contain PCBs was visually observed

5.1.9 Stressed Vegetation

No stressed vegetation was observed on the site during the site reconnaissance

5.1.10 Other Notable Features

Standing surface water was not observed on the site during the site reconnaissance. Pools, catchment structures, or sumps containing liquids or oily sheen likely to be hazardous substances or petroleum products were not observed on the site during the site reconnaissance.

Areas that have been filled or graded suggesting trash, construction debris, demolition debris, or other solid waste disposal were observed on the site during the site reconnaissance. A large long

mound of soil is present along the north and west portions of the site. Stacked railroad ties, a pile of clay pipe, mounded stone and an abandoned rail spur are present on the site.

A few monitoring wells were observed on the site during the site reconnaissance. Previous interviews with the site owner and his environmental consultant and review of a previous Phase I indicated that 15 monitoring wells were placed on the site. The wells were designed to monitor the site when its development as a solid waste transfer station was planned.

5.2 ADJACENT PROPERTIES RECONNAISSANCE

5.2.1 Hazardous Substances and Petroleum Products Storage Containers

No containers identified as containing hazardous substances or petroleum products were observed on adjacent sites during the site reconnaissance.

5.2.2 Aboveground Storage Tanks/Underground Storage Tanks

No ASTs were observed on adjacent sites. No UST- associated dispensers and piping were observed on adjacent sites.

5.2.3 Buildings and Structures

Buildings were present on adjacent sites.

5.2.4 Odors/Staining

No unusual odors or staining were noted at adjacent sites on the day of the site reconnaissance.

5.2.5 Drums/Unidentified Substance Containers

No drums were observed on adjacent sites during the site reconnaissance. No unidentified containers suspected of being hazardous substances or petroleum products were observed on adjacent sites during the site reconnaissance.

5.2.6 Debris

No debris was observed on adjacent sites during the site reconnaissance.

5.2.7 Transformers

No transformers were noted on adjacent sites during the site reconnaissance.

5.2.8 Stressed Vegetation

No stressed vegetation was observed on adjacent sites during the site reconnaissance.

5.2.9 Other Notable Features

No other notable features were observed on adjacent sites during the site reconnaissance.

6.0 CONCLUSIONS AND RECOMMENDATIONS

Amec Foster Wheeler was retained by the City of Chicago Department of Fleet and Facility Management (2FM) to conduct a Phase I ESA for the site located at 4301 West Chicago Avenue in Chicago, Cook County, Illinois in general accordance with the scope and limitations of ASTM International E 1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process." Amec Foster Wheeler issued the Draft Phase I ESA on June 26, 2017. Acquisition is expected to occur in January 2018. Components of the Phase I ESA which are required to be completed within 180 days of the expected date of purchase have been updated by our subcontractor, Yung Environmental, Inc. in this final Phase I ESA report.

Amec Foster Wheeler prepared this Phase I ESA in accordance with a proposal dated May 18, 2017 as updated on September 26, 2017.

This Phase I ESA is intended to satisfy one of the requirements to permit 2FM to qualify for the innocent landowner, adjoining property owner, or bona fide prospective purchaser limitations on liability under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (landowner liability protections). This Phase I ESA conforms to standards for "*all appropriate inquiries*" into the previous ownership and uses of the site as specified by the US Environmental Protection Agency (EPA) in 40 CFR Part 312, and in accordance with good commercial or customary practice.

Site History

Based on a review of reasonably ascertainable records, the site was vacant prior to its first developed usage. The site was developed as a rail yard by 1900 according to historic topographic maps. Previous environmental reports for the site indicate that the rail yard was constructed in 1896 by the Chicago and Northwestern Transportation Company on previously undeveloped land. By 1978-1980, most of the rail yard tracks were gone, and by at most 2002, the parcel was totally vacant.

Site Reconnaissance

At the time of Yung Environmental, Inc.'s site reconnaissance on November 15, 2017, the site was observed to be vacant. Amec Foster Wheeler did not observe evidence of aboveground storage tanks (ASTs), underground storage tanks (USTs), odors, pools of liquid, drums, containers storing potentially hazardous substances or petroleum products, stains or corrosion, pits, ponds, or

lagoons. Significant amounts of debris and mounded soil were present and a small demolished building structure was noted in the northeast.

Environmental Records

Review of the federal, state, and tribal (if appropriate) records, including a proprietary records summary provided by Environmental Data Resources, Inc (EDR), a third-party provider of environmental and land use records, indicates that properties of environmental concern are located within the respective ASTM standard search distances for each category. Amec Foster Wheeler has screened the identified properties for significance with respect to their potential impact on the site based on reasonably ascertainable information obtained from the records review, site reconnaissance, and interviews. Based on distances from the site boundary, the types of listings, and the assumed direction of groundwater flow, none of the properties listed is likely to have a negative impact on the site except those listed in Table 10 below.

Conclusions

No significant data gaps were identified that affected Amec Foster Wheeler's ability to identify RECs for the site, except overgrown vegetation which prevented viewing all of the ground surface.

Amec Foster Wheeler has performed this Phase I ESA in conformance with the scope and limitations of ASTM Standard E 1527-13. This assessment has revealed no evidence of RECs in connection with the site, except for the following:

Table 9: On-Site RECs

PIN#	Address	Acreage	Current/ Historic Land	RECs	COCs	Pathways
16-10-200-061-0000	4301 W Chicago Ave	30.4	Vacant/ Former Railyard	USTs	BTEX, Lead, PNAs	Groundwater, Soil Ingestion, Soil Inhalation, Vapor Intrusion
				Fill, Debris	PNAs, Metals	
				Rail Ties	Arsenic, Cresols	
				Previous Contaminants	PNAs, Metals	

Off-site sources of contamination that have the potential to migrate onto the site have been identified as a REC(s), as follows:

Table 10: Off-Site RECs

Address	Distance	Current/ Historic Land Use	RECs	COCs	Pathways
CTA 4401 West Chicago Ave	Adjacent North EDR: 477 ft North	Bus Garage/ Rail yard	USTs	BTEX, Lead, PNAs	Groundwater Ingestion Inhalation, Vapor Intrusion
			Rail yard	Arsenic, Cresols	
			Fill	PNAs, Metals	
RAIL IT Property 733 N Kilbourn Ave	AdjacentWest or Property EDR: 910 ft West	Vacant/ Rail yard	UST	BTEX, PNAs	Groundwater Ingestion Inhalation Vapor Intrusion
Department of Streets and Sanitation 750 N. Kilbourn Ave	Adjacent West EDR: 1044 ft West	Transfer Station and Incinerator/ Rail yard	USTs	BTEX, Lead	Groundwater Ingestion Inhalation Vapor Intrusion
			Air Particulate from Former Incinerator	Metals, PNAs	
City of Chicago 715 N. Kilbourn Ave (750 N. Kilbourn Ave.)	Adjacent West EDR: 800 ft West	Vacant/ Rail yard	UST with Release	BTEX, PNAs	Groundwater Ingestion Inhalation Vapor Intrusion

ft= feet

Based on the results and conclusions of the Phase I ESA, Amec Foster Wheeler recommends further evaluation of soil and/or groundwater quality beneath the site.

7.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in Title 40 of the Code of Federal Regulations (CFR), Part 312. We have the specific qualifications based on education, training, and experience (see **Appendix K**) to assess a site of the nature, history, and setting of the subject site. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

We appreciate the opportunity to be of service to 2FM on this project. If you have any questions or comments regarding this report, please contact the undersigned at 773-693-6030.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by AMEC Environment & Infrastructure, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:**Coordinates:**

P.O.#	3205171606	Latitude:	41.89386 41° 53' 38" North
Project:	City of Chicago 2FM	Longitude:	-87.735983 -87° 44' 10" West
		UTM Zone:	Zone 16 North
		UTM X Meters:	438946.27
		UTM Y Meters:	4638253.58
		Elevation:	610.00' above sea level

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AMEC Environment & Infrastructure, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AMEC Environment & Infrastructure, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1923 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 147 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

PLAT ACT AFFIDAVIT

STATE OF ILLINOIS)
)
 COUNTY OF COOK) SS.

Chicago Avenue Development, L.L.C., an Illinois limited liability company, being duly sworn on oath, states that its business address is 9700 West Bryn Mawr Avenue, Rosemont, Illinois and that the attached Deed is not in violation of 765 ILCS 205/1 for one of the following reasons:

A. Said Act is not applicable as the Grantor owns no adjoining property to the premises described in said deed;

-OR-

NOT APPLICABLE

B. The conveyance falls in one of the following exemptions as shown by the Act which became effective July 17, 1959:

1. The division or subdivision of the land into parcels or tracts of five acres or more in size which does not involve any new streets or easements of access.
2. The divisions of lots or blocks of less than one acre in any recorded subdivision which does not involve any new streets or easements of access.
3. The sale or exchange of parcels of land between owners of adjoining and contiguous land.
4. The conveyance of parcels of land or interests therein for use as right of way for railroads or other public utility facilities, which does not involve any new streets or easement of access.
5. The conveyance of land owned by a railroad or other public utility which does not involve any new streets or easements of access.
6. The conveyance of land for highway or other public purposes or grants or conveyance relating to the dedication of land for public use or instruments relating to the vacation of land impressed with a public use.
7. Conveyances made to correct descriptions in prior conveyance.

8. The sale or exchange of parcels or tracts of land existing on the date of the amendatory Act into no more than two parts and not involving any new streets or easements of access.

CIRCLE NUMBER ABOVE WHICH IS APPLICABLE TO ATTACHED DEED.

Affiant further states that he/she makes this affidavit for the purpose of inducing the Recorder of Cook County, Illinois, to accept the attached Deed for recording.

AGREEMENT OF RESTRICTIVE COVENANT

THIS AGREEMENT OF RESTRICTIVE COVENANT ("Restrictive Covenant") made ^{as of} this
15th day of September, 1998, by CHICAGO AVENUE DEVELOPMENT L.L.C., an
Illinois limited liability company (together with its Successors, an "Owner") in favor of KILBOURN
LIMITED PARTNERSHIP, an Illinois limited partnership ("Kilbourn").

1st AMERICAN TITLE order # CC123592 J.L. 24
385 82

RECITALS

A. Owner is acquiring as of the date hereof fee simple title to that certain real estate located in the City of Chicago, County of Cook, State of Illinois, and legally described in Exhibit A attached hereto and made a part hereof (the "Property").

B. To induce Kilbourn to terminate the Memorandum of Purchase Agreement and Declaration of Covenants dated as of April 8, 1992 and recorded in the office of the Cook County of Deeds as Document No. 92262005 and the Purchase Agreement and Declaration of Covenants referred to therein, and in consideration therefor, Owner has agreed to execute this agreement and submit the Property to the provisions of this Restrictive Covenant.

C. The covenants, conditions and restrictions hereunder are covenants running with the land and shall be binding upon Owner and its Successors and shall survive any sale, assignment, transfer or conveyance of the Property or any portion thereof or interest therein.

D. This Restrictive Covenant is executed and recorded for the purpose of giving notice of the existence thereof.

NOW THEREFORE, for Ten Dollars and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Owner, for itself and its Successors, in order to further the purposes herein expressed, hereby declares and agrees that the Property at all times is and shall be held, sold, assigned, transferred, conveyed, leased and occupied subject to the covenants, conditions and restrictions set forth herein.

1. ROYALTY PAYMENTS. In the event that the Property or any part thereof is used as a "recycling facility" or a "transfer station", as such terms are defined below, for the purpose of commercial recycling and/or waste transfer activities (including both for-profit and not-for-profit), as opposed to recycling and/or temporary waste storage of materials of the Owner of the Property or any part thereof as part of its own operations, then the following shall be applicable:

a. Owner agrees to pay to Kilbourn, or to cause Operator to pay to Kilbourn, the royalty payments (the "Royalties") described below; provided, however that Owner shall not be liable under this Agreement for the payment of Royalties or reservation of capacity by an Operator who is leasing the Property or a part thereof from Owner if (a) Owner has included a provision in the lease or other document giving such Operator possessory rights with respect to the Property (a "lease") to the effect that the Property is subject to the provisions of this Agreement of Restrictive Covenant (which shall be incorporated therein by reference with accurate recording information), and which requires, if a "recycling facility" or "transfer station" (as such terms are defined herein) is operated by Operator on the Property, that the Operator pay royalty payments and reserve capacity, and otherwise comply with the covenants, conditions and restrictions applicable to an Operator, as set forth herein, to and for the direct benefit of Kilbourn as the intended third-party creditor beneficiary of such provision of the lease, with the irrevocable right to enforce the

obligations of Operator to Kilbourn hereunder, and providing further that Kilbourn may pursue any remedies at law or in equity for default by Operator and that Operator shall be liable to Kilbourn for all damages that arise from or relate to default by Operator, as well as all costs and expenses, including attorneys' fees, incurred by Kilbourn in enforcing its remedies; and (b) in the event of default by Operator, Owner provides such information and assistance as are reasonably requested by Kilbourn in connection with such claim or suit. Royalties shall be paid quarterly to Kilbourn based upon Gross Revenues (as defined herein) and the volume of solid waste and recyclables delivered and accepted at the Facility during each calendar quarter. Each quarterly payment shall be equal to the sum of the following:

(1) 3% of the product of: (A) the Average Daily Tonnage (as defined below), or 2500 (whichever is less); (b) the Average Revenue Per Ton (as defined below); and (c) the number of Operating Days (as defined below) during such calendar quarter;

(2) 4% of the product of: (A) the Average Daily Tonnage in excess of 2500 up to a maximum of 1500 which is in excess of 2500; (B) the Average Revenue Per Ton; and (C) the number of Operating Days during such calendar quarter; and

(3) 5% of the product of: (A) the Average Daily Tonnage in excess of 4000; (B) the Average Revenue Per Ton; and (C) the number of Operating Days during such calendar quarter.

b. Definitions. The following terms used in this Restrictive Covenant shall be defined as follows:

"Affiliates" shall mean each and every corporation or other entity that is more than 50% owned or controlled, directly or indirectly, by Owner.

"Average Daily Tonnage" shall be the amount equal to (i) the total number of tons of solid waste and recyclables delivered and accepted at a Facility during a calendar quarter, divided by (ii) the number of Operating Days (as defined below) during such quarter.

"Average Revenue Per Ton" shall be the amount equal to (i) the Gross Revenues for a calendar quarter, divided by (ii) the total number of tons of solid waste and recyclables delivered to a Facility during such quarter.

"Gross Revenues" shall be defined as all revenues derived from the tipping, transfer, handling or processing of solid waste and recyclables on the Property or any portion thereof, less any fees, taxes, surcharges or host community fees imposed by any governmental entity or which are in the nature of a user or impact fee which is imposed upon the collection, transfer or disposal of solid waste or recyclables; provided, however, if and only if the revenues derived by Owner or any other person or entity which operates a Facility, including without limitation any tenant of Owner (an "Operator") and Affiliates, from the sale of recyclables processed or otherwise handled on the

Property or any portion thereof is greater than or equal to ten percent (10%) of the total revenues of the Facility, then upon such circumstance, all revenues derived by Owner and/or Operator and Affiliates from the sale of recyclables processed or otherwise handled on the Property or any portion thereof shall be included in the calculation of Gross Revenues. For purposes of determining Gross Revenues, fees for tipping, transfer, handling or processing of solid waste and/or recyclables delivered to the Facility by Affiliates shall be deemed to be no less than the Preferential Rate (as defined herein).

