SECTION I – INTRODUCTION

A. INTRODUCTION

The Public Building Commission of Chicago (“Commission” or “PBC”) has enhanced education, safety, and recreation across the region by building or renovating hundreds of schools, city colleges, libraries, parks, fire houses, police stations and other public facilities. PBC User Agencies include the City of Chicago, Cook County, Chicago Public Library, Chicago Public Schools, Chicago Park District, City Colleges of Chicago and other municipalities. Beginning with land acquisition, the PBC’s professional staff may manage each project through planning, financing, site preparation and remediation, design, construction and furnishing, functioning as a single point of responsibility for “turn-key” development.

B. TWO-PHASE DESIGN-BUILD REQUEST FOR PROPOSAL (RFP) PROCESS

1. **Request for Proposals – Phase I & Phase II:** This procurement is being solicited using the two-phase RFP for Design-Build Process provided by the Public Building Commission Act (50 ILCS 20/3 – 50 ILCS 20/20). As part of the Phase I Qualifications submission, Design-Build proposers shall submit their past performance history and qualifications as prescribed in this RFP for consideration by the PBC. The PBC shall review the Phase I Qualifications submissions and create a short list of the most highly qualified design build entities (not less than 2 or more than 6) and notify those entities they have been selected to submit Phase II Technical and Cost proposals for the PBC’s consideration. The PBC shall provide the short-listed proposers with the final Project Scope and Performance Criteria (SPC) that will define the PBC’s project requirements, project objectives, programmatic needs and goals, design criteria, performance criteria, budget parameters and schedule and delivery requirements. The PBC will evaluate the Phase II Technical & Cost using the criteria and relative weights established in the Phase II RFP. SPC will include the building’s final program and space requirements; performance requirements and specifications for the building’s systems; and design guidelines. Phase II Proposers will be expected to provide a design, with enhanced engineering and design documents.
2. **Proposers:** Firms formally organized as design-build entities or design firms and construction contractors that have associated specifically for this project may submit proposals. For purposes of this RFP, no distinction is made between entities formally organized as design-build entities and project specific design-build associations. Both are referred to as the Design-Build Proposer (or Proposer).
3. **Notice:** All proposers will be notified of the results of the PBC’s evaluation of Phase I submissions. The names of those Proposers from whom Phase II proposals will be requested will be published on the PBC’s website at www.pbcchicago.com. For all those Proposers who submit for Phase I and Phase II, the proposal shall be defined as all information that was submitted in response to the requirements of both phases. The PBC is not liable for and will not compensate any Proposer for costs incurred in preparation and submission of a response to this RFP (or for other costs) incurred prior to award of a contract. Furthermore, data and information furnished or referred to in this RFP is for Proposers’ information only. The PBC shall not be responsible for any interpretation or conclusion drawn from said data or information by the Proposer.
4. **Prohibitions:** Pursuant to the Illinois Public Building Commission Act (§50 ILCS 20/20.4d), “the design professional that prepares the scope and performance criteria is prohibited in any design-build entity proposal for the project.” This means any firm providing work product that may help develop the scope and performance criteria for the design-build procurement will be precluded from inclusion on a submitting design-build team. The following firms are precluded from responding to this solicitation as a part of a design-build team:
 - DLR Group
 - Nia Architects, Inc.
 - Milhouse Engineering
 - David Mason + Associates
 - tgda Landscape Architecture
 - Ambercrombie Planning & Design

SECTION III – PROJECT DESCRIPTION

PROJECT NAME: Joint Public Safety Training Campus Phase 02 – Outdoor Scenario Structures
PROJECT ADDRESS: 4443 West Chicago Avenue
PROJECT NUMBER: 04000-02
PROJECT WARD: 37
ALDERMAN: Emma Mitts
DESIGN ARCHITECT: DLR Group

PROJECT DESCRIPTION:

The Project scope for Phase 2 consists of a development a vacant property located at 4443 West Chicago Avenue in the Austin/West Humboldt Park Neighborhood for the City of Chicago Department of Assets, Information & Services (“AIS”). The Project is part of a larger 32.63 Acre Master Development of the Joint Public Safety Training Campus (“JPSTC”) project. JPTSC includes multiple Phases, including Phase 2 (outdoor scenario training), Phase 01A (outlot restaurant development) and Phase 1 (training academy building). Phase 1 and Phase 01A are being developed and delivered under separate procurements.

The Project scope for Phase 2 includes construction of Tactical Village Structures which include a tactical multi-story mixed use building, a residential two flat and three flat block, a six story live fire burn tower, a multi-story mixed use live fire building, a technical rescue prop, an auto extrication area, a Haz-Mat transportation area, a rail prop area and a driver training course, and site development and soil management. Phase 2 also includes coordination with the Phase 1 and Phase 01A work.

