#### ITEM NO. 6: REQUESTS FOR INFORMATION

RFI-1.

Question: The schedule of values for each location lists a pay item for an Engineer's Field Office, 2 locations

for 6 Months and the other 2 for 3 months each. Please confirm if we will be required to set up an engineer's field office at each of the 4 locations, or if one single location is acceptable for this

project.

Response: At a minimum, two (2) field offices are required, one (1) field office for both E. 109th & E. 102nd at a

location to be reviewed and approved by Commission and CDOT, and one (1) field office for both S. Hoyne & S. Harding at a location to be reviewed and approved by the Commission and CDOT. The Contractor shall be responsible for providing and maintaining the field offices from issuance of the NTP through Substantial Completion. A revised Schedule of Prices is included in this Addendum No. 3.

RFI-2.

Question: Will we be allowed to close each of the 4 streets to traffic in order to complete the project? Please

provide traffic control plans with acceptable phasing if this is not possible or allowed as this will

greatly impact contractor pricing.

Response:

Specific traffic control plans are not included in the Contract Documents. The final traffic plans will require coordination upon submittal of the Contractor's proposed Phasing and Logistics Plans. Upon completion and acceptance of the Milestone 1 Work, the Contractor may close streets as approved. The Contractor shall be responsible for any/all costs for proper street closures, including signage and maintenance. Prior to implementing any street closures, the Contractor shall submit its Project Phasing and Logistics Plan for each street for review and approval by CDOT and the Commission. At a minimum, the Contractor's Phasing and Logistics Plan shall include any proposed street closures, including Project name/street, proposed closure durations, temporary protection and barricades, traffic and sidewalk closures, and construction and directional signage, etc. The Contractor shall maintain access throughout the Project duration for any adjacent businesses including, but not limited to "J&L Auto Body" at the South Harding Project, and cross intersections at any/all locations for through traffic.