"Recycling facility" means a site or facility that accepts materials, including but not limited to paper, newsprint, cardboard, rags, glass, cans, and/or plastics, for "recycling" (as such term is defined below) for subsequent use in the secondary materials market.

"Recycling" means a method, technique, or process designed to remove any contaminant from waste so as to render such waste reusable, or any process by which materials that would otherwise be disposed of or discarded are collected, separated or processed and returned to the economic mainstream in the form of raw materials or products.

"Operating Day" shall mean any day during which a Facility is accepting solid waste and recyclables for disposal for at least eight (8) hours.

"Transfer station" means a site or facility that accepts waste for temporary storage or consolidation and further transfer to a waste disposal, treatment or storage facility. "Transfer station" includes a site where waste is transferred from (1) a rail carrier to a motor vehicle or water carrier; (2) a water carrier to a rail carrier or motor vehicle; (3) a motor vehicle to a rail carrier, water carrier or motor vehicle; (4) a rail carrier to a rail carrier, if the waste is removed from a rail car; or (5) a water carrier to a water carrier if the waste is removed from a vessel."

"Successors" shall mean, as to Owner, any person or entity that acquires title to the Property or any portion thereof or beneficial interest therein if title is held by a land trustee, by any means, including but not limited to, sale, assignment, transfer, conveyance or foreclosure, and, as to Kilbourn, its successors and/or assigns.

c. Royalties shall be payable to Kilbourn by Owner and/or Operator no later than the 20th day following March 31, June 30, September 30 and December 31 of each year. In the event that any Royalties are not paid when due, Kilbourn shall give written notice thereof to Owner, and to Operator if known to Kilbourn. If, after five (5) days after receipt of written notice of such non-payment, the Royalties are not received by Kilbourn, Owner and/or Operator shall be in default of its obligations hereunder and the amount not paid when due shall bear a late payment charge at a rate of 1½% per month or portion thereof from the date due until the date of payment or, at the option of Kilbourn, Kilbourn may receive a credit from Owner and/or Operator to be utilized by Designated Haulers (as defined herein), as determined by Kilbourn, which credit shall be equal to the amount of the Royalties due but not paid, and shall be applied toward the tipping fees charged to such Designated Haulers at the Facility by Owner and/or Operator. Kilbourn shall give written

notice to Owner and/or Operator of the identity of the Designated Haulers which are to utilize the credit. Owner and/or Operator shall keep complete and accurate books and records relating to Average Daily Tonnage, Average Revenue Per Ton, Gross Revenues and Operating Days. Owner and/or Operator shall deliver to Kilbourn no later than the 20th day after the end of each calendar quarter, a certificate executed by the operations manager of each Facility setting forth the amount of Gross Revenues, number of Operating Days, Average Daily Tonnage and Average Revenue Per Ton for the applicable calendar quarter. A representative of Kilbourn shall be permitted to have access to the applicable books and records of Owner and/or Operator to verify the Average Daily Tonnage, Average Revenue Per Ton, Gross Revenues and operating Days. Such access shall be limited to once every calendar quarter, upon five (5) days, prior written notice, during normal business hours and in the presence of a representative of Owner and/or Operator. In the event such verification reveals that the Royalties payable were understated, Owner and/or Operator promptly pay Kilbourn the amount of the understatement, together with a late payment charge of 9% of the understatement per annum, unless due to fraud or misrepresentation and in such case the late payment charge shall be 1½% per month or portion thereof. In the event such verification reveals that the Royalties payable for the applicable quarter were understated by more than 10%, Owner and/or Operator shall reimburse Kilbourn for the reasonable costs of such verification and any reasonable costs incurred by Kilbourn to verify the certification for the succeeding calendar quarter.

2. RESERVATION OF CAPACITY.

a. If the Property or any portion thereof is operated as a Facility and is allowed by its permits to accept up to 2,500 tons per day of solid waste and recyclables, Owner and/or Operator shall cause to be reserved for the haulers of solid waste and/or recyclables designated in writing by Kilbourn (the "Designated Haulers") the right to dispose of up to 1,000 tons of solid waste and/or recyclables per full Operating Day based upon the average daily volume of solid waste and/or recyclables delivered to the Facility during a calendar week (the "Reserve Capacity"). At least sixty (60) days prior to anticipated commencement of commercial operations at the Facility, Owner and/or Operator shall give Kilbourn written notice thereof, which notice shall also indicate the maximum Preferential Rate (as defined below) that will be charged to the Designated Haulers for the initial Commitment Period (as defined below). At least thirty (30) days prior to commencement of commercial operations at the Facility, Kilbourn shall give Owner and/or Operator written notification as to (i) the portion of the Reserve Capacity (the "Disposal Reservation") that Kilbourn, acting on behalf of the Designated Haulers, commits, in the aggregate, to utilize and (ii) a certification to Owner and/or Operator as to the identity of the Designated Haulers that will be entitled to use the Disposal Reservation and the identity of Designated Haulers who will be entitled to receive the Preferential Rate. The "Commitment Period" shall initially mean the period of time from the commencement of commercial operations of the Facility until the end of the then current calendar quarter, then each of the next succeeding eight (8) calendar quarters, and thereafter each and every six (6) month period.

b. Subject to the provisions of this Subsection 2(b), at least thirty (30) days prior to the beginning of each Commitment Period or within thirty (30) days after Kilbourn has been

notified of any change in the Preferential Rate, Kilbourn may increase (to the extent available) or decrease the Disposal Reservation, and provide to Owner and/or Operator a certificate as to the identity of the Designated Haulers that will be entitled to use the adjusted Disposal Reservation and the identity of the Designated Haulers which will be entitled to receive the Preferential Rate. Except as set forth below in Subsections 2(c), (d), (e) and (f), during any Commitment Period after Kilbourn has made its Disposal Reservation, Owner and/or Operator shall be entitled to enter into one or more binding agreements ("Disposal Agreements") with haulers under which Owner and/or Operator is bound to accept an aggregate amount of solid waste and/or recyclables that does not exceed the full capacity of the Facility, less the then current Disposal Reservation and the then current Buffer (as defined below).

c. Owner agrees that it will maintain or cause Operator to maintain a Buffer (the "Buffer") of the lesser of (i) 25% above the then current Disposal Reservation or (ii) 200 tons per Operating Day, not to exceed the Reserve Capacity. Thirty (30) days prior to each Commitment Period as set forth in (b) above, Kilbourn shall be permitted (but not obligated) to increase its Disposal Reservation up to the amount of its Disposal Reservation for the prior Commitment Period and the Buffer, but not to exceed the Reserve Capacity. Provided, however, except as set forth in Subsections 2(d), (e) and (f) hereof, to the extent that Kilbourn elects to increase the Disposal Reservation for the next succeeding Commitment Period up to the then current Disposal Reservation plus the Buffer and Owner and/or Operator is bound by the Disposal Agreements for the remaining capacity of the Facility over and above the then effective Disposal Reservation and Buffer, Owner shall not be obligated to provide Kilbourn with a Buffer for the next succeeding Commitment Period or Periods, provided further, however, that when additional capacity becomes available due to the termination of one or more Disposal Agreements as set forth in Subsection (d) below, such additional capacity shall automatically be available for a Buffer with respect to the then current Disposal Reservation (without the need for Kilbourn to exercise its option set forth in Subsection 2(d)) and the Buffer (as determined in accordance with the first sentence of this Subsection 2(c)) shall be increased to the extent of such additional capacity without reducing Kilbourn's right to increase the Disposal Reservation pursuant to Subsections 2(d) and 2(e) below.

d. Owner shall notify Kilbourn or cause Operator to notify Kilbourn of the termination of each Disposal Agreement within five (5) business days thereof and provide Kilbourn with the option to increase the Disposal Reservation, not to exceed the Reserve Capacity, by all or any portion of the amount of solid waste and/or recyclables that were subject to such Disposal Agreement. Kilbourn shall exercise this option on or before the close of business seven (7) business days after Kilbourn's receipt of Owner's notice of the termination of the applicable Disposal Agreement. This option shall not prohibit or restrict Kilbourn's ability to otherwise increase the Disposal Reservation in accordance with the terms of this Section 2 provided, however, that Kilbourn's election to exercise the option granted in this Subsection (d) shall reduce Owner's and/or Operator's obligation to provide additional capacity of 250 tons per Operating Day per year pursuant to Subsection (e) below to the extent of such additional capacity being made available upon the termination of a Disposal Agreement.

e. Notwithstanding any provision hereof to the contrary, in the event that during any calendar year less than 250 tons per Operating Day are offered to Kilbourn pursuant to Subsection 2(d), Owner and/or Operator shall make available to Kilbourn for increase of the Disposal Reservation by the end of the then current calendar year, up to 250 tons per Operating Day less the number of tons per Operating Day offered to Kilbourn pursuant to Subsection 2(d) during such calendar year; provided, however, Kilbourn shall not be entitled to increase the combined Disposal Reservation and Buffer to an amount that exceeds the Reserve Capacity. Owner and/or Operator shall give Kilbourn notice of such available capacity at least five (5) business days prior to such additional capacity becoming available and Kilbourn shall be permitted to increase its Disposal Reservation by notifying Owner and/or Operator thereof on or before the close of business seven (7) business days after Kilbourn's receipt of such notice of such available capacity.

f. Owner and/or Operator shall also notify Kilbourn of any increase in the permitted capacity of the Facility to accept, process or transfer solid waste and/or recyclables within five (5) business days of the receipt of a non-appealable permit therefore from all governmental entities having jurisdiction over the Facility and provide Kilbourn with the option to increase the Disposal Reservation in accordance with Subsection (j) of this Section. This option shall be exercisable by Kilbourn on or before the date which is seven (7) business days after Kilbourn receives Owner's notice of such increase in the permitted capacity of the Facility. This option shall not prohibit or restrict Kilbourn's ability to otherwise increase the Disposal Reservation in accordance with the terms of this Section 2. Owner and/or Operator shall notify Kilbourn of the filing of any application for a permit to increase the capacity within seven (7) business days of the date of such filing.

g. The disposal rate to be charged by Owner and/or Operator to the Designated Haulers during any Commitment Period for an amount of solid waste and recyclables up to 1000 tons per Operating Day (regardless of the Disposal Reservation), shall be no greater than the lowest rate (the "Preferential Rate") charged by Owner and/or Operator during such Commitment Period to any other customer (except as set forth below) at the Facility, taking into consideration the type of waste delivered (i.e., waste requiring special handling, recyclables, general municipal waste, etc.), but without regard to other factors, including, but not limited to, the volumes delivered and the term and type of commitment for disposal at the Facility. The Preferential Rate shall not include the rate or rates charged to customers by Owner and/or Operator pursuant to "put or pay" agreements unless Kilbourn or particular Designated Hauler shall execute a put or pay agreement with substantially similar material terms and conditions, except those pertaining to volume. Owner shall notify Kilbourn of any change in the Preferential Rate at least thirty (30) days prior to any such change. Notwithstanding anything herein to the contrary, Owner and/or Operator shall be permitted during the first two (2) years of commercial operations of the Facility to sell the greater of ten (10%) percent or 500 tons per Operating Day and thereafter ten (10%) percent of the permitted capacity of the Facility at disposal rates which do not effect the Preferential Rate provided that such rates shall be made available by Owner and/or Operator to Kilbourn, Designated Haulers and third parties, as well as the Owner and/or Operator and Affiliates, and Owner and/or Operator shall provide written notice

of the availability of such rates at least five (5) days prior to the acceptance of solid waste and/or recyclables at the Facility at such rate or rates.

h. To the extent the Designated Haulers (in the aggregate) fail to utilize at least 80% of the Disposal Reservation during the applicable Commitment Period while the Disposal Reservation is less than 1000 tons per Operating Day, Kilbourn shall be obligated to pay Owner and/or Operator 50% of the Preferential Rate for all volumes not utilized by Kilbourn up to 80% of the applicable Disposal Reservation and while the Disposal Reservation is 1000 tons or more per Operating Day, Kilbourn shall be obligated to pay Owner and/or Operator 75% of the applicable tipping fee (a portion of which may include the Preferential Rate if such volumes not utilized are less than 1000 tons per Operating Day) for the Disposal Reservation for all volumes not utilized by Kilbourn up to 80% of the applicable Disposal Reservation.

i. All solid waste delivered to the Facility hereunder shall be acceptable in accordance with all applicable federal, state and local laws and ordinances, Owner's and/or Operator's rules and regulations governing the operation of the Facility and Owner's and/or Operator's permits. Designated Haulers may include only those haulers designated by Kilbourn which are (i) those haulers listed on Exhibit B attached hereto, (ii) haulers which are more than 25% owned by an individual listed on Exhibit B attached hereto, either directly or by a trust for the exclusive benefit of such individual and/or members of his immediate family or (iii) any party that acquires at least 80% of all of the outstanding shares or all or substantially all of the assets of any such hauler (other than a publicly traded company). Owner and/or Operator shall have the right to review any documents, instruments or agreements pursuant to which a hauler shall be deemed a Designated Hauler hereunder if such Designated Hauler is a hauler other than those set forth in Exhibit B. Owner and/or Operator shall keep the information contained in such documents, instruments or agreements confidential if required by such Designated Hauler. Except as otherwise set forth in this Restrictive Covenant, no sale or brokering of disposal capacity is permitted by Kilbourn or a Designated Hauler. Failure of Kilbourn to make the payments set forth in Subsection (h) of this Section 2 or to abide by any of the above shall permit Owner and/or Operator to deny access to Kilbourn or the Designated Hauler(s) to the Facility during the period of such failure. The limited partners of Kilbourn shall be permitted to negotiate and enter into separate agreements with the Owner and/or Operator for disposal of waste at any Facility in addition to the Reserve Capacity to the extent there is additional capacity available at such Facility.

j. The Reserve Capacity shall be increased by 15 tons per Operating Day for every 25 tons per Operating Day increase in the daily permitted capacity of the Facility in excess of 2500 tons per day; provided, however, the Reserve Capacity shall never under any circumstances exceed 2500 tons per Operating Day if the daily permitted capacity of the Facility is in excess of 5000 tons per day; and provided, further however, that the Preferential Rate shall only apply with respect to a maximum of 1,000 tons per operating Day.

k. No party shall be liable for any failure to perform under this Section 2 due to circumstances beyond its reasonable control including, but not limited to, strikes or other labor

disputes, change in laws or regulations, compliance with government requirements, riots, civil disturbance or sabotage, fires, floods, explosions, accidents, weather or acts of God affecting the parties hereto. In the event of any of the circumstances listed in the preceding sentence, or if any federal, state or local court or authority takes any action which would close or otherwise restrict operations at the Facility, the Owner and/or Operator shall have the right to reduce the Reserve Capacity in proportion to the mandated reduction in the full capacity of the Facility.

