## **CTC Information:**

1. This Construction Task Catalog® was developed and customized by The Gordian Group, Inc. specifically for **Public Building Commission of Chicago**, priced locally using current labor, material and equipment costs, and published in October 2024.
2. The Gordian Group, Inc. licenses the use of this CTC and other proprietary information and software for the sole purpose of providing Job Order Contracting services to **Public Building Commission of Chicago**. Use of The Gordian Group's CTC and other proprietary information and software for any other purpose or any other entity is expressly prohibited without the express written consent of The Gordian Group, Inc.

## **MasterFormat™**

- The tasks in this Construction Task Catalog are organized using CSI's *MasterFormat*.

## **The Unit Prices Include:**

### **LABOR COSTS:**

1. Labor costs include unloading equipment, materials, and tools, and transporting the same up or down 2 1/2 stories (2 stories with an attic) and 125' to reach the project site; layout; measuring and cutting to fit; performing the task; disposal of excess material; and time for lunch and breaks.
2. Labor costs include direct labor through the working foreperson level at straight-time prevailing wage rates including published fringe benefits and an

allowance for Social Security and Medicare taxes, worker's compensation, unemployment insurance and employee benefits.

3. Labor costs are based on workers familiar with and skilled in the performance of the task following OSHA requirements.

### **EQUIPMENT COSTS:**

1. Equipment costs include all equipment required to accomplish the work task. Allowance for the mobilization for large equipment (e.g. cranes, pile drivers, bulldozers, excavators, backhoes, bobcats etc.) is provided for under a separate work task.
2. Equipment costs are based on ownership rates. The rate difference between the Contractor owned equipment costs and the rental equipment costs are part of the adjustment factor.
3. Equipment costs include all operating expenses such as fuel, electricity, lubricants, etc. including the operator unless specifically excluded.

### **MATERIAL COSTS:**

1. Material costs include the cost of the material, delivery, and all incidentals and accessories integral to the installation.
2. Material costs include manufacturer's and/or fabricator's shop drawings.
3. Material costs include an allowance for waste for such materials that are typically provided in standard widths, lengths, weights and units such as roofing, drywall, VCT, carpet, wall covering, ceiling tile, pipe, conduit, lumber and concrete. This list is not intended to be all inclusive, but descriptive of the types of construction materials that are typically sold in standard lengths, sizes and weights.

## Using The Construction Task Catalog®

### Complete and In-Place Construction:

1. Unit prices are for complete and in-place construction and include all labor, equipment and material required to complete the task as described in the CTC.
2. If the Contractor uses a crane or other lifting equipment (except a truck mounted boom lift or other equipment as part of the delivery process) to lift material onto a roof, even if that roof is less than 2 ½ stories, the contractor will be paid for such crane or lifting equipment as a separate task (2 stories with an attic) and within 125' to reach the site.
3. Unit prices include all fasteners such as anchor bolts, lag bolts, screws, adhesive, wedge anchors, expansion bolts, roofing clips (excluding hurricane clips) that are required. Fasteners listed separately in the CTC are for use with Owner furnished material and equipment or relocating or reinstalling existing material and equipment.
4. Unit prices exclude more substantial mounting material such as threaded rod or angle iron unless the task description states otherwise.

### Demolition:

1. Unit prices for demolition include all labor, equipment and material required for the complete removal of the items; clean-up of the area; and transporting the demolished items up or down 2 ½ stories into a truck, dumpster, or to an owner designated area, located within 125' of the project site.
2. Unit prices for demolition exclude costs for hauling (See 01741900), dump fees (See 01741900), dumpsters (See 01741900), and trash chutes (See 01741900).
3. If the item being demolished is attached to another item being removed and can be removed as one item, then that item shall not be priced as a separate demolition task, unless the component

alone must be demolished to accomplish the task (e.g. demolition of pipe includes pipe fittings unless the fitting must be demolished separately to accomplish the task; demolition of a wood door includes hinges, hardware, closures, kick plates, etc.).