The two and three-story tactical mixed-use buildings will vary in size between 2,800 and 5,700 SF depending on the final size and number of stories. The building layouts are to mimic those of the typical Chicago multi-use retail property found on primary thoroughfares. The first floor of each building will be designed to represent a given commercial property with upper floors being comprised of typical one and two-bedroom residential units. Select partitions are to be modifiable to allow for differing configurations. The rear of this structure will back-up to the two/three flat walkups creating an urban alleyway. Similar to the indoor scenario training spaces the structures will only represent the general look and feel of the building typology. The ultimate materials used will be selected for durability and cost efficiency, e.g. brick and stone as depicted below may not be used or be used in limited quantities for building exteriors.

The residential two/three flat block is intended to mimic that of the typical Chicago residential block and is to consist of 3 residences, two-two story and one- three story apartment buildings. One structure is to be provided with a basement or garden level unit. Floorplates to vary between 900-1,000 SF, inclusive of vertical circulation. Each building will be set on a lot which mimics the standard Chicago lot with a modified depth (25' by 100'). The buildings will be separated by 5' gangways. Each building will have a typical Chicago balcony structure on the back, a small yard, and a two-car garage structure, garage sizes to vary between 290-400 SF. An alleyway will be provided behind the garage structure which is 15' in width.

The live-fire commercial training tower will be an approximately 12,000 SF building with six floors that are designed to simulate multiple low-rise and high-rise commercial occupancies – office building, warehouse, hotel, retail, and industrial occupancies. Incorporated into the design will be a six-story elevator shaft, without car, and a concrete stair tower which will serve for training and vertical circulation. Mounted to top of the structure are to be heavy-duty, bomb-proof, anchors for the use of tying off ropes for repelling and other training exercises.

The multi-story mixed use block will consist of 14,575 SF, 4 and 3 story live fire structures are designed to simulate a common mixed-use structure found in Chicago consisting of commercial space below and either residential or commercial space above. The structures will be cast-in-place concrete structures with CMU block infill and shall provide fire protective lining to allow for burning of Class-A material at designated locations on each floor.

The technical rescue prop will be designed to simulate a collapsed parking garage and/or train station. The facility will have a series of angled and partially broken slabs of concrete with sacrificial panels for breaching. It will also have a series of vaults and pipes to create confined space opportunities and an above ground trench. This structure will be built above grade and provide for multiple in a safe environment. It will also serve as training for parking garage/train station incidents.training scenarios for confined space, trench rescue, collapsed building, wall and roof breaching, and urban arch/rescue

SECTION III – PROJECT DESCRIPTION

A dedicated area for training of how to safely extricate victims of automobile accidents from their vehicles, as well as providing emergency medical treatment during those extrications. The ability to stage accidents on the entire site is ideal for advanced training and can be utilized to conduct multi-department training that improves communication and coordination between Chicago Police Department (CPD) and Chicago Fire Department (CFD) as well as other city agencies.

The hazardous material training areas will consist of transportation vehicle areas including a rail line. Vehicles and rail cars will be donated to the project. The arrangement of these elements shall simulate vehicles transporting hazardous materials, and a running spill fire to allow for spill response/containment operations for incidents involving transportation accidents.

The rail prop is to provide three distinct rail lines placed on grade adjacent to the Spill Fire Prop and Technical Rescue Area. The three rail lines, divided equally, shall accommodate a standard “E1” car, a standard Metra commuter car, multiple tanker cars and a freight car. Rail cars will be donated to the project for use.

An approximately 220,000 SF drive training pad will be provided for the use of the CPD and CFD to allow for vehicular drive training. The pad will be constructed out of heavy-duty concrete with an 8'-0" to 16'-0" wide apron on the north, east, and south side of loose aggregate, sand or pea gravel. There will not be a curb between the pavement and loose aggregate. The aggregate can be used for training as well as to provide a safety measure intended to reduce the speed of vehicles which lose control during the training. The aggregate will then transition to a landscaped area, landscaping is intended to be a low maintenance regional seed mix. The outer perimeter of the driving pad, eastern and southern portions, will be used for higher speed pursuit training.

The site development anticipates; soil management, on-site storm water detention; a private driveway extension of the Chicago Transit Authority (CTA) access road off of Chicago Avenue; necessary public way improvements per Chicago Department of Transportation (CDOT) standards including hardscaping and landscaping.

The construction is expected to be high quality durable materials for the interior and the exterior able to withstand robust use and be easily maintained. There will be minimal mechanical, electrical, and plumbing systems utilized.

The proposed design and construction schedule as well as any other proposed dates for this procurement discussed in this RFP are subject to change, modification or revision based on PBC or user agency requirements and input from the successful proposer. However, for the purposes of this RFP, the anticipated Substantial Completion and other Milestone dates shall be considered fixed.