1. Owner shall deliver to Kilbourn or cause Operator to deliver to Kilbourn no later than forty (40) days prior to the commencement of the next succeeding Commitment Period, a certificate executed by the operations manager of the Facility setting forth the maximum Preferential Rate for each type of waste and recyclables to be charged for the next succeeding Commitment Period, an estimate of the amount of the Reserve Capacity available to Kilbourn for the next Commitment Period and the rate or rates charged by Owner and/or Operator during the period following delivery of the prior certificate for the volumes not subject to the Preferential Rate as set forth in Subsection (g) of this Section 2. Owner and/or Operator shall keep complete and accurate records of all disposal rates charged by Owner and/or Operator. A representative of Kilbourn shall be permitted access to the books and records of Owner and/or Operator to verify the accuracy of such certification. Such access shall be limited to once every calendar quarter, upon five (5) days written notice, during normal business hours and the presence of a representative of Owner and/or Operator. In the event such verification reveals that any Designated Hauler was overcharged for the disposal of any waste, Owner and/or Operator shall promptly refund to such Designated Hauler the amount of the overcharge, together with interest thereon at the rate of 1½% per month or portion thereof from the date the overcharge was paid by such Designated Hauler to the date such refund is paid to such Designated Hauler. In the event such verification reveals that any Designated Hauler was overcharged by more than 10% for disposal of such waste and/or recyclables, Owner and/or Operator shall reimburse Kilbourn for the reasonable costs of such verification and any reasonable costs incurred by Kilbourn to verify the certification for the succeeding quarter.

m. This Subsection 2(m) is an illustration of the application of the guaranteed access provisions of this Section 2. This illustration is based upon the assumption that the capacity of the Facility is 2,500 tons/day and therefore the Reserve Capacity is 1,000 tons/day. Assuming the Disposal Reservation is 500 tons/day, the Buffer would be 125 tons/day (i.e., the lesser of (i) 25% of the 500 tons/day Disposal Reservation or (ii) 200 tons/day). Because the Disposal Reservation and Buffer total 625 tons/day, the Disposal Reservation may be increased to 625 tons/day at the beginning of the next Commitment Period. If, prior to the next Commitment Period, Owner and/or Operator enters into Disposal Agreements for 1,875 tons/day (i.e., 2,500 tons/day Facility capacity, less 625 tons/day Disposal Reservation and Buffer), Kilbourn would not be entitled to increase the Disposal Reservation prior to the end of the then current calendar year, unless additional capacity becomes available due to the termination of one or more Disposal Agreements.

Assuming Disposal Agreements for 300 tons/day terminate while the Disposal Reservation is 625 tons/day, Kilbourn would be entitled to increase the Disposal Reservation in two manners. First, Kilbourn would be entitled to a Buffer of 156 tons/day (i.e., the lesser of (i) 25% of the 625

tons/day Disposal Reservation or (ii) 200 tons/day) and could increase the Disposal Reservation to 781 tons/day as of the beginning of the next Commitment Period. Second, Kilbourn could exercise its option under Subsection 2(d) to immediately increase the 625 tons/day Disposal Reservation by 144 tons/day (i.e. the excess of the 300 tons/day available upon termination of the Disposal Agreements, over the 156 tons/day Buffer) to a total of 769 tons/day, and, in such case, Kilbourn would be entitled to a Buffer of 192 tons/day (i.e., the lesser of (i) 25% of the 769 tons/day Disposal Reservation or (ii) 200 tons/day). However, since the total additional capacity is only 300 tons/day and 156 is used as a Buffer and 144 tons/day is utilized by Kilbourn for Disposal Reservation as set forth above (i.e., 2,500 tons/day Facility capacity, less 1,575⁺ tons/day subject to Disposal Agreements, less the Disposal Reservation of 769 tons/day and the Buffer of 144 tons/day), the Buffer would be limited to 156 tons/day. Therefore, the 769 tons/day Disposal Reservation could be increased at the beginning of the next Commitment Period to 925 tons/day.

Based on the assumptions of the first paragraph of this Subsection 2(m) and assuming none of the Disposal Agreements that cover a total of 1,875 tons/day terminate during the calendar year, the Disposal Reservation will be limited to 625 tons/day. Pursuant to Subsection 2(e), by the end of the then current calendar year, Kilbourn would be entitled to increase the Disposal Reservation by up to an additional 250 tons/day to a total of 875 tons/day. However, if Disposal Agreements for 300 tons/day terminate during the then current calendar year and Kilbourn is entitled to increase the Disposal Reservation by 144 tons/day pursuant to Subsection 2(d), the number of tons that must be made available to Kilbourn by the end of the then current calendar year pursuant to Subsection 2(e) would be reduced to 106 tons/day (i.e., 250 tons/day minimum offer under Subsection 2(e), less 144 tons/day offer under Subsection 2(d)).

3. COVENANT RUNNING WITH THE LAND. The obligations under this Restrictive Covenant shall be perpetual and shall run with the land. The obligations under this Restrictive Covenant shall survive any sale, assignment, transfer or conveyance of the Property or any portion thereof or interest therein. However, notwithstanding the foregoing, nothing herein shall prohibit or otherwise prevent Owner from selling the Property or any part of the Property or any Facility constructed on the Property for any purpose or for any use. Thereafter, a prior Owner that has sold, assigned, transferred or conveyed all its right, title or interest in the Property or any part thereof to a Successor of which such prior Owner has no ownership or control, directly or indirectly, shall be relieved of its obligations under this Restrictive Covenant accruing from and after such sale, assignment, transfer or conveyance with respect to the Property or portion thereof sold, assigned, transferred or conveyed.

The provisions of this Restrictive Covenant with respect to the payment of Royalties and providing disposal rights as set forth in paragraphs 1 and 2, shall be suspended for any period during which no Facility is being operated on the Property, and if a Facility is being operated on a portion of the Property, this Restrictive Covenant shall be applicable only to such portion and shall remain suspended as to all other portions until such time, if any, as a Facility shall be operated on such portions. This Restrictive Covenant is a covenant that runs with the land and shall not be interpreted or construed in any manner as a restrictive use covenant.

4. NOTICES. Any Royalties, notices or other communications which any party hereto may be required or may desire to give hereunder shall be delivered personally or if mailed, postage prepaid, by United States registered or certified mail, return receipt requested, or by overnight express courier, addressed:

In the case of Kilbourn to: Kilbourn Limited Partnership
% David Bulthuis
Hillside Disposal Service

Chicago, IL 60661

or at such other addresses or to the attention of such other persons as may from time to time be designated by the party to be addressed by written notice to the other in the manner herein provided. Notices, demands and requests given in the manner aforesaid shall be deemed sufficiently served or given for all purposes hereunder when received or when delivery is refused or when the same are returned to sender for failure to be called for. In the event that Kilbourn changes its address and fails to inform Owner of a changed address, and Owner is unable, using reasonable efforts, to locate Kilbourn, or if Kilbourn is voluntarily or involuntarily dissolved or otherwise terminates its existence, then Owner shall send all Royalties, notices, and other communications hereunder c/o Jim DeWitt, 1201 Greenwood Avenue, Maywood, IL 60153 or c/o Kenneth Hoving, 363 Trinity Lane, Oak Brook, IL 60521 or c/o Butler, Rubin, Saltarelli & Boyd, Three First National Plaza, Suite 1800, Chicago, Illinois 60602.

5. CONTINUING COVENANTS. Each and all of the covenants, conditions and restrictions contained herein shall be deemed and construed to be continuing. No waiver of a breach of any of the covenants, conditions and restrictions contained herein shall be construed to be a waiver of

any other breach of the same or any other of such covenants, conditions or restrictions, nor shall failure to enforce any one of such covenants, conditions or restrictions be construed as waiver of any other such covenants, conditions or restrictions.

6. PRIORITY AND TITLE THROUGH FORECLOSURE. This Restrictive Covenant shall be executed and recorded before any mortgage or deed of trust that may be executed and recorded in connection with Owner's acquisition of the Property. Owner agrees that all liens, encumbrances or other security interests that exist or may exist against the Facility or the Property shall be subject and subordinate to the Restrictive Covenant. Owner further agrees that it will maintain sufficient assets and capital to make the payment of Royalties hereunder, to the extent due, during any period in which Gross Revenues are generated. Should any mortgage or deed of trust with respect to the Property be foreclosed, then the title acquired by such foreclosure, and the person or persons who thereupon and thereafter become the owner or owners of the conveyed premises, shall be subject to and bound by all the covenants, conditions and restrictions contained herein.

7. CHANGE IN CIRCUMSTANCES. No change in circumstances, including, but not limited to, changes in surrounding land uses or applicable zoning ordinances, shall have any effect whatsoever upon the applicability, validity or enforceability of the covenants, conditions and restrictions contained herein; provided, however, that any of the covenants, conditions and restrictions contained herein, at any time and in any manner, may and shall only be changed by and with the written mutual consent of Kilbourn or its Successors and the then Owner or Owners of the Property.

8. RULE AGAINST PERPETUITIES. If and to the extent that any of the covenants, conditions or restrictions would otherwise be unlawful or void for violation of (a) the rule against perpetuities, (b) the rule restricting restraints on alienation or (c) any other applicable statute or common law rule analogous thereto or otherwise imposing limitations upon the time during which such covenants, conditions or restrictions may be valid, then said covenant, condition or restriction shall continue and endure only until the expiration of twenty-one (21) years after the death of the last to survive of the class of persons consisting of all of the lawful descendants of George H. W. Bush, former President of the United States, living at the date of this Restrictive Covenant.

9. BINDING ON SUCCESSORS OF OWNER AND SUCCESSORS OF KILBOURN. Each Successor of Owner, by taking title to the Property or any portion thereof, and each purchaser under any contract for a deed of conveyance pursuant to which said grantee will take title, accepts such title subject to all covenants, conditions and restrictions, and the jurisdiction, rights and powers created or reserved by this Restrictive Covenant. All rights, benefits and privileges of every character hereby granted, created, reserved or declared, and all covenants, conditions and restrictions hereby imposed, shall be deemed and taken to be covenants running with the land, and shall bind any person having at any time any interest or estate in said land as if such person were the Owner, and shall inure to the benefit of Kilbourn and its Successors in like manner as though the provisions of this Restrictive Covenant were recited and stipulated at length in each and every deed of conveyance, or in any mortgage or trust deed or other evidence of obligation, and the obligations

described in this Restrictive Covenant shall be sufficient to bind the respective grantees, transferees, mortgagees, trustees, tenants, successors and assigns of the Property as fully and completely as though such rights were recited fully and set forth in their entirety in any such documents. This Restrictive Covenant shall inure to the benefit of, and be specifically enforceable by, Kilbourn and its Successors.

10. ENFORCEMENT. Kilbourn from time to time shall have the right to sue for and obtain a prohibitive or mandatory injunction, or other equitable relief, to prevent the breach of, or to enforce the observance of, the covenants, conditions and restrictions set forth in this Restrictive Covenant, in addition to the right to bring an action in law or in equity seeking any other appropriate remedy. In no event shall the failure of Kilbourn to enforce any of the covenants, conditions or restrictions herein provided due to a particular violation thereof be deemed to be a waiver of the right to do so respecting any such violation or any subsequent violation.

11. MODIFICATIONS. Any revocations, modifications, amendments or supplements of this Restrictive Covenant shall be effective only if expressed in a written instrument or instruments executed and acknowledged by the parties hereto and their respective successors and recorded in the Office of the Recorder of Deeds of Cook County, Illinois.

12. TRUSTS. In the event title to all or any portion of the Property is conveyed to a title holding trust, under the terms of which all powers of management, operation and control of all or any portion of the Property remain vested in the trust beneficiary or beneficiaries, then the beneficiaries thereunder from time to time shall be responsible for payment of all obligations, liens or indebtedness and for the performance of all covenants, conditions and restrictions chargeable or created under this Restrictive Covenant against the Property. No claim shall be made against any such title holding trustee personally for payment of any lien or obligation hereunder created, and the trustee shall not be obligated to sequester funds or trust property to apply, in whole or in part, against such lien or obligation. The amount of such lien or obligation shall continue to be a charge or lien upon the Property and the beneficiaries of such trust, notwithstanding any transfers of the beneficial interest of any such trust or any transfers of title to all or any portion of the Property.

13. SEVERABILITY. It is expressly agreed that, if any covenant, condition or restriction herein contained, or any portion thereof, is held or otherwise found to be invalid or void by any court of competent jurisdiction, such invalidity or voidness shall in no way affect this Restrictive Covenant or any other covenant, condition or restriction contained in this Restrictive Covenant, which shall remain in full force and effect.

14. CAPTIONS. The captions in this Restrictive Covenant are inserted for convenience of reference only and in no way define, describe or limit the scope or intent of this instrument or any of the provisions thereof.

98837295

15. GOOD FAITH AND FAIR DEALING. The parties hereto shall have a continuing obligation to exercise good faith and fair dealing in all matters relating to this Restrictive Covenant and the transactions contemplated hereby.

IN WITNESS WHEREOF Owner and Kilbourn have executed this Agreement of Restrictive Covenant as of the date above written.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/11/2017 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/13/2017 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2017 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/13/2017 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State and tribal leaking storage tank lists

IL LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Illinois Environmental Protection Agency's LUST Incident Report.

A review of the IL LUST list, as provided by EDR, and dated 07/24/2017 has revealed that there are 27 IL LUST sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2017 has revealed that there are 7 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Universal Waste Summary:

Waste type: Batteries
Accumulated waste on-site: Yes
Generated waste on-site: Yes

Waste type: Lamps
Accumulated waste on-site: Yes
Generated waste on-site: Yes

- . Waste code: F024
- . Waste name: PROCESS WASTES INCLUDING, BUT NOT LIMITED TO, DISTILLATION RESIDUES, HEAVY ENDS, TARS, AND REACTOR CLEAN-OUT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION. (THIS LISTING DOES NOT INCLUDE WASTEWATERS, WASTEWATER TREATMENT SLUDGE, SPENT CATALYSTS, AND WASTES LISTED IN SECTIONS 261.31. OR 261.32)

- . Waste code: F025
- . Waste name: CONDENSED LIGHT ENDS, SPENT FILTERS AND FILTER AIDS, AND SPENT DESICCANT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION.

- . Waste code: F032
- . Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT CURRENTLY USE, OR HAVE PREVIOUSLY USED, CHLOROPHENOLIC FORMULATIONS [EXCEPT POTENTIALLY CROSS-CONTAMINATED WASTES THAT HAVE HAD THE F032 WASTE CODE DELETED IN ACCORDANCE WITH SECTION 261.35 (I.E., THE NEWLY PROMULGATED EQUIPMENT CLEANING OR REPLACEMENT STANDARDS), AND WHERE THE GENERATOR DOES NOT RESUME OR INITIATE USE OF CHLOROPHENOLIC FORMULATIONS]. (THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.)

- . Waste code: F034
- . Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE CREOSOTE FORMULATIONS. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

- . Waste code: F035
- . Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE INORGANIC PRESERVATIVES CONTAINING ARSENIC OR CHROMIUM. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

- . Waste code: F037
- . Waste name: PETROLEUM REFINERY PRIMARY OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE GENERATED FROM THE GRAVITATIONAL SEPARATION OF OIL/WATER/SOLIDS DURING THE STORAGE OR TREATMENT OF PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH SLUDGES INCLUDE, BUT ARE NOT LIMITED TO, THOSE GENERATED IN OIL/WATER/SOLIDS SEPARATORS; TANKS AND IMPOUNDMENTS; DITCHES AND OTHER CONVEYANCES; SUMPS; AND STORM WATER UNITS RECEIVING DRY WEATHER FLOW. SLUDGES GENERATED IN STORM WATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE

- . Waste code: K112
- . Waste name: REACTION BY-PRODUCT WATER FROM THE DRYING COLUMN IN THE PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

- . Waste code: K113
- . Waste name: CONDENSED LIQUID LIGHT ENDS FROM PURIFICATION OF TOLUENEDIAMINE IN PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

- . Waste code: K114
- . Waste name: VICINALS FROM THE PURIFICATION OF TOLUENEDIAMINE IN PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

- . Waste code: K115
- . Waste name: HEAVY ENDS FROM PURIFICATION OF TOLUENEDIAMINE IN THE PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

- . Waste code: K116
- . Waste name: ORGANIC CONDENSATE FROM THE SOLVENT RECOVERY COLUMN IN THE PRODUCTION OF TOLUENE DIISOCYANATE VIA PHOSGENATION OF TOLUENEDIAMINE.