4. The description "replace" includes the demolition of the existing item and the installation of the new item.
5. The descriptions "remove and relocate" or "remove and reinstall" includes the removal, cleaning of item and installation of the existing item in either the same location or another location.
6. The description "reinstall" includes the cleaning and installation of the existing item.
7. Salvageable materials remain the property of the Owner and shall be turned over as directed unless otherwise provided for in the Job Order. If the Owner allows the Contractor to take possession of the salvageable materials an equitable reimbursement will be made to the Owner through the use of task 01221600 0004.
8. Non-prepriced building demolition subcontractor quotes shall include the demolition of the building down to the top of foundation and the sorting of all demolition debris. Hauling, disposal, and/or recycling of demolition debris shall not be included in this quote and shall be priced separately in the proposal using prepriced line items.

### The Adjustment Factors Include:

#### BUSINESS COSTS:

1. Overhead costs, including, unless specifically excluded in the Contract Documents, but not limited to;
  - home office overhead
  - insurance, bonds, and indemnification
  - project meetings, training, management and supervision

- mobilization and close-out for the contract and each Job Order
  - project office staff and equipment.
2. Profit.
  3. Subcontractor's overhead and profit.
  4. All taxes for which a waiver is not available including material sales tax and equipment rental.
  5. Employee or Subcontractor's wage rates that exceed the prevailing wage rates.
  6. Fringe benefits, payroll taxes, worker's compensation, insurance costs and any other payment mandated by law in connection with labor that exceeds the labor rate allowances.
  7. Cost of financing the work.
  8. Business risks such as the risk of a lower than expected volume of work, smaller than anticipated Job Orders, poor Subcontractor performance, and inflation or material cost fluctuations.
  6. Storage devices or items such as gang boxes and storage containers for Contractor's tools, equipment and materials.
  7. Basic safety and warning signage, minor barricades (e.g., construction tape, etc.) and personnel safety equipment (e.g., hard hats, safety harnesses with lifeline or cabling, protective clothing, safety glasses, face shields, etc.).
  8. All traffic barricades, except for those tasks listed in Section 01552600 0001: Traffic Protection - Rental
  9. Flagmen, groundmen and/or spotters required for traffic control and required to control the safety of the work site, workmen and pedestrians.
  10. Meeting Owner security requirements.
  11. Excess waste including roofing, drywall, VCT, carpet, wall covering, ceiling tile, pipe, conduit, siding, concrete, etc. This list is not intended to be all inclusive, but descriptive of the types of construction materials that are typically sold in standard lengths, sizes and weights.
  12. Removing and returning Owner's furniture and furnishings (e.g. chairs, tables, pictures, etc. but excluding modular furniture, wall or ceiling attached or fastened devices or furnishings, safes or other furniture requiring disassembly).
  13. Protection of all surfaces including those not in the scope of work from construction dust, debris or damage during construction up until final acceptance. The methods of protection including plastic, paper, temporary masonite and plywood (except for temporary walls), sealing doors or windows are the Contractor's responsibility
  14. Daily clean-up.
  15. Final professional project clean-up.
  16. Working in extreme temperatures (below or above normal) or adverse conditions such as excessive rain, wind, sleet or snow.
  17. Costs resulting from inadequate supply of building materials, fuel, electricity, or skilled labor.
  18. Costs resulting from productivity loss.
  19. Differences in project size; complexity and location.

### **CONSTRUCTION RELATED COSTS:**

1. Services required to obtain filings, building permits, street closure permits, and all other permits or licenses.
2. Costs incurred to investigate work sites necessary to prepare proposals and the preparation and modification of proposals, sketches, incidental drawings such as irrigation layout drawings and drawings for sizing and layout of fire sprinkler systems, submittals, as-built drawings, CADD drawings, microfilm, digital photographs and other project records.
3. Costs incurred to define and modify scopes of work including but not limited to engineering and architectural services as required to support a work order.
4. Office trailer and portable toilets for Contractor's use.
5. Construction vehicles such as pick-up trucks, utility trucks, vans, service trucks, flat bed trucks, tractors, trailers, etc.