- . Waste code: K117
- . Waste name: WASTEWATER FROM THE REACTOR VENT GAS SCRUBBER IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

- . Waste code: K118
- . Waste name: SPENT ADSORBENT SOLIDS FROM PURIFICATION OF ETHYLENE DIBROMIDE IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

- . Waste code: K123
- . Waste name: PROCESS WASTEWATER (INCLUDING SUPERNATES, FILTRATES, AND WASHWATERS) FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

- . Waste code: K124
- . Waste name: REACTOR VENT SCRUBBER WATER FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

- . Waste code: K125
- . Waste name: FILTRATION, EVAPORATION, AND CENTRIFUGATION SOLIDS FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

- . Waste code: K126
- . Waste name: BAGHOUSE DUST AND FLOOR SWEEPINGS IN MILLING AND PACKAGING OPERATIONS FROM PRODUCTION OR FORMULATION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

- . Waste code: K131
- . Waste name: WASTEWATER FROM THE REACTOR AND SPENT SULFURIC ACID FROM THE ACID DRYER FROM THE PRODUCTION OF METHYL BROMIDE.

- . Waste code: K132
- . Waste name: SPENT ABSORBENT AND WASTEWATER SEPARATOR SOLIDS FROM THE PRODUCTION OF METHYL BROMIDE.

- . Waste code: K136
- . Waste name: STILL BOTTOMS FROM THE PURIFICATION OF ETHYLENE DIBROMIDE IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

- . Waste code: K141
- . Waste name: PROCESS RESIDUES FROM THE RECOVERY OF COAL TAR, INCLUDING, BUT NOT LIMITED TO, TAR COLLECTING SUMP RESIDUES FROM THE PRODUCTION OF COKE FROM COAL OR THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL. THIS LISTING DOES NOT INCLUDE K087 (DECANTER TANK SLUDGE FROM COKING OPERATIONS).

- . Waste code: K142
- . Waste name: TANK STORAGE RESIDUES FROM THE PRODUCTION OF COKE FROM COAL OR FROM THE RECOVERY OF COKE BY-PRODUCTS FROM COAL.

- . Waste code: K143
- . Waste name: PROCESS RESIDUES FROM THE RECOVERY OF LIGHT OIL, INCLUDING, BUT NOT LIMITED TO, THOSE GENERATED IN STILL, DECATERS, AND WASH OIL RECOVERY UNITS FROM THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

- . Waste code: K144
- . Waste name: WASTEWATER SUMP RESIDUES FROM LIGHT OIL REFINING, INCLUDING, BUT NOT LIMITED TO, INTERCEPTING OR CONTAMINATION SUMP SLUDGES FROM THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

- . Waste code: K145
- . Waste name: RESIDUES FROM NAPHTHALENE COLLECTION AND RECOVERY OPERATIONS FROM THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

- . Waste code: K147
- . Waste name: TAR STORAGE RESIDUES FROM COAL TAR REFINING.

- . Waste code: K148
- . Waste name: RESIDUES FROM COAL TAR DISTILLATION, INCLUDING, BUT NOT LIMITED TO, STILL BOTTOMS.

- . Waste code: K149
- . Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, RING-CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS. [THIS WASTE DOES NOT INCLUDE STILL BOTTOMS FROM THE DISTILLATION OF BENZOYL CHLORIDE]

- . Waste code: K150
- . Waste name: ORGANIC RESIDUES EXCLUDING SPENT CARBON ADSORBENT, FROM THE SPENT CHLORINE GAS AND HYDROCHLORIC ACID RECOVERY PROCESSES ASSOCIATED WITH THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS.

- . Waste code: K151
- . Waste name: WASTEWATER TREATMENT SLUDGES, EXCLUDING NEUTRALIZATION AND BIOLOGICAL SLUDGES, GENERATED DURING THE TREATMENT OF WASTEWATERS FROM THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS.

- . Waste code: K156
- . Waste name: ORGANIC WASTE (INCLUDING HEAVY ENDS, STILL BOTTOMS, LIGHT ENDS, SPENT SOLVENTS, FILTRATES, AND DECATATES) FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

- . Waste code: K157

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

TSCA SUBMITTER

AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/30/2017	Source: EPA
Date Data Arrived at EDR: 06/09/2017	Telephone: N/A
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 11/03/2017
Number of Days to Update: 98	Next Scheduled EDR Contact: 01/15/2018
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/30/2017	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HWAR: Hazard Waste Annual Report

Each year, Illinois hazardous-waste generators tell the Illinois EPA the amounts and kinds of hazardous waste they produced during the previous year. Generators indicate by code the types of wastes produced and the steps they took to manage these wastes. If some or all of these wastes were sent to commercial treatment, storage, and disposal facilities (TSDFs), that information and the identity of each receiving facility also are submitted. Illinois TSDFs likewise report the types and quantities of wastes received from in-state and out-of-state generators; they also report the procedures they used to manage these wastes.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RGA LF: Recovered Government Archive Solid Waste Facilities List

The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Illinois Environmental Protection Agency in Illinois.

Date of Government Version: N/A

Source: Illinois Environmental Protection Agency

Date Data Arrived at EDR: 07/01/2013

Telephone: N/A

Date Made Active in Reports: 01/10/2014

Last EDR Contact: 06/01/2012

Number of Days to Update: 193

Next Scheduled EDR Contact: N/A

Data Release Frequency: Varies

RGA LUST: Recovered Government Archive Leaking Underground Storage Tank

The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Illinois Environmental Protection Agency in Illinois.

Date of Government Version: N/A

Source: Illinois Environmental Protection Agency

Date Data Arrived at EDR: 07/01/2013

Telephone: N/A

Date Made Active in Reports: 12/30/2013

Last EDR Contact: 06/01/2012

Number of Days to Update: 182

Data Release Frequency: Varies

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/28/2017

Source: Department of Energy & Environmental Protection

Date Data Arrived at EDR: 08/18/2017

Telephone: 860-424-3375

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Source: Department of Children & Family Services

Telephone: 312-814-4150

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

4301 W. CHICAGO AVE
CHICAGO, IL 60651

TARGET PROPERTY COORDINATES

Latitude (North):	41.893803 - 41° 53' 37.69"
Longitude (West):	87.735743 - 87° 44' 8.67"
Universal Transverse Mercator:	Zone 16
UTM X (Meters):	438964.4
UTM Y (Meters):	4638033.5
Elevation:	610 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5681444 CHICAGO LOOP, IL
Version Date:	2012
Northwest Map:	5680695 RIVER FOREST, IL
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
17031C0415J	FEMA FIRM Flood data

1700740050B	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
CHICAGO LOOP	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

6G	1/2 - 1 Mile SSW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Silurian
Series: Middle Silurian (Niagoaran)
Code: S2 (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBANLAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Bedrock Max: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	60 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: fine sand
fine sandy loam
silty clay loam
loamy fine sand

Surficial Soil Types: fine sand
fine sandy loam
silty clay loam
loamy fine sand

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: sand
fine sand
loamy sand
silty clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Interview Documentation

USER QUESTIONNAIRE – ASTM 1527-13 STANDARD PRACTICE

Phase 1 Environmental Site Assessment

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “*Brownfields Amendments*”), the *user* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees.

The *user* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that “*all appropriate inquiries*” is not complete.

(1.) Environmental liens that are filed or recorded against the property (40 CFR 312.25).

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

NOTE 1—In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

At this time, we are not aware of any liens. The current owner will be providing a title commitment which I'll forward upon receipt. We have requested that AMEC conduct a separate AUL/lien search as part of the Phase I.

(2.) Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)).

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

At this time, we are not aware of any AULs. The current owner will be providing a title commitment which I'll forward upon receipt. We have requested that AMEC conduct a separate AUL/lien search as part of the Phase I.

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No

(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes, based on discussions with the Chicago Department of Planning and Development, who is handling the purchase, the price is based on fair market value.

(5.) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a.) Do you know the past uses of the property?

See previous reports provided by the owner as well as the property screen conducted by 2FM.

(b.) Do you know of specific chemicals that are present or once were present at the property?

See previous reports provided by the owner as well as the property screen conducted by 2FM.

(c.) Do you know of spills or other chemical releases that have taken place at the property?

See previous reports provided by the owner as well as the property screen conducted by 2FM.

(d.) Do you know of any environmental cleanups that have taken place at the property?

See previous reports provided by the owner as well as the property screen conducted by 2FM.

(6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

See previous reports provided by the owner as well as the property screen conducted by 2FM.

INTERVIEWS WITH PAST and PRESENT OWNERS, OPERATORS, and OCCUPANTS

This worksheet should help complete of the "Interview" portion of the All Appropriate Inquiry land acquisition screening. The worksheets are not exhaustive and should be tailored based on professional judgment and site conditions.

The AAI rule requires interviews with the current owner and occupant of the subject property. If the property has multiple occupants, the inquiry of the environmental professional should include interviewing major occupants, as well as those occupants likely to use, store, treat, handle or dispose of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances, or those who have likely done so in the past. Additionally, if the current owner is a third party holding company who obtained title to the property with the sole intent of selling it to the Federal government, it is suggested that the previous owner also be interviewed. In either case, at least one of the following individuals should also be interviewed.

- Representative of the local fire department that serves the property;
- Representative of the State and/or local health agency or local/regional office of state health agency serving the area in which the property is located;
- Representative of the State and/or local agency or local/regional office of state agency having jurisdiction over hazardous waste disposal or other environmental matters in the area in which the property is located; or
- Representatives of Local agencies responsible for the issuance of building permits or groundwater use permits that document the presence of AULs that may identify issues of concern in the area in which the property is located.
- Current and past facility managers with relevant knowledge of uses and physical characteristics of the property;
- Past owners, occupants, or operators of the property; or
- Employees of current and past occupants of the property.

In the case of inquiries done at "abandoned properties," where there is evidence of potential unauthorized uses of the subject property or evidence of uncontrolled access to the subject property, the inquiry must include interviewing one or more (as necessary) owners or occupants of neighboring or nearby properties from which it appears possible to have observed uses of, or releases at, such abandoned properties.

(Separate questionnaires must be completed for each interview)

Name of person interviewed: **Matthew J. Grusecki, Sr Vice President, Northern Builders, Inc. and Ed Garske, Carlson Environmental – his environmental consultant**
Telephone number: 773-266-6438

Affiliation with Property:

Northern Builders is a part-owner of the property through an entity called Chia LLC
(E.g., Owner, operator, caretaker, previous owner, or neighbor)

He has been associated with the property for 19 years

Time frame affiliated with Property:

"To the Best of Your Knowledge..."

A. Property Use(s)

1. Do you have or know of the existence of any of the following records related to the property? If yes, please provide copies or make them available. Yes ___ No X Unknown ___

a. Radon, Asbestos, or

Lead-Based Paint Surveys

No ___ X ___ Copy/s Attached ___ No copy avail. ___

b. Environmental Compliance Audit Reports

No ___ X ___ Copy/s Attached ___ No copy avail. ___

c. Environmental Permits Related to Current
or Previous Site Activities (e.g., waste
disposal permits, wastewater permits,
NPDES permits)

No ___ X ___ Copy/s Attached ___ No copy avail. ___

d. Registrations for underground and above-
ground storage tanks.

No ___ X ___ Copy/s Attached ___ No copy avail. ___

e. Hazardous Materials Management Plans
(Emergency Planning and Community

Right-To-Know Act (EPCRA))	No <input checked="" type="checkbox"/> Copy/s Attached <input type="checkbox"/> No copy avail. <input type="checkbox"/>
f. Facility safety plans	No <input type="checkbox"/> Copy/s Attached <input type="checkbox"/> No copy avail. <input type="checkbox"/>
Unknown

*Information on reports provided is in the Phase I text

2. Has the property ever been used for an industrial or commercial use (e.g., official and unofficial shooting ranges; processing, handling, management, disposal, storage, manufacture, or transportation of hazardous substances or petroleum products, such as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photographic developing laboratory, methamphetamine laboratory, junkyard, bone yard, or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility). If yes, describe the activities and provide the time frame, types, location(s) and quantities of hazardous substance use and storage.

Yes ☒ No ☐ Unknown ☐
 Was a railyard

3. Has there ever been permitted or planned mining activity or oil and gas exploration or development on the property? If yes, describe the activities and provide the time frame, location(s), and scope of operations.

Yes ___ No X Unknown ___

Not to their knowledge

4. Has the property ever been used for agricultural purposes, such as livestock or crops? If yes, describe the operations and indicate the location(s) and time frames involved.

Yes ___ No ___ Unknown X

May have been before it was a railyard

If yes, did the operation involve the use or storage of chemicals such as pesticides, fertilizers, and or solvents? If yes, describe and provide location(s) and the type, quantity, duration of use, and management practices.

Yes ___ No ___ Unknown X

5. Are there, or has there been, any improvements, such as buildings, water towers, smokestacks, smelters, and old building foundations on the property? If yes, describe each improvement, including construction date for each improvement; location on the property; square footage; past and current uses; dates of major renovations, additions, modifications; number of stories; type of construction; heating and cooling sources; water sources; sewage, solid and hazardous waste disposal; and removal date (if applicable).

Yes ___ No___ Unknown ___

Some small buildings were onsite when it was a railyard. They believe there were 2 near the middle of the site

6. Other Questions as necessary based on the records review:

Not applicable

B. Hazardous Materials and Substances

1. Do the current operations on the property involve the use and storage of chemicals? If yes, please describe the operations and indicate the location(s), type, and quantities of materials used. Describe locations of chemical storage, mixing, and loading. Discuss any use, storage, mixing, or disposal of automotive or other batteries, pesticides (e.g., insecticides, herbicides, and fungicides), paints, solvents, or other chemicals on fence lines, rights-of-way, or other structures such as airstrips, heliports, or crop duster operations.

Yes ___ No __X_ Unknown ___

If yes, has there been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with current operations? If yes, describe the nature and location(s) of the release and the quantities and types of hazardous substances. This includes staining or soils and floors in areas utilized for the use and storage of hazardous materials.

Yes ___ No ___ Unknown ___

Not applicable

If there had been a spill or release of hazardous substances or petroleum products, did someone report the incident to the National Response Center or a local or State emergency response authority? If yes, identify the agency.

Yes ___ No ___ N/A ___X___ Unknown ___

If a spill or release of hazardous substances or petroleum products has occurred, has the release been mitigated? If yes, describe the mitigation, identify the lead regulatory agency that oversaw the mitigation and indicate if the lead regulatory agency issued a no-further action (NFA) determination.

Yes ___ No ___ N/A ___X___Unknown ___

If remediation is completed, does the property have contamination or residual contamination? If yes, are there any institutional controls/land use restrictions in place or long term monitoring and maintenance requirements?

Yes ___ No ___ N/A ___X___Unknown ___

2. Are there any past operations at the property that involved the use or storage of hazardous materials and substances? If yes, describe the operations and the location(s), types, and quantities of materials.

Yes ___ No ___ Unknown X___

If yes, has there been a spill or release of hazardous substances, petroleum products, or other potential environmental problems on the property associated with past operations or tenants? If yes, describe the nature and location(s) of the release and the quantities and types of hazardous substances.

Yes X___ No ___ N/A ___ Unknown ___

PNAs and metals were detected in previous investigations

If a spill or release of hazardous substances or petroleum products had occurred, was it reported to the National Response Center or a local or State emergency response authority? If yes, identify the agency.

Yes ___ No ___ N/A___ Unknown X___

If a release of hazardous substances or petroleum products had occurred, was the release been mitigated? If yes, describe the mitigation, identify the regulatory agency that oversaw the mitigation and indicate if the lead regulatory agency issued a no-further action (NFA) determination.

Yes ___ No X___ N/A ___ Unknown ___

If remediation is completed, does the property now have contamination or residual contamination present? If yes, are there any institutional controls or land use restrictions in place or long-term monitoring and maintenance requirements?

Yes ___ No ___ N/A X Unknown ___

3. Have there ever been any easements, rights-of-way, pipelines, utility lines, railways, entry or exit ports and associated structures, either buried or overhead, crossing the property? If yes, please describe and indicate the location(s), approximate construction date, and the owner's identity.

Yes ___ No ___ Unknown ___

Railways - property was a railyard. Matt indicates that there are utility lines and a storm sewer easement shown on the site survey

If yes, are you aware of any spills or releases associated with these features? If yes, please describe the spills and releases and indicate the date, type and quantities of materials involved.

Yes ___ No ___ Unknown X

If a spill or release has occurred, are you aware if the release has been mitigated? If yes, who did the mitigation and what regulatory agency oversaw the mitigation? If known, indicate whether the lead regulatory agency issued a no-further action (NFA) determination.

Yes ___ No ___ N/A X Unknown ___

If remediation is completed, are you aware if there the property still has contamination or residual contamination? If yes, are there any institutional controls or land use restrictions in place or long-term monitoring and maintenance requirements?

Yes ____ No ____ N/A X Unknown ____

4. Are you aware if the property's topography has been altered or if the property has any unnatural topographic features present? If yes, please describe the topographic alterations or unnatural features. Indicate their location(s) on the property and, if known, when the alterations occurred and by whom.

Yes X No ____ Unknown ____

Historical grading occurred.

5. Has fill material ever been brought onto the property that originated from a contaminated site or that was of an unknown origin? If yes, describe the date and quantity of material brought to the property, indicate the location where the material was placed.

Yes ____ No X Unknown ____

Matt and Ed are not aware of any fill being brought to the site

If fill material came from a contaminated site, identify the fill's origin and describe the contamination.

Not applicable

6. Is there any evidence that waste materials were dumped above grade, buried, or burned, either currently or previously, on the property? Examples include hazardous materials, petroleum products, labeled or unlabeled drums or containers, pesticide containers, household and farm debris, automotive or industrial batteries, building demolition debris, or other waste materials.

Yes ____ No ____ Unknown X

7. Are there any floor drains in the on-site structures or areas where chemicals (e.g., waste oil, antifreeze, solvents, and pesticides) were used or stored? If yes, indicate the location(s) of the structures and the types, quantities, and time frames related to the associated chemical use or storage. For each area or structure, also indicate the discharge location for the floor drains.

Yes ___ No ___ Unknown ___

Not applicable

8. Do the walls, floors, or ceilings of the structures used to store hazardous materials have any chemical stains? If yes, indicate the areas in each structure that has chemical staining.

Yes ___ No ___ Unknown ___

Not applicable

9. Are there or have there been any floors, drains, walls, or ceilings stained by substances other than water or that are emitting foul or unnatural odors (e.g., mold, mildew, algae)? If yes, describe the location(s) and the nature of the past and current site operations.

Yes ___ No ___ Unknown ___

Not applicable

10. Are there electrical transmission lines, transformers, capacitors, lighting ballast, or hydraulic equipment (e.g., elevators, presses, lifts, or doors) on the property? If yes, identify the location(s) and approximate age of the equipment.

Yes ___ No ___ Unknown X

There may be a transformer offsite on Kilbourn Avenue side of property

If the site has electrical transmission lines, transformers, capacitors, lighting ballast, or hydraulic equipment, has testing been done to determine the presence of polychlorinated biphenyls (PCBs) or has any on-site equipment contained PCBs? If yes, indicate the location(s), type of equipment, and dates.

Yes ☐ No ☐ Unknown ☐

Not applicable

If the site has or had PCBs, are you aware of any release of PCBs that have occurred? If yes, describe the release and indicate the date, location(s) and whether the release was mitigated.

Yes ☐ No ☐ N/A ☒ Unknown ☐

11. Has there ever been any mercury-containing equipment (e.g., switches, thermostats, thermometers, manometers, or sink traps) on the property? If yes, indicate the location(s) and type of equipment and dates.

Yes ☐ No ☐ Unknown ☒

12. Are you aware of any radon, asbestos-containing materials, or lead-based paint on the property? If yes, indicate the type, locations and dates.

Yes ☐ No ☐ Unknown ☒

If yes, has anyone done any radon, asbestos-containing materials, or lead-based paint surveys on the property? If yes, indicate whether radon, asbestos-containing materials, or lead-based paint has been identified in any on-site buildings. Identify the dates of the surveys, the structures, the results, and condition of the materials.

Yes ___ No ___ Unknown X

13. Is there current or past use of above-ground or underground storage tanks, including drums or other fuel containers, on the property? If yes, identify the tanks locations, installation dates, and the types and quantities of materials stored. If the tanks were removed, indicate the removal date and whether the lead regulatory agency issued a closure certification notice.

Yes ___ No ___ Unknown X

If above-ground or underground storage tanks are or were used on the property, was there ever a spill or release of hazardous substances associated with the tank system? If yes, indicate the date and nature of the spill or release.

Yes ___ No ___ Unknown ___

Not applicable

If a spill or release has occurred related to an on-site tank system, was it mitigated to the satisfaction of the lead regulatory agency? If no, describe further actions that must be undertaken to address the spill or release.

Yes ___ No ___ Not Applicable X Unknown ___

14. Are you aware of any hazardous substance or pollutant or contaminant spill or release, or other potential environmental problems on any adjacent or nearby properties? If yes, please describe (if known) the location(s) of the release, the type and quantities of materials involved, and the approximate dates. If known, also indicate the owner of the property where the release occurred.

Yes ☒ No ☐ Unknown ☐

PNAs and metals detected in previous Phase IIs

If there was a release of hazardous substances, petroleum products on any adjacent or nearby properties are you aware if the release was mitigated?

Yes ☒ No ☐ Not Applicable ☐ Unknown ☐

Phase I by Carlson identified nearby properties with known releases

15. Are you aware of contamination or residual contamination on adjacent or nearby properties that poses a threat or may pose a future threat to the property? If yes, describe the threat or potential threat.

Yes ☐ No ☐ Unknown ☒

16. Are you aware of any institutional controls, land use restrictions, long-term monitoring, or maintenance requirements in place on adjacent or nearby properties that affect the property? If yes, please describe and identify the adjacent or nearby property and the property owner.

Yes ☐ No ☐ Not Applicable ☐ Unknown ☒

17. Other Questions as necessary based on the records review:

Not applicable

C. Water and Wastewater

1. Does the property currently or has it ever been supplied by an on-site drinking water supply well?
If yes, provide the well location(s) and construction dates.

Yes ___ No ___ Unknown X___

None known

Have contaminants ever been identified in the on-site drinking water well or the water system that exceeded acceptable levels? If yes, describe the contamination and indicate the dates, contaminant levels and the source of the contamination, if known.

Yes ___ No ___ Not Applicable_X___ Unknown ___

If an on-site drinking water well is no longer used, has it been properly abandoned according to applicable regulatory requirements? If yes, indicate the date the well was abandoned.

Yes ___ No___ Not Applicable_X_ Unknown ___

2. Has the property ever had an on-site wastewater treatment and disposal systems (e.g., septic systems or sewage lagoons). If yes, please describe of the system, including the location(s), size, date constructed, and which buildings discharge to the system.

Yes ___ No ___ Unknown _X_

Not to their knowledge

If the on-site wastewater treatment and disposal system is no longer used, has it been closed? If yes, describe method of closure and date closed.

Yes ___ No ___ Not Applicable___ Unknown ___

3. Does the property have any monitoring wells? If yes, explain the purpose of the wells and provide the location(s), dates of construction, and any analytical results.

Yes ☒ No ☐ Unknown ☐

Phase I indicates 15, placed due to planned transfer station

If the monitoring wells are no longer used, were they properly abandoned according to applicable regulatory requirements? If yes, indicate the date the well was abandoned.

Yes ☐ No ☒ Not Applicable ☐ Unknown ☐

4. Does the property have surface water (e.g., pits, ponds, lagoons, rivers, creeks, or oceans)? If yes, describe the location(s) and type of surface water.

Yes ☐ No ☒ Unknown ☐

If the property has surface water, are you aware of any unnatural characteristics such as color, sheens, odors, or sterility? If yes, please describe and indicate whether the situation is new or pre-existing.

Yes ☐ No ☐ Not Applicable ☒ Unknown ☐

Yes ____ No ____ Unknown X

Not applicable

D. Compliance/Permits

1. Have there been any environmental permits or licenses issued for current or past operations associated with the property (e.g., air quality, water discharge, or landfills)? If yes, describe the permitted operations, indicate the permitting agency, date the permit was issued, and whether the permit is still effective.

Yes ___ No ___ Unknown X

2. Are you aware of any environmental liens against the property that were filed or recorded under Federal, Tribal, State or local law? If yes, describe the lien and indicate the date and effect on the current and future use of the property.

Yes ___ No ___ Unknown X

3. Are you aware of any activity and land use limitations that are in place on the property or that were filed or recorded under Federal, Tribal, State or local environmental laws? If yes, describe the land use restrictions, identify the party that issued the restrictions and the date.

Yes ___ No ___ Unknown X

None known

4. Are you aware of any compliance/enforcement notices relating to past or current violations of environmental laws with respect to the property or any facility on the property? If yes, describe the violations and the dates involved.

Yes ___ No ___ Unknown X

None known

5. Are you aware if any environmental site assessment, or other environmental investigations, of the property, or any other property or site records ever indicated the presence of hazardous substances, petroleum products, or other potential environmental problems on the property? If yes, describe the report and findings.

Yes ☒ No ☐ Unknown ☐

Phase I and Phase IIs - Ed Garske thinks there may have been another Phase I or Phase II by his firm - he will check and follow up - PNAs and metals detected

6. Are you aware of any environmental site assessment, or other environmental investigations, of the property, or any other property or site records that recommended further assessment of the property? If yes, identify the report and indicate if the further assessment was done.

Yes ☒ No ☐ Unknown ☐

See above

7. Are you aware of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substances or petroleum products on the real property? If yes, describe the action and identify the party that is initiating the action.

Yes ☐ No ☐ Unknown ☒

None known

8. Other Questions as necessary based on the records review:

Not applicable

E. Other

1. Are you aware any past or current occurrences of anomalous vegetation (e.g., stressed or dead) on the property? If yes, indicate the location(s) and approximate dates.

Yes ___ No X Unknown ___

Have any vegetative control programs (e.g., along transmission lines, fence lines, rights-of-ways, or pipelines) been done on the property? If yes, describe the program and types of activities.

Yes___ No___ Unknown_X___

2. If not mentioned above, is there anything else that could indicate the presence of hazardous substances, petroleum products or other environmental conditions that may affect the property?

Yes ___ No ___ Unknown X___

Not to their knowledge - potentially other reports, Ed will check

Sent: Wednesday, June 21, 2017 4:39 PM
To: Jank, Mary E
Subject: Re: 4301 W Chicago Avenue

Dear Mary,

I received your request below. However, please note that environmental records maintained by CDPH are available on line through the City's Open Data Portal at <https://data.cityofchicago.org/>. You may start your search in the Environmental Records Lookup Table (<https://data.cityofchicago.org/d/a9u4-3dwb>). Click on the "View Data" button, and then enter a street address (in the filter on the right of your screen) to determine whether records exist in any of the seven environmental datasets: Complaints, Asbestos/Demolition Notices, Enforcement, Inspections, Permits, Above ground/Underground Tanks, and Environmental Permit Holds. If there is a "y" for yes in the Lookup Table, then click on the "y" to go to the indicated dataset and find the information you have requested.

I hope that this is helpful. Please let me know if you have any questions.

Sincerely,

Jennifer Hesse

Carmen Yung
6855 DIDRIKSON LANE
Woodridge, IL 60517

Dear Carmen Yung,

The Office of the State Fire Marshal ("OSFM") received your request for records, pursuant to the Freedom of Information Act, on 11/19/2017. The OSFM has reviewed its files and, unfortunately cannot fulfill your request for the following reason:

The documentation and/or information you seek is not of the type prepared or maintained by the OSFM.

We have carefully searched our office records in response to your request. Unfortunately, the OSFM does not have any records that are responsive to your specific request.

Pursuant to Section 9.5 of the Act, "any person whose request to inspect or copy a public record is denied by a public body . . . may file a request for review with the Public Access Counselor established in the Office of the Attorney General not later than 60 days after the date of the final denial." Such requests must be in writing, signed by the requester and include (1) a copy of the request for access to records and (2) any response from the OSFM. Further information on such requests contact:

Sarah Pratt
Acting Public Access
Counselor Office of the Attorney General
500 S. 2nd Street
Springfield, Illinois 62706
Phone: 1-877-299-FOIA
(1-877-299-3642)
Fax: (217) 782-1396

For your added convenience, we now also offer electronic submission of FOIA requests. To use this feature please go to <http://www.sfm.illinois.gov/public/foia.aspx> and simply fill out our electronic FOIA request form.

Should you have further questions regarding this matter, please contact me at your earliest convenience.

Sincerely,

Matt Sebek
Deputy General Counsel FOIA Officer
Office of the State Fire Marshal
[217-785-1011](tel:217-785-1011)

to me ▾

2:05 PM (1 hour ago) ☆

Good afternoon Ms. Yung,

This email is a follow up to my phone call, a message was left on your voicemail. My name is Deidra Gray from the U.S. EPA. In regards to your FOIA request# 001830, for the property address at [4301 West Chicago Avenue, Chicago, Illinois](#). Our database searches have not found any Superfund Division records responsive to your request, a no response letter will be sent to you from the Superfund Division. Another division is also assigned to your request, they will send you a separate response. Do you have any additional information to add to the search? If a response to this message is not received within (3) business days, by Tuesday November 28, 2017, we will assume that you are no longer interested in pursuing your FOIA request, and your request will be automatically closed the following business day.

Thank You.

Deidra Gray

Consultant Qualifications

SALVATORE CONSALVI, P.G.