## Using The Construction Task Catalog®

20. All costs for other than discreet items of work specifically required to complete a particular Job Order.
21. Costs associated with Underground Utility location and identification.
22. Confined Working Space is defined according to the OSHA definition 29 CFR 1926.21(b)(6)(i): "Any space having limited means of egress, which is subject to accumulation of toxic or flammable contaminants or has an oxygen deficient atmosphere, including, but not limited to, storage tanks, process vessels, bins, boilers, ventilation and exhaust duct, sewers, underground vaults, tunnels, pipelines and open top spaces more than 4 feet in depth such as pits and tubs." The Contractor shall conform to all OSHA and Owner requirements for working in Confined Working Spaces. Required ventilation and air monitoring equipment tasks shall be priced from the CTC and the Contractor is entitled to the cost of decreased labor productivity which shall be an increase of 15% of the Labor portion of the CTC tasks being accomplished.

### PRICE VARIATIONS:

1. Contractors may find differences in labor, equipment and material costs due to certain economic factors. Variations in labor cost can also result from labor efficiency, labor restrictions, working conditions and local work rules. Variations in material costs can also result from the quantity of material purchased, the existing relationship with suppliers, and because the materials have been discontinued or have become obsolete.
2. While diligent effort is made to provide accurate and reliable up-to-date pricing, it is the responsibility of the Contractor to review and analyze the unit prices, and to calculate their Adjustment Factors accordingly, prior to bidding.

### GENERAL COSTS:

1. This list is not exhaustive and is intended to provide general examples of costs to be included in the Contractor's Adjustment Factor as defined in the Contract.
2. The only compensation to be paid to a Contractor for the work tasks will be:

Published Unit Price	X	Installation (or Demolition) Quantity	X	Appropriate Adjustment Factor
-------------------------	---	---	---	-------------------------------------

3. No additional payments of any kind whatsoever will be made. All costs not included in the unit prices must be part of the Adjustment Factors.

## General Interpretations:

### WORKING HEIGHT:

1. Typical working height for work other than masonry is up to 14' above the finished floor or stationary working surface. The Contractor will not be paid for scaffolding, lifts, or similar equipment for work below 14'.
2. Typical working height for masonry work is up to 4' above the finished floor or stationary working surface. The Contractor will not be paid for scaffolding, lifts, or similar equipment for masonry work below 4'.

### FIELD ENGINEERING:

1. Surveying tasks shall be used only when the Owner requests the Contractor to perform topographic surveys or property line surveys or to establish horizontal and vertical controls. If the Owner provides horizontal and vertical control points within or adjacent to the project site, any other surveying required to complete the work is considered construction staking or layout and the cost thereof is included in the appropriate task.

### ASSEMBLIES:

1. Assembly unit prices take precedence over individual component pricing.

### TESTING:

1. If required, the contractor will be paid for testing as required by the technical specifications and as directed by the Owner (record tests) at the unit price

2024

for the appropriate task. The cost of process quality control testing routinely performed by the Contractor is included in the unit prices for the individual tasks.

## MISCELLANEOUS:

1. For the purpose of calculating the quantity of a task, quantities are calculated on a per project basis. The quantity so determined shall be used for the task and all appropriate modifiers, unless the task states otherwise.
2. Whenever there are alternative tasks that may be selected to complete work the Contractor shall select the most practical and economical tasks available (e.g. rental of equipment by weeks or months rather than days or painting by roller or spray rather than brush).
3. Whenever a material, article or piece of equipment is identified in the CTC or in the specifications by reference to manufacturers' or vendors' names, trade names, catalogue numbers, or make, the identification is intended to establish a standard. Any material, article or equipment of another manufacturer or vendor which performs satisfactorily the duties imposed by the general design may be considered equally acceptable provided that, in the opinion of the Owner, the material, article or equipment so proposed is of equal quality, substance and function. The Contractor shall not provide, furnish or install any proposed material, article or equipment without the prior written approval of the Owner. The burden of proof and all costs related thereto concerning the "or equal" nature of the substitute item, whether approved or disapproved, shall be borne by the Contractor.

## SPECIFICATIONS:

1. Specifications for tasks shall be interpreted as follows: All labor, material, equipment, spare parts, services, and work required by a specification shall be considered part of the unit price, unless the task description or technical specifications state otherwise.