Project Geologist

EDUCATION

Purdue University: B.S. Geology

CERTIFICATION

Professional Geologist, Florida
OSHA 40-Hour HAZWOPPER Training
US Forest Service Radio Operator
Wildland Firefighter Type II
Prescribed Fire Crew Member

SUMMARY OF QUALIFICATION

Mr. Consalvi is a registered Professional Geologist and has more than 20 years experience in environmental consulting services. Mr. Consalvi has extensive field experience in performing site assessments and remediation. He has performed numerous hydrogeological studies, soil and groundwater sampling, construction and remediation oversight, remedial investigation and feasibility studies at complex industrial and RCRA sites, leaking underground storage tank sites, landfills and naval stations. In addition to environmental investigations, Mr. Consalvi's other expertise includes geotechnical investigations and concrete testing, aquifer testing, hydric soil investigations, wetland delineations, air sampling and asbestos abatements.

EXPERIENCE

Mr. Consalvi has performed numerous Phase I ESAs at commercial and industrial properties involving real estate transactions. Due to his vast environmental consulting experiences, he can identify recognized environmental issues and liabilities involved, and advise clients with problem solving solutions.

Mr. Consalvi has managed asbestos abatement projects in educational, commercial, and health care facilities.

Mr. Consalvi was the field operations leader for an extensive Remedial Investigation/Feasibility Study at the US Naval Air Station. He managed field operations, conducted subsurface soil and groundwater sampling, aquifer testing, prepared investigation reports and served as the liaison for state and federal agencies. He also conducted Remedial Investigations at Glenview naval Air Station.

Mr. Consalvi has developed Post Closure Care Plans for municipal landfills in Illinois and conducted landfill closure activities.

Yung Environmental, Inc.

Mr. Consalvi has also performed numerous geotechnical investigations and concrete testing for Illinois Department of Transportation properties. Mr Consalvi's other experiences include risk-based assessments for leaking underground storage tanks sites, hydric soil investigation for wetland delineations and waste water sampling.

Craig T. Cabrera

Senior Scientist

Core skills

Project Management, Phase I ESA, Phase II ESA, Soil and Groundwater Investigation and Remediation, Solid Waste Management, UST Removal and Remediation,

Professional summary

Craig Cabrera is a Principal Scientist with 25 years of professional experience as an environmental consultant serving in a variety of technical and managerial roles for commercial and industrial clients. Craig has managed a wide variety of projects that include: soil and groundwater investigations and remediation; removal and remediation of underground storage tank systems, hydraulic lift systems and oil/water separator systems; Phase I Environmental Site Assessments and Phase II Environmental Site Assessments for due diligence purposes in support of property transfers, mergers, and acquisitions.

Employment history

Amec Foster Wheeler Environment & Infrastructure, Inc., Senior Scientist, Chicago, Illinois, 1990 to present

Representative projects

Environmental Services, Loparex Plant, UPM Kymmene Corporation, Iowa City, Iowa. Project Manager. Coordinated Phase I ESA, subsurface investigations, and groundwater monitoring, at a 15-acre paper coating manufacturing facility. Investigative activities completed to determine vertical / lateral extent of impacts detected in soil and groundwater. Evaluation included the completion of a Risk Evaluation and Response Action Plan submitted to the Contaminated Sites Section of the Iowa Department of Natural Resources (IDNR) Land Recycling Program (LRP) with the intent to receive a No Further Action designation for the property. Responsible for managing environmental services, coordinating field work and scheduling, and preparing project budgets.

Environmental Services, Nationwide Service Facilities, Sears Holdings Management Corporation, Nationwide, US. 1995-2012. Program Manager.

Provided project management on a nationwide basis for environmental services at over 200 facilities since 1995. Environmental services included: Phase I Environmental Site Assessments; Phase II Environmental Site Assessments; removal and remediation of automotive and elevator hydraulic lift systems; removal and remediation of underground storage tanks and oil/water separators; soil and groundwater investigations and remediation; and technical environmental consultation. Acted as the Program Manager for all local Amec Foster Wheeler offices providing specifications development, cost estimates, contractor bid analysis and selection, project direction, technical guidance, report review, administrative functions, and serving as the prime point-of contact with the Program Director and supporting staff.

Environmental Services, Danville Works Plant, CONFIDENTIAL CLIENT, Danville, Illinois. 08/2008-02/2009. Project Coordinator. Coordinated Phase I ESA, subsurface investigations, groundwater monitoring, and UST removal and remediation at an 86-acre industrial manufacturing complex with multiple buildings

Education

Continued.

(main plant and support facilities), onsite aboveground tanks, railroad spurs and capped waste ponds. Investigative activities completed to determine vertical / lateral extent of impacts detected in soil and groundwater. Investigation evaluated eight onsite solid waste management units (SWMUs) to determine necessary steps to meet U.S. EPA and state EPA cleanup goals. Responsible for developing scope of work, cost estimates, coordinating field work, and developing reports.

Harbor Belt Railroad Property, PCS Sales (USA), Inc., Hammond, Indiana.

02/2010-02/2012. Project Coordinator. Phase I Environmental Site Assessment of Indiana Harbor Belt (IHB) Railroad Property in Hammond, Indiana. The property is currently owned by Conrail and occupied by IHB. The IHB Railroad Property comprises approximately 93 acres south of Michigan Street between Columbia Avenue and Kennedy Boulevard in Hammond, Indiana. Based on the recommendations of the Phase 1 ESA, an invasive Phase II Environmental Site Assessment was conducted of the site. The scope of work included: completion of soil borings; installation of temporary groundwater monitoring wells; gauging water levels; purging the temporary wells prior to sampling; and collecting soil, groundwater and surface water samples for laboratory analysis. Subsequent remediation included the removal of two underground storage tanks, and associated impacted soils. Responsible for work plan development, budgeting, field work coordination, and report development and review.

Remedial Design and Implementation, Avaya, Inc., Montgomery, Illinois.

11/2003-04/2016. Project Manager. Environmental services to assist Avaya with compliance with the Illinois Environmental Protection Agency Resource Conservation and Recovery Act (RCRA) Remedial Action Plan Permit (RAPP) for Post-Closure Care for this site. Environmental Services include, quarterly groundwater monitoring, and maintenance on asphalt cap that serves as an engineered barrier over the RCRA Corrective Action Management Unit (CAMU). Responsible for managing environmental services, coordinating field work and scheduling, and preparing project budgets to control costs.

Environmental Services, United States Postal Service (USPS), Illinois Region.

1995-2000. Program Manager. Provided project management for a broad scope of USPS environmental service areas, including pre-acquisition Phase I and Phase II Environmental Site Assessments, underground storage tank removal and remediation, indoor air quality assessment and sample collection, storm water site assessments, lead-based paint inspections, and identification of asbestos containing building materials. Served as the primary contact for the USPS Great Lakes Area contract for over two years and successfully managed over 40 projects for the USPS.

Phase I and Phase II ESAs, Centrella Street and Belmont Avenue Locations, Ridge Property Trust, Franklin Park, Illinois. 06/2008-01/2009. Project Manager.

Managed Phase I ESAs and Phase II ESAs for two properties formerly used for grocery store product distribution and considered for acquisition by client. Subsurface investigation included soil boring and monitoring well installation and sampling for soil and groundwater impacts associated with former USTs, petroleum and chemical storage, underground hydraulic components, and potential offsite concerns. Responsible for developing scope of work, cost estimates, coordinating field work, report production and review, and client liaison.

Subsurface Investigation, Retail Distribution Facility, Confidential Client, Corpus Christi, Texas. 01/2005-12/2012. Project Manager. Managed

Continued.

environmental investigation of two-acre retail warehouse/distribution facility impacted by petroleum from leaking underground storage tanks (LUSTs). Ongoing investigation includes soil and groundwater monitoring, plume delineation, and close interaction with the Texas Commission on Environmental Quality (TCEQ) for remediation plan development. Managed remediation consisting of excavation and disposal of 180 tons of impacted soil and site restoration. Received a No Further Action status from the TCEQ. Also completed report reviews, and served as client liaison.

Pesticide Subsurface Investigation, Retail Distribution Facility, Confidential Client, Orlando, Florida. 10/2001-11/2012. Project Coordinator. Long-term environmental investigation and delineation at major retailer's former distribution center, including fleet vehicle maintenance and repair shop, in urban location. Services consisted of groundwater monitoring, soil sampling and remediation for pesticide impacts, which include excavation and source removal, phased chemical oxidation groundwater treatments utilizing various application techniques, and groundwater monitoring. Worked with a local Amec Foster Wheeler Project Manager to develop the scope of work and cost estimates, coordination and correspondence with the Florida Department of Environmental Protection Project Manager, report reviews, and served as client liaison.

Subsurface Investigation and Remediation, Former Retail Facility and Auto Service Center, Confidential Client, Washington, District of Columbia. 2004-2011. Project Coordinator. Site investigations and corrective actions to address two historical releases of petroleum on vacant lot formerly occupied by retailer vehicle service center. Conducted comprehensive site assessment (including soil borings and well installations), removal of two 1,000-gallon storage tanks, geophysical surveys, and excavation and removal of impacted soils. Approximately 2,000 tons of contaminated soil removed from one location and 5,000 tons from the other. Worked with a local Amec Foster Wheeler Project Manager to develop the scope of work and cost estimates, completed report reviews, and served as client liaison.

Installation and Up-Grades of Underground Storage Tanks, Village of Wheeling, Wheeling, Illinois. 01/2002-12/2002. Project Coordinator. Provided management and oversight for the installation of one 550 gallon, fiberglass UST and the up-grade of two 1,000 gallon steel USTs which included installation of an automated leak detection and inventory control system, and the replacement of access ports and underground conduit lines.

Underground Storage Tank Removal, Confidential Client, Woodstock, Illinois. 1997. Project Manager. Developed work plan and provided management and oversight for the removal of five gasoline and heating oil USTs. Coordinated soil remediation activities that included the removal and disposal of 1,425 cubic yards of soil. Prepared a closure report for the site and obtained a "No Further Action" status.

Underground Storage Tank Removal, Confidential Client, Wheaton, Illinois. 1998. Project Manager. Developed work plan and provided oversight for the removal of one-10,000 gallon fuel oil UST from an active commercial facility. Coordinated removal efforts with a no release status and completed a closure report for the site.

Underground Storage Tank Site Classification, Unimast, Inc., Franklin Park, Illinois. 1998. Project Manager. Prepared site classification work plan and budget and

Continued.

provided direction and oversight for the subsurface investigation efforts. Completed a report in accordance with IEPA reporting requirements and completed reimbursement submittal package for reimbursement from the IEPA LUST Program.

Phase I Environmental Site Assessments. 1995-2012. Project Manager. Performed Phase I ESAs associated with property transactions for industries, law firms, real estate offices and private owners throughout the country. Provided project management for additional sites throughout the country that were completed by Amec Foster Wheeler offices. Managed and coordinated multiple site portfolios for national clients with the largest portfolio consisting of 51 Phase I ESAs completed nationwide within a four week time period. Routinely utilize Amec Foster Wheeler offices, staff and resources nationwide for multiple projects simultaneously. Assessment activities included visual inspections for potential environmental liabilities such as underground storage tanks, chemical and drum storage, suspected water/wastewater contamination and hazardous materials/waste storage. Prepared final reports that included documenting findings, historical and regulatory information, and conclusions and recommendations.

Phase II Environmental Site Assessments. 1995-2012. Project Manager. Developed work plans and provided both project management and oversight for Phase II ESAs of industrial and commercial properties throughout the country. Directed field activities, evaluated the findings of the investigation, and provided interpretation and recommendations in a report of findings.

Environmental Services, United States Army Corp. of Engineering (USACE), Multiple Locations, Midwest. 1995-1997. Field Manager. Performed subsurface field investigations at a waste collection site in Indiana which included the installation of soil borings and monitoring wells. Provided direction and oversight of the removal of approximately 500 gallons of hazardous liquid product from a sump pit at a chemical plant in Willow Springs, Illinois. Performed LUST site classification investigations at an aviation facility in Joliet, Illinois. Completed sampling of monitoring wells at a site undergoing remediation in South Chicago, Illinois.

Storm Water Pollution Prevention Plans, Confidential Client. 1995-1997. Field Technician and Project Manager. Completed field investigations for the development of Storm Water Pollution Prevention Plans associated with National Pollutant Discharge Elimination System (NPDES) permitting for facilities in seven midwest states. Project development included site analysis, compliance analysis, spill identification and development of response procedures.

Air Sampling Professional, Asbestos Abatement, 30 Story Commercial Building, Chicago, Illinois. 1991-1992. Project Manager. Responsibilities included day-to-day abatement monitoring, scheduling, and coordination of activities between the abatement contractor and building management in an occupied building. Enforced contract specifications, observed project activities, performed workplace and clearance inspections, reported progress to the client, and prepared a comprehensive final report.

CARMEN Y. YUNG, LEED AP

EDUCATION

BS Geology – University of Hong Kong

CERTIFICATION

LEED Accredited Professional – Green Building Certification Institute
40-Hour OSHA HAZWOPER Training
OSHA HAZWOPER Supervisor Training
8-Hour OSHA Refresher Training

SUMMARY OF QUALIFICATIONS

Ms. Yung was a project manager of Leaking Underground Storage Tank Program with the Illinois Environmental Protection Agency. She has over 20 years experience in environmental consulting services. She has extensive technical and regulatory experiences in developing site characterization and remedial alternatives, performing risk-based assessments, performance of Phase I and Phase II environmental site assessments, compliance audits, leaking underground storage tank removals, assessments and reporting, air, land and water permitting, and obtaining site closure from the regulatory agencies. She has managed and obtained regulatory closures for numerous projects under the Leaking Underground Storage Tank Program and the Illinois Site Remediation Program. In addition, due to her prior employment with the Illinois Environmental Protection Agency, she is very knowledgeable with state and federal environmental regulations and has front-line experience working with state and federal regulatory agencies.

EXPERIENCE

Ms. Yung has performed over 100 Phase I/Phase II environmental site assessments and compliance audits at commercial and industrial facilities. She is able to identify the environmental issues and can assist the client with problem solving and solutions.

Ms. Yung was a project manager of the Leaking Underground Storage Tank (LUST) Program with the Illinois Environmental Protection Agency. In the past 15 years, she provided project management, technical report writings (45-Day Report, Site Classification Work Plan, Site Investigation Completion Report, Corrective Action Plan and Corrective Action Completion Report) and oversight of site assessment and remediation activities for numerous LUST sites owned by big oil companies. Due to her extensive regulatory and technical experiences and her ability to understand and meet clients' needs enables her to be instrumental in negotiating with regulatory agencies and achieving closure at LUST project sites. Ms. Yung also has performed risk-based assessments (TACO), Tier II and Tier III evaluations and groundwater modeling to evaluate risks related to environmental impact and negotiate site closure. Ms. Yung also specializes in preparing claims for obtaining reimbursement of site assessment and remediation costs from the LUST Trust Fund. She has thorough understanding of the

Yung Environmental, Inc.

procedures and requirements for obtaining reimbursement. She has numerous successes in obtaining reimbursements for the clients in a timely manner.

Ms. Yung has provided comprehensive environmental consulting services to industrial clients including a nationwide transportation company and a major railroad company. Services provided including consulting on health and safety and compliance issues, storm water sampling, preparation of Storm Water Pollution Prevention Plans, Spill Prevention Control and Countermeasures Plans, air emission reports, site investigation and remediation for releases of petroleum and hazardous substances, technical reporting and regulatory closures for the releases. She was the clients' main contact and served as regulatory advisor for the clients.

Other experiences include site assessment and site closure activities on a variety commercial, industrial and brownfield sites under the Site Remediation Program. She has strong background in the use of conventional and innovative technologies, including soil excavation, soil vapor extraction and in situ chemical oxidation. She had extensive technical experiences in preparing site investigation reports, remedial action plans and remedial action completion reports.

Mary Jank, PG

Senior Geologist

Core skills

Phase I ESA, Phase II ESA, CERCLA, RCRA, LUST, TACO, Hazardous Waste, CCDD, Investigation and Remediation Planning, Asbestos and Lead based Paint Management

Professional summary

Ms. Jank has more than 35 years of experience as a professional geologist and project manager. Her experience has included Phase I and Phase II site assessments, well site supervision, borehole logging, soil sampling, water sampling, soil vapor surveys, dye studies in fractured bedrock, XRF of lead in soils, and UST removal and site closure. Her experience has encompassed CERCLA and RCRA projects, as well as voluntary cleanups under several state programs. Her responsibilities have included site and project management activities. Ms. Jank is experienced at hydrogeological interpretation and the mapping of constituent migration in numerous types of subsurface environments including karst and discontinuous tills. Her client and agency interface experience is extensive and Ms. Jank has been a key contributor during negotiations with the EPA, the Corps of Engineers and other state and local government agencies.

Ms. Jank has prepared quality assurance documentation under both CERCLA and RCRA for both industrial and government clients. Ms. Jank also has completed TACO Tier 2 risk assessments and has assisted in Tier 3 risk assessments at several sites. Ms. Jank has also completed CERCLA risk assessment and feasibility study documents, and participated in CERCLA community relations activities including preparation of community relation plans and public meetings.

Ms. Jank has planned and overseen site remediation and re-development projects since 2000 for Chicago Public Schools and the Public Building Commission of Chicago. Ms. Jank has overseen the asbestos and lead based paint inspection, design and oversight services performed by Amec Foster Wheeler for Chicago Public Schools since 2005 and has been overseeing these same services for the Public Building Commission since 2010. She has also overseen pre-demolition asbestos inspections and lead based paint inspection and risk assessment for the Public/Private Joint Venture which is redeveloping military housing at Great Lakes, Fort Sheridan, Glenview Naval Air Stations and Crane Naval Base in Indiana.

Amec Foster Wheeler: 1996

Industry: 1982

Continued.

PBC ES Modular, Public Building Commission of Chicago, Chicago, Illinois. 05/2015-12/2015. Project Manager. Investigation, design and oversight of excavation of a playground area and parking area adjacent to two different Chicago Elementary Schools. Objective was the installation of modular classrooms adjacent to the existing schools: Mt. Greenwood and Tonti Elementary Schools. Responsible for all document preparation, review of contractor submittal, TACO, and project management. Ensured project met tight schedule of 3 months and came in below budget.

Lake County Skokie Valley Ped Bridge, Lake County (IL) Division of Transportation, Highland Park, Illinois. 05/2015-12/2016. Senior Associate Geologist. Phase I study for a new pedestrian bridge carrying the existing Skokie Valley Bike Path south into Cook County. This bridge will be built under electrical transmission lines and requires extensive coordination with ComEd, as well as the Union Pacific Railroad, and multiple municipal stakeholders. FHWA coordination for funding, wetland delineations, environmental site assessments, preliminary bridge design, public outreach, and landscape architecture are also all part of this project's scope of work. Type Size and Location plans were submitted to IDOT's Bureau of Bridges and Structures. Responsible for management and review of Phase I Environmental Site Assessment, and management and review of Phase II Environmental Site Assessment should one be necessary, and any other hazardous material or soil management issues.

I-90 Jane Addams Memorial Tollway, Kennedy Expressway to Oakton Street, Illinois Tollway, Cook County, Illinois. 08/2012 – 12/2015. Hazardous Waste. Final design for the Reconstruction and add –lanes of 5.5 miles of I-90 (Jane Addams Memorial Tollway) as part of Illinois Tollway's Move Illinois Program. Work includes preparing a Master Plan Update to address wider inside shoulder and lane for future transit options and improved profile. Amec Foster Wheeler serves as a major subconsultant to Parsons Brinkerhoff. The project will be let as 8 separate construction contracts, 4 of which will be led by Amec Foster Wheeler. Design services include roadway design, bridge design (13 bridges); retaining wall design; hydraulic modeling and drainage design; utility coordination; barrier warrant analyses; maintenance of traffic; signing and striping; 401/404 and IDNR permit applications; Soil Disposal analysis in conformance with new Illinois CCDD regulations; specifications and estimates. Responsible for managing environmental investigation to determine soil disposition.

Environmental Consulting Services for School Facilities, Chicago Public Schools, Chicago, Illinois. 01/2010-01/2013. Project Manager. Asbestos re-inspections of all building materials in more than 200 Chicago Public School facilities throughout the City of Chicago metropolitan area. Amec Foster Wheeler performed a review of all past inspections, reports and pertinent response actions prior to commencing field activities. Amec Foster Wheeler successfully managed asbestos subcontractors for performance of re-inspections with final review by Amec Foster Wheeler's IDPH Licensed Asbestos Management Planners. Management Plans were updated to include any changes noted during the re-inspection and the client's Access Database was updated for each re-inspection conducted. Final reports were provided in electronic and hard copy form. Client contact, project coordinator, and review of documents.

Continued.

Environmental Consulting Services for School Facilities 2005-2009, Chicago Public Schools, Chicago Illinois. 08/2005-07/2009. Project Manager.

Environmental consulting, management and oversight services under four-year (2005-2009) Master Services Agreement for various elementary, middle and high school buildings and support facilities throughout City of Chicago Public School system. Services included planning and oversight of abatement of asbestos-containing materials (ACMs) and lead-based paint; industrial hygiene services; and environmental investigations as needed. Services at more than 70 school facilities throughout City of Chicago metropolitan area. Responsible for review of design documents for asbestos and lead based paint abatement and management of services.

Leech Tishman Fuscaldo & Lampl, LLC Palm Phibrotech Phase I and II, Joliet Illinois. 08/2010-12/2010. Principal. Phase I and Phase II Environmental Site Assessment (ESA) at the Phibro-Tech facility in Joliet, Illinois. At the time, the facility was recycling/recovering materials from inorganic waste streams. Historically, the facility had processed RCRA hazardous waste, but as of about 2004, the facility no longer accepted those types of materials. The facility had an active RCRA Part B Permit and was under a consent decree which required compliance with the permit. Nine Solid Waste Management Units (SWMUs) have been identified and the facility was performing ongoing monitoring of groundwater. There are land use restrictions and open action items for institutional controls at the Site. Through performance of the Phase II ESA, Amec Foster Wheeler was able to provide a baseline characterization of the site prior to acquisition, including input on other areas of concern. Technical lead, reviewed documents, scoped Phase II, handled all technical issues

Zion Asbestos Survey, EnergySolutions, Inc., Zion, Illinois. 05/2008-10/2008. Project Manager. Asbestos inspections of a nuclear power station. A comprehensive NESHAP asbestos inspection survey of the Zion Nuclear Station, including completion of an inspection of all accessible building components for suspect ACM, collection of samples, and laboratory analysis. Then labeled all materials which were asbestos containing and prepared a comprehensive database of the results, identified asbestos containing pipe insulation on facility diagrams, and provided estimates of potential costs for abatement. Unit 2 Turbine Building 2 stories plus basement, mezzanines and platforms over 3000 samples over 35,000 linear feet of piping plus tanks and fittings. Responsible for client contact for procurement oversight of personnel and quality control of data review.

Fire Station #109 Phase II Environmental Site Assessment and Geotechnical Investigation, Public Building Commission of Chicago, Chicago Illinois. 11/2008-04/2009. Quality Assurance / Quality Control. Phase II environmental site assessment and geotechnical investigation for the new Fire Engine Company #109 at 2301-2359 South Kedzie Avenue in Chicago. Responsible for review of documents and assistance with technical issues with regard to TACO (risk assessment) and Site Remediation Program (Illinois Voluntary Remediation Program)

Mt. Greenwood Elementary Asbestos and Lead Based Paint Services, Public Building Commission of Chicago, Chicago, Illinois. 07/2010-09/2011. Project Manager. Asbestos inspection and abatement oversight services to the Public Building Commission of Chicago. Amec Foster Wheeler provided inspection and testing, and design services as well as asbestos project management and air

Continued.

sampling services on the Mt. Greenwood Public School renovation project. Responsible for review of all documentation, and interface with client.

Mt. Greenwood Elementary Phase I and Phase II Environmental Site Assessment and Construction Oversight, Public Building Commission of Chicago, Chicago, Illinois. 07/2010-07/2012. Project Manager. Phase I environmental site assessment and construction oversight for soil removal in conjunction with renovation of Mt. Greenwood School. Responsible for review of all documentation, and interface with client.

East Chicago IN UST Removal, Multiserv Group Ltd., East Chicago Illinois. 04/2009-12/2009. Principal Review. UST investigation and removal at an industrial facility in East Chicago, IN. Completed soil and ground water sampling and analysis. Retained contractor for UST removal. Completed UST removal report and UST site investigation report. Industrial facility - 2 acres. 3 buildings Responsible for reviewing UST reports required by IDEM.

Brownfield Site Remediation and Closure, City of Chicago Department of Environment, Chicago, Illinois. 09/1999-12/2005. Project Manager. Brownfield Redevelopment Environmental investigation and remediation services including site investigation and report, closure activities, risk assessment review, Remedial Objectives Report and Remedial Action Plan for 17-acre brownfield site on Chicago's west side. Site had formerly been location of construction debris disposal firm and contained over 500,000 CY of construction debris. Existing 34,000-SF building on site renovated to comply with "green building" principles and features green technology components. RAP developed to comply with green principles, including specially engineered barriers, geotextile fabric remediation, and tree resin product overlay to form pavement. Closure achieved in January 2003. Project won 2002 Phoenix Award for U.S. EPA Region 5. Responsible for authoring all documentation including, site investigation, remedial action completion report and remedial objectives report.

Sacramento Boulevard Site Investigation Remediation Construction Oversight and RACR Preparation, Chicago Green Works, Chicago, Illinois. 10/2005-05/2007. Principal. Site investigation, remediation construction oversight, and document preparation for 13-acre former "back" section of 445 North Sacramento Boulevard. Site previously occupied by foundry and other industrial operations; entered into Illinois EPA's Site Remediation Program (SRP) in 1999. Site to become new "Green" industrial park with 20,000-SF LEED (gold-certified) office headquarters and warehouse on site. Previous Amec Foster Wheeler Phase II environmental site assessment included 79 soil borings and 105 soil samples, and installation of 4 groundwater monitoring wells. Prepared documents included comprehensive site investigation report, remedial objectives report, remedial action plan (RAP), and remedial action completion report (RACR). All reports compiled in accordance with IEPA SRP program. Responsible for reviewing analytical data and provided Chicago Department of Environment with strategy recommendations for closure. Responsible for providing resource control and overall quality control.

Powell Replacement School Environmental Consultant Management, Public Building Commission of Chicago, Chicago, Illinois. 03/2009-01/2011. Principal. Environmental consulting services during site design through construction for the Powell Replacement Elementary School Project. This project began with a Phase I that Amec Foster Wheeler performed for Chicago Public Schools in 2006. No

Continued.

recognized environmental conditions (RECs) were discovered as a result of this Phase I. However, in 2009, Amec Foster Wheeler was asked to provide construction oversight and design services for the Public Building Commission on this same school site. During trenching activities to investigate subsurface anomalies at the property, free-phase oil was noted in the trench pit. Amec Foster Wheeler investigated this oil and delineated the extent of impacted soils. Based on that delineation, a Comprehensive Site Investigation Report, Remediation Objectives Report and Remedial Action Plan were prepared. Amec Foster Wheeler used averaging to limit the amount of required remediation at the site. Amec Foster Wheeler then oversaw the remediation of the oil and contaminated soils which was performed as part of construction activities at the site. Construction and soil excavation were completed and Amec Foster Wheeler submitted a Remedial Action Completion Report resulting in a No Further Action Letter for the site. Responsible for all technical aspects of project, used TACO (risk assessment) to reduce the amount of remediation needed for this school site.

Avondale/Irving Park Area Elementary School Construction Oversight, Public Building Commission of Chicago, Chicago, Illinois. 03/2009-12/2011. Principal. Environmental Oversight during soil movement and backfill activities during construction at the Avondale/Irving Park Area Elementary School site. Responsible for oversight of technical details of the project including specifications, review of subcontractor submittals and consultation on environmental issues with client.

Phase I and II Environmental Assessments, Leggett & Platt / Sterling Steel Company, LLC, Sterling, Illinois. 07/2001-10/2008. Geologist. Beginning in 2001, performed Phase I and II environmental assessments and provided regulatory support at client site, a 700-acre industrial steel operation acquired by client, including Due Diligence ASTM Phase I and Phase II, past compliance profile, entry of site into Site Remediation Program (2002) Comprehensive Site Investigation Report (CSIR), Remedial Objectives Report. Responsible for reviewing Phase I and Phase II documents and providing technical input with regard to TACO and SRP.

City of Chicago Department of Environment Burnside North Industrial Site Brownfield Phase II Investigation and Remediation, Chicago, Illinois. 09/1997-06/2005. Project Manager. Performed environmental services at 11-acre site of former steel manufacturing facility. Work included Phase II Environmental Investigation and inclusion of site into IEPA Site Remediation Program as "brownfield"; offsite disposal of surface tar and soils in conjunction with PNA's clean-up objectives; and submission of remediation Completion Report to IEPA. Responsible for reviewing analytical data and provided Chicago Department of Environment with strategy recommendations for closure. Responsible for providing resource control and overall quality control.

Brownfield Redevelopment to Roseland Place - Voluntary Site Remediation Program, Neighborhood Housing Services, Chicago (South Side), Illinois. 05/2005-01/2006. Principal Review. Brownfield Redevelopment Phase I and Phase II Environmental Site Assessments and related services under voluntary Site Remediation Program for redevelopment of 4-acre brownfield area into assisted living facility on Chicago's South Side. HUD funding for project required attainment of "No Further Remediation" (NFR) letter. Services included evaluation of prior investigation reports; support for entry into Illinois' Site Remediation Program; development of Site Investigation Report, Remedial Objectives Report, and Remedial Action Plan; and

Continued.

remediation oversight for former industrial property, which included 4 USTs. Brownfield contaminants include soil contaminated with polynuclear aromatics (PNAs), volatile organic compounds (VOCs) and lead in soils to a depth of 5' below surface grade. Responsible for reviewing Phase I documents and providing technical input with regard to TACO and SRP.

Military Housing Privatization and Redevelopment (for U.S. Navy) Environmental and Infrastructure Services, Forest City Military Communities Midwest, Four Cities in IL, IN, Illinois. 04/2005-07/2010. Project Manager.

Environmental and infrastructure services including Phase II environmental assessments, asbestos sampling, lead surveys and risk assessment and geotechnical sampling (for roadway design) for demolition and redevelopment and privatization of military housing units for the U.S. Navy at four locations (three in Illinois and one in Indiana) under long-term lease by public / private venture. Work involves demolition of approximately 1,500 buildings and construction of neighborhoods containing nearly 750 new market-level homes for Navy personnel and their families on portions of the base and enhancing portions of the base for existing tenants. Design work included roadway, drainage, sanitary sewer, water main, and electrical and telecom utilities for the new home sites as well as development of neighborhood centers, active and passive parks, dogs parks, tot lots, irrigation systems, and placement and connection of prefabricated park buildings. Responsible for Environmental portion of project, including planning document production (Hazardous Materials Management, Lead Based Paint Management, Asbestos Management, Pesticide Use, Mold Prevention, Stormwater Management) and overseeing Phase I and Phase II and asbestos lead-based paint activities.