## STANDARD GEOMETRY:

### Circle

- Circumference =  $2 \pi \text{ radius} = \pi \text{ diameter}$
- Area =  $\pi \text{ radius}^2 = \pi (\text{diameter}^2 / 4)$

### Cylinder

- Volume =  $(\pi \text{ radius}^2)\text{height}$
- Surface Area =  $2 \pi \text{ radius}^2 + (2 \pi \text{ radius})\text{height}$

### Sphere

- Volume =  $(4 \pi \text{ radius}^3) / 3$
- Surface Area =  $4 \pi \text{ radius}^2$

### $\pi = 3.14159$

### United Inch

- The industry standard for measuring windows is the United Inch or UI. The UI is determined by adding the width and the height in inches.

#### 01 22 Unit Prices <sup>(01 20)</sup>

##### 01 22 16 Unit Price Payment <sup>(01 22)</sup>

##### 01 22 16 00-0001 Salvage Value <sup>(01 22 16)</sup>

Note: Typically, demolished items become the property of the Contractor and any salvage value is to the benefit of the Contractor. However, the Owner reserves the right to share in the value of salvaged materials or equipment. Task 01206-1001 is used to provided credit to the Owner for an agreed upon quantity of salvage value. The quantity for Task 01206-1001 shall be based on the receipt or quote for the salvaged items. If there are multiple salvage value tasks on the same Work Order, each shall be included separately with a comment in the "note" block to identify the agreed upon portion of the salvage value (e.g. masonry, steel, etc.).

01 22 16 00-0002 EA Salvage Value.....-1.00

##### 01 22 16 00-0003 Professional Architectural/Engineering Services <sup>(01 22 16)</sup>

01 22 16 00-0004 EA Professional Architectural/Engineering Services .....1.00

Note: For the preparation of "Stamped" drawings only. To be used only at the direction of the Public Building Commission. The Adjustment Factor applied to Reimbursable Fees will be 1.0000.

##### 01 22 16 00-0005 Reimbursable Fees <sup>(01 22 16)</sup>

Note: Reimbursable fees include but are not limited to permits, special inspections, special insurance, A/E stamped drawings, additional warranties, etc, which are not included in a task or an Adjustment Factor as explained in the Contract or The Construction Task Catalog®.

01 22 16 00-0006 EA Reimbursable Fees.....1.00

Note: Reimbursable Fees will be paid to the contractor for eligible costs as directed by Owner. Insert the appropriate quantity to adjust the base cost to the actual Reimbursable Fee. If there are multiple Reimbursable Fees, list each one separately and add a comment in the "note" block to identify the Reimbursable Fee (e.g. sidewalk closure, road cut, various permits, extended warranty, expedited shipping costs, etc.). A copy of each receipt, invoice, or proof of payment shall be submitted with the Price Proposal.

01 22 23 00-0490 DAY Schonstedt GA72 CD Fluxgate Magnetometer..... Note: The Model GA-72Cd Magnetic Locator detects the magnetic field of ferromagnetic objects. It responds to the difference in the magnetic field between two sensors which are spaced about 14 inches apart. The GA-72Cd is unique because it provides an audio signal, and visual indications of both signal strength and polarity. Although most objects can be located using either of the indications, simultaneous use of both types will help you pinpoint a target and determine its orientation and identify magnetically detectable non-metallic duct and cable.	22.87	
01 22 23 00-0491 DAY Geometrics G858 Magnetometer..... Note: Displays coordinate grid, survey direction and five stacked profiles of mag data. Produces hard-copy maps within minutes of connection to PC. Comprised of a belt-mounted display/logging console connected to a cesium sensor mounted on a handheld counterbalanced staff. The console contains electronics to acquire magnetic field data with position and display it on an LCD screen for review and edit. The console stores high volumes of data in memory. Following the survey the data is transmitted at high speed to a processing computer for detailed analysis.	149.89

Note: The Minimum Labor Cost is to be used for the work of individual Contractors or Subcontractors and is based on a half day minimum charge. Not for use on existing projects where the Contractor or Subcontractor performing the work is already on site and is not required to re-mobilize. Use the Minimum Labor Cost only when the sum of the labor component for all individual work tasks relating to the work of an individual Contractor or Subcontractor is less than the Minimum Labor Cost. When using the Minimum Labor Cost, delete the labor component from all applicable CTC work tasks. The Contractor is still entitled to the material and equipment components of the appropriate work tasks necessary to complete the work.

The task quantity is the number of miles to the disposal site (one way mileage) times the number of cubic yards being transported. For example, to haul 8 CY to a site 14 miles away, the quantity is calculated as follows: 14 miles x 8 CY = 112 CYM.

Note: Includes materials, equipment, mobilization, preparation, critical barriers (e.g. electrical outlets, registers, windows, etc.), signage, removal, lockdown encapsulant applied to surfaces, bagging, clean-up, vacuuming, transportation for up to 25 miles, disposal of waste at transfer facility or final destination, personnel health monitoring, negative air, documentation and other associated costs necessary for the complete abatement and disposal of the ACM in accordance with EPA, OSHA, and local regulations. Where types of ACM are listed by quantity, the quantity of the entire project, not a particular work area, is to be used in determining which task applies. For certain types of work, there is a task with a unit of measure of SET for a quantity of less than 10 LF or SF (10 LF to 20 LF for ACM pipe insulation), followed by a series of tasks for other quantities. For those tasks the contractor will be paid the first task with a unit of measure of EA, plus an additional task to arrive at the appropriate quantity for the project.

**02 87 13 Mold Remediation (02 87)**

Note: All unit pricing in this section includes: materials, equipment, mobilization, preparation, removal, clean-up, vacuuming, transportation for up to 25 miles, disposal, monitoring (personnel and air), sampling/testing, fees, documentation and other associated costs necessary for the complete removal and disposal of mold in accordance with EPA, OSHA, IICRC standards and local regulations. Where types of Mold are listed by quantity, the quantity of the entire project, not a particular work area of building, is to be used in determining which tasks apply. For certain types of work, there is a task with a unit of measure of SET for a quantity of less than 100 LF or SF (Up to 25 LF for Mold Abatement pipe insulation), followed by a series of tasks for other quantities. For those tasks the contractor will be paid the first task with a unit of measure of EA, plus an additional task to arrive at the appropriate quantity for the project. See CSI section 01 56 16 00-0001 for temporary stud walls, 01 74 19 00-0064 for hauling in excess of 25 miles to transfer or disposal site, 02 89 00 00-0003 for plastic sheeting for containment construction, 02 89 00 00-0010 for decontamination chambers.

Note: Sizes are for height and width of bearing bars. Welded grating is open grid grating which has bearing bars and cross bars locked in place by resistance welding, or conventional hand welding. Resistance welded grating is produced on precise automated production equipment by combining hydraulic pressure with a powerful electric current to fuse - electroforge - the cross bar and bearing bar into a single rigid panel.

<b>05 53 13 00-0017 Pressure Locked Grating</b> <sup>(05 53 13)</sup>		
Note: Sizes are for height and width of bearing bars. Pressure locked grating is an open grid grating which is an assembly of tight-fitting, slotted bearing bars and cross bars, interlocked together. The permanent locking of the bars is accomplished by slotting the bearing bars with a wider 'dovetail' shape at the bottom of the slot. The bearing bar slot is usually 1/2 the depth of the cross bar. The cross bars are slotted to a depth slightly less than half its depth. When the bars are pressed together under hydraulic pressure, the cross bar material is forced into the 'dovetail' shape of the bearing bar notch, forming a strong, rigid unit.

<b>05 53 13 00-0044 Swage Locked Grating</b> <small>(05 53 13)</small>		
Note: Sizes are for height and width of bearing bars. Swage locked grating is an open grid grating where bearing bars are pre-punched to receive a cross bar without penetrating or cutting the top surface of the bearing bar. The cross bar is then inserted through the pre-punched hole and deformed by swaging or squeezing under hydraulic pressure to permanently lock the bars in place.

05 53 13 00-0064			<b>Riveted Grating</b> <small>(05 53 13)</small> Note: Riveted grating is an open grid grating where bearing bars are pre-punched to receive a solid round rivet. Crimp/lacing bars are pre-punched as well and then formed into a reticulated shape. Bearing bars and crimp bars are then assembled and clamped in place by rivets which are cold driven under hydraulic pressure to permanently lock the assembly together.