Santa Monica Retail Auto Center Phase II Environmental Site Assessment, Soil Investigation, Confidential Client, Santa Monica California. 10/2008-02/2009.

Principal. Phase II environmental site assessment and subsurface soil investigation on 2-acre site of retail store automotive center, involving underground piping associated with former underground storage tank (UST) located on site. Responsible for overseeing phase II investigation.

Plant I Demolition Decommissioning Plan and Specifications, Confidential Client, Rockford Illinois. 10/2006-07/2009. Principal Review.

Development of decommissioning plan and demolition specifications for Phase I demolition of buildings at Plant I industrial complex. Demolition of approximately 100,000 SF of space, including one four-story office building. Project team assisted with both bid and contractor selection. Responsible for reviewing asbestos inspection report.

Centrella Phase II, Ridge Property Trust, Franklin Park, Illinois. 06/2008-01/2009. Principal Review.

Phase II Environmental Site Assessment for two properties formerly used as grocery stores and considered for acquisition by client, including soil boring subsurface investigation for monitoring well installation and groundwater monitoring. Responsible for review and TACO (IL risk assessment) consultation of Phase II analytical results.

Danville Works Plant Phase II Remedial Investigation, Confidential Client, Danville Illinois. 08/2008-02/2009. Project Coordinator.

Phase II Remedial Investigation for 86-acre industrial manufacturing complex with multiple buildings (main plant and support facilities), onsite aboveground tanks, railroad spurs and capped waste ponds. Facility produced and packaged freon (CFC refrigerants) from 1955 to 1994, then switched to packaging only. Contamination of soil and

Continued.

groundwater with volatile organic compounds (VOCs) identified since 1970s. Investigative activities to determine vertical / lateral extent of carbon tetrachloride and other CFCs and VOCs detected in soil and groundwater, and to verify if contaminant groundwater plume extended offsite. Investigation also evaluated eight onsite solid waste management units (SWMUs) to determine necessary steps to meet U.S. EPA and state EPA cleanup goals. Responsible for developing cost estimates, overseeing field work and developing reports.

Great Lakes Naval Training Center Residential Units Renovation Asbestos and Lead-Based Paint Assessments, Confidential Client, North Chicago Illinois.

06/2006-06/2009. Project Manager. Asbestos and lead-based paint inspection, testing and risk assessment services in specified portions of 20 residential homes in the Main Side and Hospital Cove residential areas near the Great Lakes Naval Training Center. Services provided in accordance with NESHAP regulations and performed prior to renovation efforts. Additional services included oversight of removal of soils in the vicinity shown to be contaminated with lead from lead-based paint, and assessment of one residential unit for presence of mold. Responsible for reviewing reports and letter reports for asbestos removal and lead-based paint testing.

Unity Junior High School Site Brownfield Redevelopment, Cook County Regional Office of Education, Mattson Associates, Inc., Cicero, Illinois. 08/2000-12/2002. Project Manager.

Environmental investigations, site assessments, soil remediation and building demolition services on accelerated basis at site of former industrial facility in operation for over a century. Site was contaminated with PNAs, PAHs, PCBs, metals and chlorinated solvents. More than 65,000 CY of contaminated soil removed. Site was divided into seven zones based on construction schedule so that remediation and closure of each zone could be performed separately to meet construction needs. Amec Foster Wheeler performed as subcontractor to prime consultant. Site was 2003 Phoenix Award - Community Impact Winner. Responsible for preparing all SRP program documentation and risk assessment.

Industrial Property Due Diligence Services, Keating Resources / Port of Will County, LLC (IL), Joliet, Illinois. 11/2006-12/2007. Principal.

Due diligence services for possible purchase of approximately 300 acres of industrial and commercial property near Illinois River for possible development of new intermodal shipping hub. Services included conducting research, attending and advising during meetings, and providing other information / technical support with regard to historic and environmental remediation activities, ongoing water permitting activities, and issues of mining operations. Responsible for reviewing Phase I and II reports and radiation reports written by another consulting firm; attended meetings with client, purchaser and purchaser's consultant to discuss report findings.

Mine and Processing Facility Planning and NPDES Permitting, Port of Will County, LLC / Keating Resources, Joliet, Illinois. 08/2003-12/2008. Principal.

Planning and NPDES permit application as part of redevelopment of former chemical facility into new underground mine and processing facility on 117-acre site. Responsible for conducting peer review and managing project tasks.

Manufacturing Facility Groundwater Remediation and Monitoring, Avaya, Inc., Montgomery, Illinois. 11/2003-04/2016. Project Manager.

Environmental services for comprehensive site investigation, risk assessment, and remedial design and

Continued.

implementation efforts associated with decommissioning a 45-acre, former printed circuit board manufacturing facility where decrease of 37% to 99% in total chlorinated-VOC concentrations in groundwater have been documented onsite. Responsible for review of ground monitoring reports, corrective action plans; consulting on hydrogeology and design of dye study.

Village of Wheeling Friendship Park Design-Build Contractor, Construction Management, UST Removal, Wheeling, Illinois. 01/2002-12/2002. Environmental Manager. Served as Prime Contractor for design-build of a municipal park with waterfall feature, lighting, pedestrian walkways and benches and green space, serving as a centerpiece for municipal beautification. Responsible for design, general contractor duties, full-time construction management and environmental services that included removal of 6 previously unidentified Underground Storage Tanks (USTs) and backfilling the site. Responsible for completing closure documents for UST.

Joliet Road Bridge Replacement, Illinois Department of Transportation, Chicago, Illinois. 01/2002-03/2005. Geologist. Transportation engineering and design of plans, specifications and estimates (PS&E) for roadway improvements and 6-span-wide flange steel-beam bridge replacement over the B&O and IHB railroad tracks; involved bridge deck and approach slabs (250' on each side of bridge), profile adjustment, drainage design and lighting design. Responsible for reviewing analytical data.

Lake Michigan Offshore Drilling Geotechnical and Geophysical Services, Raimonde Drilling Corporation, Oak Creek (nearest city), Wisconsin. 04/2004-06/2004. Project Manager. Performed geophysical, geological and hydrographic onshore / offshore subsurface investigation along proposed two-mile water intake tunnel alignment for power generating plant. Offshore investigation involved drilling from barge platform two miles offshore on Lake Michigan. Drilling included 13 boreholes, each up to 250 feet in depth, and geophysical log for each borehole. Performed soil and rock core logging, marine geophysical surveying and downhole geophysical logging. Prepared and submitted to client major report deliverable of all field activities and logging observations. Responsible for overall quality assurance and data acquisition and review, ensuring technical competence and expertise for geologic staff implementing requested services, and overall day-to-day project oversight and management.

Remediation Services Retail Distribution Facility, Confidential Client, Corpus Christi, Texas. 06/2003-12/2007. Principal Geologist. Environmental investigation of two-acre site at retail warehouse / office location impacted by petroleum from leaking underground storage tanks (LUSTs). Ongoing investigation includes soil / groundwater monitoring and plume delineation, and close interaction with TCEQ. Responsible for Principal review of documents and for providing guidance on scope of work for the investigations.

CA Remediation Retail Distribution Facility, Confidential Client, Santa Monica California. 01/2010-11/2010. Principal. Removal of 9 hydraulic lift systems and remediation of impacted soils associated with lift systems and former USTS on one-acre site with one 10,000 square foot building. Responsible for assisting with technical issues regarding remediation and types of analysis required and technical review of documents .

Continued.

CA Lift Removal Retail Distribution Facility, Confidential Client, Visalia, California. 06/2010-09/2010. Principal. Removal and remediation of one underground hydraulic life system on one acre site for a 10,000 building. Responsible for technical review of documents and assistance with technical issues with regard to analytical issues and site closure.

District of Columbia Site Soil and Groundwater Investigation, Remediation Services, Confidential Client, Washington, District of Columbia. 2004-2011. Principal. Site investigations and corrective actions to address two releases of petroleum on vacant lot formerly occupied by retailer vehicle service center. Conducted comprehensive site assessment (including soil borings and well installations), removal of two 1,000-gallon storage tanks, geophysical surveys and excavation of test pits to conduct subsurface investigation. Approximately 2,000 tons of contaminated soil removed from one site, 5,000 tons from the other. Responsible for reviewing corrective action plan, cost estimates and sampling results.

Environmental Services, Nationwide Service Facilities, Sears Holdings Management Corporation, Nationwide, US. 1995-2012. Project Manager. Environmental services at Sears and Kmart retail stores and facilities throughout the U.S. Master Services Agreement (MSA). Services provided for stores and facilities in California, Florida, Hawaii, Illinois, Missouri, North Carolina and Texas, and included environmental assessments, risk assessments (Tier I), remedial action planning, underground storage tank (UST) assessment and removal, groundwater monitoring, site closure, regulatory compliance (including submittal for CSX rail access at one warehouse location), and removal of automobile lift systems at three auto center locations. Responsible for overseeing implementation of agreement's scope of services and interfacing with client.

Orlando Distribution Center Environmental Services, Confidential Client, Orlando, Florida. 10/2001-11/2012. Principal Geologist. Long-term environmental investigation and delineation at major retailer's former distribution center, including fleet vehicle maintenance and repair shop, in urban location. Services consisted of groundwater monitoring, soil sampling and remedial action, which included excavation source removal, dewatering, and phased chemical oxidation groundwater treatments utilizing various application techniques. Responsible for Principal review of documents and providing guidance on investigation scope of work.

Howard Park Soil Remediation Services, Confidential Client, Wilmette, Illinois. 10/2001-04/2005. Principal. Under IEPA Leaking Underground Storage Tank (LUST) program at site impacted by gasoline UST owned by local municipality, removed USTs, prepared all IEPA LUST submittals, performed Site Classification and delineation, and prepared IEPA-approved LUST Corrective Action Plan. Designed, installed and operated air sparge / soil vapor extraction (AS/SVE) remediation system. Treatment area encompassed sections of police parking lot and active park downgradient from source area. After anticipated remediation period was completed, collected confirmatory soil samples to show site was remediated. Prepared Corrective Action Completion Report requesting pathway exclusion under IEPA Tiered Approach to Corrective Action Objectives (TACO) and No Further Remediation (NFR) determination from IEPA. Responsible for reviewing all technical reports and provided risk assessment (IEPA TACO).

RCRA Closure of former Oil Storage Area, Confidential Client, Indiana. Project Manager. Additional investigation of former oil storage area found to be

Continued.

contaminated with chlorinated solvents. Remedial Action Plan has been accepted by IDEM and the design of soil vapor extraction system has been completed. Construction of the remedial system was completed.

Site Remediation Program Closure of Two Sites, Chicago Public Schools, Chicago, Illinois. Technical Lead. Reviewed previous consultant documents, and entered the sites into the SRP program. At New Sullivan School, the site was entered into the SRP in June 2000. A previous Phase I and Phase II had been completed at the property which was an entire city block in extent. No additional sampling was determined to be necessary after consultation with the IEPA in the context of developing the Remedial Objectives Report/ Remedial Action Plan for the property. Removal of soil, (the soil removal was necessary for construction), and backfill with clean soil were the planned remedial activities. These activities were completed and documented the site was given a "No Further Remediation" letter in November 2000. At the Moos School site, entry into the SRP was only accomplished in January 2001 as the Chicago Public Schools did not acquire the property until December 2000. A previous Phase I and Phase II had been completed at the property. Additional sampling was completed in 2000 and in February 2001. The site was remediated and a No Further Remediation letter obtained in October 2001. Amec Foster Wheeler completed closure under the SRP program for three other Chicago Public School sites.

Remediation of former Gas Station, Confidential Client, Confidential Location. Task Manager. Responsible for coordination of field activities and confirmation sampling for large gas station remediation project. Over 8,000 cubic yards of soil were removed for clean closure. Also responsible for investigation and closure of offsite contamination and groundwater issues. Prepared closure documentation and LUST reimbursement package.

Environmental Site Assessments, Confidential Client, Confidential City Location Illinois. 08/1997-12/2000. Principal Review. Preliminary environmental site assessment (PESA) and subsequent Phase II environmental site assessment on property adjacent to confidential manufacturing client interested in purchasing the property to expand operations. After finding subsurface impacts in groundwater on client's property, delineated the extent of onsite impacts by completing 96 sample points in 4 days, using soil probe and onsite mobile laboratory. Responsible for reviewing reports for issues and regulations.

Chicago District, Environmental Services at FUDS, U.S. Army Corps of Engineers, Chicago, Illinois. Task Manager. Responsible for task order management of multiple environmental investigations and sampling activity at Chicago area sites. Prepared work plans for field investigation, performed data interpretation and prepared project reports. The eleven projects-to-date have included: Brownfields, UST classification, geophysical investigation, groundwater sampling, well installation, sump investigation and sampling, soil sampling and sediment sampling. Two of the projects involved multiple sampling rounds. The most recent project involved the decommissioning of a former FDA laboratory contaminated with asbestos, mercury, dioxin and perchlorate. The project was completed within a very tight timeframe despite additions to the scope.

Warehouse Parcel, Confidential Client, Chicago, Illinois. Project Manager. Completed a SRP Site Characterization and Remedial Objectives report for this Brownfields site which is to be re-developed. IEPA SRP accepted the Site

Continued.

Characterization and the Remedial Objectives report. Free product at the site has been removed and confirmation sampling was completed. Final NFR letter received in August 2001. Client has requested assistance with an adjacent parcel which was entered into the SRP in June 2001. Remediation of this site has been performed and confirmation sampling completed. A completion report was submitted to the IEPA and a NFR letter was received.

TACO Evaluation, North and Cicero Site, Chicago Transit Authority (CTA), Chicago, Illinois. Task Manager. Primary author of TACO Tier 2 and Tier 3 evaluation prepared as a supplement to previous site risk assessment. IEPA has reviewed and accepted the evaluation and provided closure documentation for this former Brownfields site.

Summary Report and TACO Evaluation, 74th and Wood, Chicago Transit Authority (CTA), Chicago, Illinois. Task Manager. Primary author of summary report and TACO evaluation for this site which was remediated to allow construction to proceed in 1992 and 1993. Current evaluation was for a potential sale and lease-back

RCRA Facility Investigation Pharmaceutical Manufacturer Plant, Confidential Pharmaceutical Manufacturer, Illinois. Task Manager. Task manager and primary author for Phase II RFI report for this large, integrated manufacturing plant with six SWMUs remaining in the Corrective Action process. Performed TACO evaluation resulting in proposed closure of all six SWMUs with little or no Corrective Action. Closure documentation was approved by the IEPA.

RCRA Facility Investigation Solvent Distribution Facility, Confidential Solvent Distributor, Illinois. Project Geologist. Conducted RFI investigation at chlorinated solvent distribution facility. RFI activities consist of the installation of 12 soil borings, soil and groundwater sampling. The purpose of the investigation was to complete the horizontal and vertical delineation of soils impacted with chlorinated solvents resulting from operations at the facility's three SWMUs.
